# No. 679. Employment by Selected Industry, With Projections: 1986 to 2006

[[111,374 represents 111,374,000]. Figures may differ from those in other tables since these data exclude establishments not elsewhere classified (SIC 99); in addition, agriculture services (SIC 074, 5, 8) are included in agriculture, not services. See source for details. Minus sign (-) indicates decrease]

<sup>1</sup> As reported by state employment agencies. Beginning 1985, all placements. Placements include duplication for individuals placed more than once. <sup>2</sup> Source: The Conference Board, New York, NY (copyright). Index based on the number of advertisements in classified sections of 51 newspapers, each in a major employment area.

Source: Except as noted, U.S. Employment and Training Administration, unpublished data.

**No. 688. Nonfarm Establishments—Employees, Hours, and Earnings,  
by Industry: 1970 to 1998**

[Based on data from establishment reports. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, the self-employed, farm workers, unpaid family workers, private household workers, and Armed Forces. Establishment data shown here conform to industry definitions in the 1987 Standard Industrial Classification and are adjusted to March 1997 employment benchmarks, and reflect historical corrections to previously published data. Based on the Current Employment Statistics Program; see Appendix III]

# No. 689. Employees in Nonfarm Establishments—States: 1980 to 1998

[In thousands (90,406 represents 90,406,000). For coverage, see headnote, Table 688. National totals differ from the sum of the State figures because of differing benchmarks among States and differing industrial and geographic stratification. Based on 1987 Standard Industrial Classification Manual, see text, Section 17, Business]

<sup>1</sup> Includes mining, not shown separately. <sup>2</sup> Hawaii includes mining with construction.

Source: U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly, May issues. Compiled from data supplied by cooperating state agencies.

# No. 690. Nonfarm Industries—Employees and Earnings: 1980 to 1998

[Annual averages of monthly figures (90,406 represents 90,406,000). Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for construction, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, Table 688]

# No. 694. Annual Indexes of Output Per Hour for Selected Three-Digit SIC Industries: 1988 to 1997

[See text, Section 13, Labor Force. Minus sign (-) indicates decrease]

Industry	1987 SIC code <sup>1</sup>	Indexes (1987=100)						Average annual percent change <sup>2</sup>
		1988	1990	1994	1995	1996	1997	
Mining:								
Bituminous coal and lignite mining . . . . .	122	111.7	118.7	148.1	155.9	168.0	176.8	5.9
Crude petroleum and natural gas . . . . .	131	101.0	97.0	112.4	119.4	123.7	126.1	2.3
Manufacturing:								
Meat products . . . . .	201	100.1	97.1	101.2	102.4	97.7	(NA)	-0.3
Dairy products . . . . .	202	108.4	107.3	111.9	116.6	115.9	(NA)	1.7
Preserved fruits and vegetables . . . . .	203	97.0	95.6	107.6	109.1	109.4	(NA)	1.0
Grain mill products . . . . .	204	101.3	105.3	108.4	115.3	107.7	(NA)	0.8
Bakery products . . . . .	205	96.8	92.7	96.4	97.3	95.4	(NA)	-0.5
Sugar and confectionery products . . . . .	206	99.4	102.8	105.4	107.5	112.7	(NA)	1.3
Beverages . . . . .	208	106.0	117.7	130.9	134.3	135.7	(NA)	3.4
Miscellaneous food and kindred products . . . . .	209	107.0	99.3	101.0	103.1	107.6	(NA)	0.8
Broadwoven fabric mills, cotton . . . . .	221	99.6	103.1	122.1	134.0	137.8	(NA)	3.6
Knitting mills . . . . .	225	96.3	107.5	134.3	138.6	150.8	(NA)	4.7
Yarn and thread mills . . . . .	228	102.1	110.2	130.7	137.4	146.6	(NA)	4.3
Men's and boys' furnishings . . . . .	232	100.1	102.1	111.7	123.4	134.0	(NA)	3.3
Women's and misses' outerwear . . . . .	233	101.4	104.1	127.4	135.5	144.2	(NA)	4.2
Miscellaneous fabricated textile products . . . . .	239	96.6	99.9	107.8	109.2	106.3	(NA)	0.7
Logging . . . . .	241	93.7	86.3	87.8	86.0	86.0	(NA)	-1.7
Sawmills and planing mills . . . . .	242	100.7	99.8	103.3	110.2	114.9	(NA)	1.6
Millwork, plywood, and structural members . . . . .	243	98.9	98.0	94.5	92.7	92.2	(NA)	-0.9
Wood buildings and mobile homes . . . . .	245	97.8	103.1	98.3	97.0	97.0	(NA)	-0.3
Miscellaneous wood products . . . . .	249	95.9	107.7	111.8	115.4	114.2	(NA)	1.5
Household furniture . . . . .	251	99.4	104.5	112.5	116.9	122.2	(NA)	2.3
Partitions and fixtures . . . . .	254	95.7	95.6	98.9	101.2	97.3	(NA)	-0.3
Paper mills . . . . .	262	103.9	102.3	110.2	119.0	111.9	(NA)	1.3
Paperboard containers and boxes . . . . .	265	99.7	101.3	108.4	105.1	106.5	(NA)	0.7
Miscellaneous converted paper products . . . . .	267	101.1	101.4	110.8	113.4	114.6	(NA)	1.5
Newspapers . . . . .	271	96.9	90.6	79.9	79.0	77.1	(NA)	-2.8
Periodicals . . . . .	272	97.9	93.9	82.4	88.5	90.9	(NA)	-1.1
Books . . . . .	273	98.1	96.6	103.0	101.5	100.5	(NA)	0.1
Miscellaneous publishing . . . . .	274	96.7	92.2	97.5	94.8	93.4	(NA)	-0.8
Blankbooks and bookbinding . . . . .	278	95.6	99.4	105.4	108.7	115.0	(NA)	1.6
Industrial inorganic chemicals . . . . .	281	105.7	106.7	102.0	109.2	110.4	(NA)	1.1
Plastics materials and synthetics . . . . .	282	98.8	100.9	125.0	128.7	125.1	(NA)	2.5
Drugs . . . . .	283	101.1	103.9	105.5	108.9	112.9	(NA)	1.4
Soaps, cleaners, and toilet goods . . . . .	284	102.0	103.8	111.2	118.6	121.4	(NA)	2.2
Industrial organic chemicals . . . . .	286	109.8	101.4	100.0	98.8	98.4	(NA)	-0.2
Miscellaneous chemical products . . . . .	289	95.4	97.3	105.7	107.8	110.2	(NA)	1.1
Petroleum refining . . . . .	291	105.3	109.2	123.8	132.3	142.0	(NA)	4.0
Tires and inner tubes . . . . .	301	102.9	103.0	124.1	131.1	138.8	(NA)	3.7
Fabricated rubber products, n.e.c. <sup>3</sup> . . . . .	306	104.3	109.2	119.2	121.6	120.3	(NA)	2.1
Miscellaneous plastics products, n.e.c. <sup>3</sup> . . . . .	308	100.5	105.6	120.4	120.7	124.9	(NA)	2.5
Glass and glassware, pressed or blown . . . . .	322	100.6	104.8	112.9	115.7	121.9	(NA)	2.2
Concrete, gypsum, and plaster products . . . . .	327	100.8	102.3	101.5	104.5	107.5	(NA)	0.8
Miscellaneous nonmetallic mineral products . . . . .	329	103.0	95.4	106.3	107.8	111.3	(NA)	1.2
Blast furnace and basic steel products . . . . .	331	112.6	109.6	142.4	142.7	153.6	(NA)	4.9
Iron and steel foundries . . . . .	332	104.0	106.1	113.0	112.7	115.7	(NA)	1.6
Nonferrous rolling and drawing . . . . .	335	95.5	92.7	101.1	99.1	103.9	(NA)	0.4
Nonferrous foundries (castings) . . . . .	336	102.6	104.0	112.1	117.8	122.6	(NA)	2.3
Cutlery, handtools, and hardware . . . . .	342	97.8	97.3	109.2	111.3	117.9	(NA)	1.8
Fabricated structural metal products . . . . .	344	100.4	98.8	107.7	105.8	106.7	(NA)	0.7
Screw machine products, bolts, etc. . . . .	345	98.5	96.1	107.2	109.7	110.4	(NA)	1.1
Metal forgings and stampings . . . . .	346	101.5	95.6	108.5	109.3	113.7	(NA)	1.4
Metal services, n.e.c. <sup>3</sup> . . . . .	347	108.3	104.7	123.0	127.7	127.5	(NA)	2.7
Miscellaneous fabricated metal products . . . . .	349	101.4	97.5	103.0	106.4	108.6	(NA)	0.9
Engines and turbines . . . . .	351	106.8	106.5	122.3	122.7	136.9	(NA)	3.6
Farm and garden machinery . . . . .	352	106.3	116.5	125.0	134.7	136.6	(NA)	3.5
Construction and related machinery . . . . .	353	106.5	107.0	117.7	122.1	123.8	(NA)	2.4
Metalworking machinery . . . . .	354	101.0	101.1	109.9	114.8	114.7	(NA)	1.5
Special industry machinery . . . . .	355	104.6	107.5	121.2	132.3	134.7	(NA)	3.4
General industrial machinery . . . . .	356	106.0	101.5	106.7	112.7	114.4	(NA)	1.1
Refrigeration and service machinery . . . . .	358	102.1	103.6	110.7	112.7	114.4	(NA)	1.5
Industrial machinery, n.e.c. <sup>3</sup> . . . . .	359	106.5	107.3	127.3	138.8	142.1	(NA)	4.0
Electric distribution equipment . . . . .	361	105.4	106.3	131.8	143.0	145.1	(NA)	4.2
Electrical industrial apparatus . . . . .	362	104.5	107.5	134.5	150.4	154.1	(NA)	4.9
Household appliances . . . . .	363	103.0	105.8	131.4	127.3	126.7	(NA)	2.7

See footnotes at end of table.

# No. 694. Annual Indexes of Output Per Hour for Selected Three-Digit SIC Industries: 1988 to 1997—Continued

[See headnote, page 440]

Industry	1987 SIC code <sup>1</sup>	Indexes (1987=100)						Average annual percent change <sup>2</sup>
		1988	1990	1994	1995	1996	1997	
<b>Manufacturing—Continued:</b>								
Electric lighting and wiring equipment . . . . .	364	101.9	99.9	113.4	113.7	117.4	(NA)	1.8

## No. 713. Incidence Rates for Nonfatal Injuries and Illnesses—Selected Industries: 1995 and 1996

[Rates per 100 full-time employees. Industries shown are those with highest rates in 1997. For nonfarm employment data, see Table 690. Rates refer to any occupational injury or illness resulting in (1) lost workday cases, or (2) nonfatal cases without lost workdays. Incidence rates were calculated as: Number of injuries and illnesses divided by total hours worked by all employees during year multiplied by 200,000 as base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks a year)]

## Income, Expenditures, and Wealth

---

This section presents data on gross domestic product (GDP), gross national product (GNP), national and personal income, saving and investment, money income, poverty, and national and personal wealth. The data on income and expenditures measure two aspects of the U.S. economy. One aspect relates to the national income and product accounts (NIPAs), a summation reflecting the entire complex of the Nation's economic income and output and the interaction of its major components; the other relates to the distribution of money income to families and individuals or consumer income.

The primary source for data on GDP, GNP, national and personal income, gross saving and investment, and fixed reproducible tangible wealth is the *Survey of Current Business*, published monthly by the Bureau of Economic Analysis (BEA). A comprehensive revision to the NIPAs was completed in January 1996. Discussions of the revision appeared in the July, September, and October 1995 the January/February 1996, and the May 1997 issues of the *Survey of Current Business*. Summary historical estimates appeared in the August 1997 issue of the *Survey of Current Business*. Detailed historical data appear in the *National Income and Product Accounts of the United States, 1929-94*.

Sources of income distribution data are the decennial censuses of population and the Current Population Survey (CPS), both products of the U.S. Census Bureau (see text, Section 1). Annual data on income of families, individuals, and households are presented in *Current Population Reports, Consumer Income*, P60 series.

Data on individuals' saving and assets are published by the Board of Governors of the Federal Reserve System in the quarterly

*Flow of Funds Accounts*; and detailed information on personal wealth is published periodically by the Internal Revenue Service (IRS) in *SOI Bulletin*.

**National income and product**—Gross domestic product is the total output of goods and services produced by labor and property located in the United States, valued at market prices. GDP can be viewed in terms of the expenditure categories that comprise its major components—purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production located in the United States. Gross state product (GSP) is the gross market value of the goods and services attributable to labor and property located in a state. It is the state counterpart of the Nation's gross domestic product.

As part of the comprehensive revision released in January 1996, BEA replaced its fixed-weighted (1987 dollars) index as the featured measure of real GDP with an index based on chain-type annual weights. Changes in the new featured measures of real output and prices are calculated as the average of changes based on weights for the current and preceding years. (Components of real output are weighted by price, and components of prices are weighted by output.) These annual changes are "chained" (multiplied) together to form a time series that allows for the effects of changes in relative prices and

changes in the composition of output over time. Quarterly and monthly changes are also based on annual weights. The new output indexes are expressed as 1992=100, and for recent years, in 1992 dollars; the new price indexes are based to 1992=100.

Chained (1992) dollar estimates of most components of GDP are not published for periods prior to 1982, because during periods far from the base period, the levels of the components may provide misleading information about their contributions to an aggregate. Values are published in index form (1992=100) for 1929 to the present to allow users to calculate the percent changes for all components, changes which are accurate for all periods. In addition, the Bureau of Economic Analysis publishes estimates of the contribution of major components to the percent change in GDP for all periods.

*Gross national product* measures the output attributable to all labor and property supplied by United States residents. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect business taxes (sales and property taxes); see Table 727.

In December 1991, the Bureau of Economic Analysis began featuring gross domestic product rather than gross national product as the primary measure of U.S. production. GDP is now the standard measure of growth because it is the appropriate measure for much of the short-term monitoring and analysis of the economy. In addition, the use of GDP facilitates comparisons of economic activity in the United States with that in other countries.

*National income* is the aggregate of labor and property earnings which arises in the current production of goods and services. It is the sum of employee compensation, proprietors' income, rental income of persons, corporate profits, and net interest. It measures the total factor costs of the goods and services produced by the economy. Income is measured before deduction of taxes.

*Capital consumption adjustment* for corporations and for nonfarm sole proprietorships and partnerships is the difference between capital consumption based on income tax returns and capital consumption measured using empirical evidence on prices of used equipment and structures in resale markets, which have shown that depreciation for most types of assets approximates a geometric pattern. The tax return data are valued at historical costs and reflect changes over time in service lives and depreciation patterns as permitted by tax regulations. *Inventory valuation adjustment* represents the difference between the book value of inventories used up in production and the cost of replacing them.

*Personal income* is the current income received by persons from all sources minus their personal contributions for social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), nonprofit institutions that primarily serve individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits, public assistance, etc., but excludes transfers among persons. Also included are certain nonmonetary types of income—chiefly estimated net rental value to owner-occupants of their homes and the value of services furnished without payment by financial intermediaries. Capital gains (net losses) are excluded.

*Disposable personal income* is personal income less personal tax and nontax payments. It is the income available to persons for spending or saving. Personal tax and nontax payments are tax payments (net of refunds) by persons (except personal contributions for social insurance) that are not chargeable to business expense and certain personal payments to general government that are treated like taxes. Personal taxes include income, estate and gift, and personal property taxes and motor vehicle licenses. Nontax payments include passport fees, fines and forfeitures, and donations.

**Consumer Expenditure Survey**—The Consumer Expenditure Survey program was begun in late 1979. The principal objective of the survey is to collect current consumer expenditure data which provide a continuous flow of data on the buying habits of American consumers. The data are necessary for future revisions of the Consumer Price Index.

The survey conducted by the Census Bureau for the Bureau of Labor Statistics consists of two components: (1) An interview panel survey in which the expenditures of consumer units are obtained in five interviews conducted every 3 months, and (2) a diary or recordkeeping survey completed by participating households for two consecutive 1-week periods.

Each component of the survey queries an independent sample of consumer units representative of the U.S. total population.

Over 52 weeks of the year, 5,000 consumer units are sampled for the diary survey. Each consumer unit keeps a diary for two 1-week periods yielding approximately 10,000 diaries a year. The interview sample is selected on a rotating panel basis, targeted at 5,000 consumer units per quarter. Data are collected in 88 urban and 16 rural areas of the country that are representative of the U.S. total population. The survey includes students in student housing. Data from the two surveys are combined; integration is necessary to permit analysis of total family expenditures because neither the diary nor quarterly interview survey was designed to collect a complete account of consumer spending.

**Distribution of money income to families and individuals**—Money income statistics are based on data collected in various field surveys of income conducted since 1936. Since 1947, the Census Bureau has collected the data on an annual basis and published them in *Current Population Reports*, P60 series. In each of the surveys, field representatives interview samples of the population with respect to income received during the previous year. Money income as defined by the Bureau of the

Census differs from the BEA concept of "personal income."

Data on consumer income collected in the CPS by the Census Bureau cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, social security, union dues, medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits (see Section 12) such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that noncash benefits are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. For data on noncash benefits, see Section 12. None of the aggregate income concepts (GDP, national income, or personal income) is exactly comparable with money income, although personal income is the closest.

In October 1983, the Census Bureau began to collect data under the new Survey of Income and Program Participation (SIPP). The information supplied by this survey is expected to provide better measures of the status and changes in income distribution and poverty of households and persons in the United States. The data collected in SIPP will be used to study Federal and state aid programs (such as food stamps, welfare, medicaid, and subsidized housing), to estimate program costs and coverage, and to assess the effects of proposed changes in program eligibility rules or benefit levels. The core questions are repeated at each interview and cover labor force activity, the types and amounts of income received, and participation status in various programs. The core also contains questions covering attendance in post-secondary schools and private health insurance

coverage. Various supplements or topical modules covering areas such as educational attainment, assets and liabilities, and pension plan coverage are periodically included.

**Poverty**—Families and unrelated individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980.

The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food stamps, medicaid, and public housing. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index. The following technical changes to the thresholds were made in 1981: (1) distinctions based on sex of householder have been eliminated; (2) separate thresholds for farm families have been dropped; and (3) the matrix has been expanded to families of nine or more persons from the old cutoff of seven or more persons. These changes have been incorporated in the calculation of poverty data beginning with 1981. In the recent past, the Census Bureau has published a number

of technical papers that presented experimental poverty estimates (see Table 770) based on income definitions that counted the value of selected government noncash benefits. The Census Bureau has also published annual reports on after-tax income (see Tables 745 and 746). The *Current Population Reports*, Series P60-186RD brings together the benefit and tax data that previously appeared in the separate reports. This report shows the distribution of income among households and the prevalence of poverty under the official definition of money income and under definitions that add or subtract income components.

The poverty statistics presented by the Census Bureau and Congressional Budget Office reflect alternative adjustments for inflation. The study used a variation of the Consumer Price Index to adjust poverty thresholds for the effects of changing prices since 1967. The alternative measure of inflation uses estimates of the cost of renting equivalent housing to assess homeownership costs; this methodology has been used in the official Consumer Price Index since 1983. See text, Section 15, and source for more details.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

# No. 722. Gross Domestic Product in Current and Real (1992) Dollars, by Industry: 1990 to 1997

[In billions of dollars (5,743.8 represents \$5,743,800,000,000). Data are based on the 1987 SIC. Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product; corporate profits and capital consumption allowances have been shifted from a company to an establishment basis]

No. 732. Personal Income, by State: 1990 to 1998

[In billions of dollars (4,778.3 represents \$4,778,300,000,000), except percent. 1998 preliminary. Represents a measure of income received from all sources during the calendar year by residents of each state. Data exclude federal employees overseas and U.S. residents employed by private U.S. firms on temporary foreign assignment. Totals may differ from those in Tables 727, 728, and 730. For definition of average annual percent change, see Guide to Tabular Presentation]

<sup>1</sup> Recording of amounts for earnings from longest job increased to \$299,999. Full implementation of 1980 census-based sample design. <sup>2</sup> Implementation of 1990 census population controls. <sup>3</sup> Data collection method changed from paper and pencil to computer assisted interviewing. In addition, the March 1994 income supplement was revised to allow for the coding of different income amounts on selected questionnaire items. Limits either increased or decreased in the following categories: earnings increased to \$999,999; social security increased to \$49,999; supplemental security income and public assistance increased to \$24,999; veterans' benefits increased to \$99,999; child support and alimony decreased to \$49,999. <sup>4</sup> Introduction of 1990 census sample design. <sup>5</sup> Full implementation of the 1990 census-based sample design and metropolitan definitions, 7,000 household sample reduction, and revised race edits.

# No. 748. Money Income of Households—Median Income, by State, in Constant (1997) Dollars: 1987 to 1997

[Constant dollars based on the CPI-U-X1 deflator. Data based on the Current Population Survey; see text, Section 1. Population, and text, this section, and Appendix III. The CPS is designed to collect reliable data on income primarily at the national level and secondarily at the regional level. When the income data are tabulated by state, the estimates are considered less reliable and, therefore, particular caution should be used when trying to interpret the results]

## No. 765. Persons Below Poverty Level, by State: 1980 to 1997

[Based on the Current Population Survey: see text, Section 1, Population, and text, this section, and Appendix III. The CPS is designed to collect reliable data on income primarily at the national level and secondarily at the regional level. When the income data are tabulated by state, the estimates are considered less reliable and, therefore, particular caution should be used when trying to interpret the results; for additional detail, see source.]

State	Number below poverty level (1,000)					Percent below poverty level				
	1980	1990 <sup>1</sup>	1995	1996	1997	1980	1990 <sup>1</sup>	1995	1996	1997

## Section 15

### Prices

---

This section presents indexes of producer and consumer prices, actual prices for selected commodities, and energy prices. The primary sources of these data are monthly publications of the Department of Labor, Bureau of Labor Statistics (BLS), which include *Monthly Labor Review*, *Consumer Price Index, Detailed Report*, *Producer Price Indexes*, and *U.S. Import and Export Price Indexes*. The Department of Commerce, Bureau of Economic Analysis is the source for gross domestic product measures.

**Producer price index (PPI)**—This index, dating from 1890, is the oldest continuous statistical series published by BLS. It is designed to measure average changes in prices received by producers of all commodities, at all stages of processing, produced in the United States.

The index has undergone several revisions (see *Monthly Labor Review*, February 1962, April 1978, and August 1988). It is now based on approximately 10,000 individual products and groups of products along with about 100,000 quotations per month. Indexes for the net output of manufacturing and mining industries have been added in recent years. Prices used in constructing the index are collected from sellers and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value of commodities produced or processed in this country. Values are f.o.b. (free-on-board) production point and are exclusive of excise taxes. Effective with the release of data for January 1988, many important producer price indexes were changed to a new reference base year, 1982=100, from 1967=100. The

reference year of the PPI shipment weights has been taken primarily from the 1987 Census of Manufactures. For further detail regarding the PPI, see the BLS *Handbook of Methods*, Bulletin 2490 (April 1997), Chapter 16. The PPI web page is <<http://stats.bls.gov/ppihome.htm>>.

**Consumer price indexes (CPI)**—The CPI is a measure of the average change in prices over time in a "market basket" of goods and services purchased either by urban wage earners and clerical workers or by all urban consumers. In 1919, BLS began to publish complete indexes at semi-annual intervals, using a weighting structure based on data collected in the expenditure survey of wage-earner and clerical-worker families in 1917-19 (BLS Bulletin 357, 1924). The first major revision of the CPI occurred in 1940, with subsequent revisions in 1953, 1964, 1978, 1987, and 1998.

Beginning with the release of data for January 1988 in February 1988, most Consumer Price Indexes shifted to a new reference base year. All indexes previously expressed on a base of 1967=100, or any other base through December 1981, have been rebased to 1982-84=100. The expenditure weights are based upon data tabulated from the Consumer Expenditure Surveys for 1993, 1994, and 1995.

BLS publishes CPIs for two population groups: (1) a CPI for all urban consumers (CPI-U) which covers approximately 80 percent of the total population; and (2) a CPI for urban wage earners and clerical workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers; the self-employed; short-term workers;

the unemployed; and retirees and others not in the labor force.

The current CPI is based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors' and dentists' services, drugs, etc. purchased for day-to-day living. Prices are collected in 87 areas across the country from over 50,000 housing units and 23,000 establishments. Area selection was based on the 1990 census. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected monthly in the three largest geographic areas and every other month in other areas.

In calculating the index, each item is assigned a weight to account for its relative importance in consumers' budgets. Price changes for the various items in each location are then averaged. Local data are then combined to obtain a U.S. city average. Separate indexes are also published for regions, area size-classes, cross-classifications of regions and size-classes, and for 26 local areas, usually consisting of the Metropolitan Statistical Area (MSA); see Appendix II. Area definitions are those established by the Office of Management and Budget in 1983. Definitions do not include revisions made since 1992. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For further detail regarding the CPI, see the BLS *Handbook of Methods*, Bulletin 2490, Chapter 17; the *Consumer Price Index*, and the CPI home page: <<http://stats.bls.gov/cpihome.htm>>. In January 1983, the method of measuring home-ownership costs in the CPI-U was changed to a rental equivalence approach. This treatment calculates homeowner costs of shelter based on the implicit rent owners would pay to rent the homes they own. The rental equivalence approach was introduced into the CPI-W in 1985. The CPI-U was used to prepare the consumer price tables in this section.

**Other price indexes**—Chain-weighted price indexes are weighted averages of the detailed price indexes used in the deflation of goods and services that make up the gross domestic product (GDP). The weights used for the most recent year reflect the composition of goods and services in the preceding year; for all other years, the weights reflect the composition of goods and services in the preceding year and the current year. Chain-weighted price indexes provide the most reliable comparisons; another index, the gross domestic purchases chained price index, measures the average price of goods and services purchased in the United States. The difference between these two measures is due to net exports. Both price indexes are expressed in terms of the base year value 1992=100.

**Measures of inflation**—Inflation is defined as a time of generally rising prices for goods and factors of production. The Bureau of Labor Statistics samples prices of items in a representative market basket and publishes the result as the CPI. The media invariably announce the inflation rate as the percent change in the CPI from month to month. A much more meaningful indicator of inflation is the percent change from the same month of the prior year. The Producer Price Index measures prices at the producer level only. The PPI shows the same general pattern of inflation as does the CPI but is more volatile. The PPI can be roughly viewed as a leading indicator. It often tends to foreshadow trends that later occur in the CPI.

Other measures of inflation include the gross domestic purchases chain-weighted price index, the index of industrial materials prices; the Dow Jones Commodity Spot Price Index; Futures Price Index; the Employment Cost Index, the Hourly Compensation Index, or the Unit Labor Cost Index as a measure of the change in cost of the labor factor-of production; and changes in long-term interest rates that are often used to measure changes in the cost of the capital factor of production.

**International price indexes**—The BLS International Price Program produces export and import price indexes for nonmilitary goods traded between the United States and the rest of the world.

The export price index provides a measure of price change for all products sold by U.S. residents to foreign buyers. The import price index provides a measure of price change for goods purchased from other countries by U.S. residents. The reference period for the indexes is 1990=100, unless otherwise indicated. The product universe for both the import and export indexes includes raw materials, agricultural products, semifinished manufactures, and finished manufactures, including both capital and consumer goods. Price data for these items are collected primarily by mail questionnaire. In nearly all cases, the data are collected directly from the exporter or importer, although in a few cases, prices are obtained from other sources.

To the extent possible, the data gathered refer to prices at the U.S. border for

exports and at either the foreign border or the U.S. border for imports. For nearly all products, the prices refer to transactions completed during the first week of the month. Survey respondents are asked to indicate all discounts, allowances, and rebates applicable to the reported prices, so that the price used in the calculation of the indexes is the actual price for which the product was bought or sold.

In addition to general indexes for U.S. exports and imports, indexes are also published for detailed product categories of exports and imports. These categories are defined according to the five-digit level of detail for the Bureau of Economic Analysis End-use Classification, the three-digit level of detail for the Standard International Trade Classification (SITC), and the four-digit level of detail for the Harmonized System. Aggregate import indexes by country or region of origin are also available.

**No. 775. Purchasing Power of the Dollar: 1950 to 1998**

[Indexes: PPI, 1982=\$1.00; CPI, 1982-84=\$1.00. Producer prices prior to 1961 and consumer prices prior to 1964, exclude Alaska and Hawaii. Producer prices based on finished goods index. Obtained by dividing the average price index for the 1982=100, PPI; 1982-84=100, CPI base periods (100.0) by the price index for a given period and expressing the result in dollars and cents. Annual figures are based on average of monthly data]

# No. 777. Consumer Price Indexes (CPI-U)—Selected Areas: 1998

[1982-84=100, except as indicated. Represents annual averages of monthly figures. Local area CPI indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Area definitions are those established by the Office of Management and Budget in 1983. For further detail see the U.S. Bureau of Labor Statistics Handbook of Methods, Bulletin 2285, Chapter 19, the Consumer Price Index, and Report 736, the CPI: 1987 Revision. See also text, this section]

# No. 779. Cost of Living Index—Selected Metropolitan Areas: Fourth Quarter 1998

[Measures relative price levels for consumer goods and services in participating areas for a mid-management standard of living. The nationwide average equals 100, and each index is read as a percent of the national average. The index does not measure inflation, but compares prices at a single point in time. Excludes taxes. Metropolitan areas as defined by the Office of Management and Budget. For definitions and components of MSAs, see source for details]

Metropolitan areas	Com- posite index (100%)	Grocery items (16%)	Housing (28%)	Utilities (8%)	Trans- por- tation (10%)	Health care (5%)	Misc. goods and services (33%)
Anniston, AL MSA . . . . .	94.1	100.9	87.1	99.7	92.1	86.9	97.0

Processed yarns and threads	112.6	110.8	107.8	108.4	112.8	114.7	114.0	112.7
Gray fabrics	117.2	120.6	118.6	116.8	121.2	121.4	121.9	121.6
Leather	177.5	163.7	168.6	179.6	191.4	177.9	182.7	178.5
Liquefied petroleum gas	77.4	65.8	63.6	58.2	65.1	84.7	84.5	60.1
Commercial electric power	115.3	124.4	127.2	128.8	131.7	131.6	131.7	130.5
Industrial electric power	119.6	129.6	130.6	129.2	130.8	131.6	130.8	130.0
Commercial natural gas (Dec. 1990=100)	(NA)	96.7	102.7	103.7	96.5	103.2	109.8	106.6
Industrial natural gas (Dec. 1990=100)	(NA)	94.2	101.6	99.5	90.9	98.9	109.3	104.2
Natural gas to electric utilities (Dec. 1990=100)	(NA)	98.8	93.5	90.2	87.7	90.4	96.9	80.5
Jet fuels	76.0	61.9	59.0	53.9	55.0	66.7	62.9	46.0
Residual fuel	57.1	45.9	49.6	48.2	52.6	59.8	59.5	43.8
Industrial chemicals	113.2	109.3	110.4	114.3	128.4	126.7	126.4	121.6
Prepared paint	124.8	131.6	133.2	135.3	142.1	147.2	152.1	155.0
Paint materials	136.3	131.1	131.5	132.1	139.4	141.3	141.5	143.8
Medicinal and botanical chemicals	102.2	111.3	120.7	125.4	128.3	128.6	133.4	135.0
Fats and oils, inedible	88.1	93.0	95.6	110.6	126.9	133.3	132.3	116.9
Mixed fertilizers	103.3	102.6	99.0	105.7	111.1	114.7	113.6	115.3
Nitrogenates	92.3	95.4	99.3	112.3	129.4	130.5	132.3	108.2
Phosphates	96.5	92.5	82.8	95.5	109.1	116.3	110.4	112.5
Other agricultural chemicals	119.9	129.2	134.7	140.8	144.3	146.1	147.8	149.7
Plastic resins and materials	124.1	116.4	117.1	122.4	143.5	133.1	137.3	125.6
Synthetic rubber	111.9	103.8	105.7	108.9	126.3	122.2	119.3	117.2
Plastic construction products	117.2	112.7	116.6	122.9	133.8	130.9	128.2	126.2
Unsupported plastic film, sheet, and shapes	119.0	120.3	121.4	122.8	135.6	132.7	131.7	128.1
Plastic parts and components for manufacturing	112.9	113.3	113.9	113.5	115.9	117.5	117.2	111.1
Softwood lumber	123.8	148.6	193.0	198.1	178.5	189.5	206.5	182.4
Hardwood lumber	131.0	140.7	163.3	168.3	167.0	163.9	174.1	178.7
Millwork	130.4	143.3	156.6	162.4	163.8	166.6	170.9	171.1
Plywood	114.2	133.3	152.8	158.6	165.3	156.4	159.3	157.6
Woodpile	151.3	118.9	104.2	115.9	183.2	133.1	128.6	122.0
Paper	128.8	123.2	123.8	126.0	159.0	149.4	143.9	146.0
Paperboard	135.7	134.3	130.0	140.5	183.1	155.1	144.4	151.7
Paper boxes and containers	129.9	130.6	129.9	136.1	163.8	153.9	144.7	154.7
Building paper and board	112.2	119.6	132.7	144.1	144.9	137.2	129.6	132.8

See footnote at end of table.

# No. 782. Producer Price Indexes, by Stage of Processing: 1990 to 1998—Continued

[1982=100, except as indicated]

Stage of processing	1990	1992	1993	1994	1995	1996	1997	1998
<b>Intermediate materials less foods and feeds—Continued</b>								
Commercial printing (June 1982=100) . . . . .	128.0	131.1	134.8	136.5	144.5	148.3	148.7	152.1
Foundry and forge shop products . . . . .	117.2	120.1	121.3	123.9	129.3	132.6	134.1	135.0
Steel mill products . . . . .	112.1	106.4	108.2	113.4	120.1	115.6	116.4	113.9
Primary nonferrous metals . . . . .	133.4	108.1	98.1	115.7	146.8	126.2	126.2	106.7
Aluminum mill shapes . . . . .	127.9	121.9	120.4	127.7	160.4	144.8	147.5	142.1
Copper and brass mill shapes . . . . .	174.6	166.0	150.7	167.3	195.2	179.0	177.3	153.4
Nonferrous wire and cable . . . . .	142.6	136.7	133.1	139.8	151.5	147.5	148.1	140.9
Metal containers . . . . .	114.0	113.9	109.7	108.1	117.2	110.0	108.1	108.7
Hardware . . . . .	125.9	132.7	135.2	137.5	141.1	143.8	145.6	147.0
Plumbing fixtures and brass fittings . . . . .	144.3	153.1	155.9	159.6	166.0	171.1	174.5	175.1
Heating equipment . . . . .	131.6	137.3	140.4	142.5	147.5	151.2	152.4	153.2
Fabricated structural metal products . . . . .	121.8	122.1	123.2	127.3	135.1	137.8	140.3	142.5
Fabricated ferrous wire products (June 1982=100) . . . . .	114.6	117.5	119.3	122.6	125.7	126.8	128.0	130.1
Other miscellaneous metal products . . . . .	120.7	121.1	121.4	122.7	124.9	125.7	126.2	126.2
Mechanical power transmission equipment . . . . .	125.3	132.1	136.2	140.5	146.9	151.5	154.8	157.7
Air conditioning and refrigeration equipment . . . . .	122.1	125.4	126.0	127.0	130.2	132.7	132.6	134.6
Metal valves, excluding fluid power (Dec. 1982=100) . . . . .	125.3	133.7	137.2	140.3	145.3	149.8	153.3	156.6
Ball and roller bearings . . . . .	130.6	139.0	141.9	145.7	152.0	157.8	162.9	165.2
Wiring devices . . . . .	132.2	134.8	138.6	141.5	147.2	151.2	154.0	154.2
Motors, generators, motor generator sets . . . . .	132.9	136.6	138.6	140.2	143.9	145.6	144.7	145.8
Switchgear and switchboard equipment . . . . .	124.4	131.5	134.6	136.8	140.3	142.6	145.6	148.3
Electronic components and accessories . . . . .	118.4	117.5	117.7	116.6	113.6	108.9	104.0	100.1
Internal combustion engines . . . . .	120.2	128.4	130.2	132.9	135.6	138.8	140.1	140.7
Machine shop products . . . . .	124.3	126.8	128.0	129.7	131.3	133.6	135.2	136.3
Flat glass . . . . .	107.5	106.5	107.3	110.5	113.2	110.0	108.4	107.2
Cement . . . . .	103.7	106.3	111.7	119.5	128.1	134.0	139.4	145.7
Concrete products . . . . .	113.5	117.2	120.2	124.6	129.4	133.2	136.0	140.1
Asphalt felts and coatings . . . . .	97.1	96.2	96.8	95.3	100.0	100.0	99.9	99.6
Gypsum products . . . . .	105.2	99.9	108.3	136.1	154.5	154.0	170.8	177.2
Glass containers . . . . .	120.4	125.1	125.8	127.5	130.5	129.1	125.7	125.9
Motor vehicle parts . . . . .	111.2	113.1	113.8	114.3	116.0	116.2	115.4	114.6
Aircraft engines and engine parts (Dec. 1985=100) . . . . .	113.5	125.0	127.7	130.7	132.8	134.7	135.7	136.9
Aircraft parts and auxiliary equipment, n.e.c. (June 1985=100) . . . . .	117.7	128.0	131.2	134.0	135.7	139.3	141.3	142.6
Photographic supplies . . . . .	127.6	125.6	124.3	124.7	126.8	129.8	130.0	128.9
Medical/surgical/personal aid devices . . . . .	127.3	133.9	137.8	140.4	141.3	143.1	143.1	143.3
Crude materials for further processing . . . . .	108.9	100.4	102.4	101.8	102.7	113.8	111.1	96.7
Crude foodstuffs and feedstuffs . . . . .	113.1	105.1	108.4	106.5	105.8	121.5	112.2	103.8
Wheat . . . . .	87.6	98.5	98.4	104.8	118.6	136.6	108.2	87.8
Corn . . . . .	100.9	96.0	92.9	100.1	109.0	158.5	110.1	91.7
Slaughter cattle . . . . .	122.5	115.4	116.7	105.8	99.5	95.8	97.9	92.5
Slaughter hogs . . . . .	94.1	70.7	76.1	65.9	70.2	88.6	87.0	52.2
Slaughter broilers/fryers . . . . .	119.5	115.2	125.9	127.7	129.1	148.0	137.2	151.8
Slaughter turkeys . . . . .	116.9	106.6	113.1	119.6	120.3	121.5	112.9	110.4
Fluid milk . . . . .	100.8	96.1	94.1	95.7	93.6	107.9	97.5	112.6
Soybeans . . . . .	100.8	97.3	104.8	106.0	102.2	127.9	131.0	103.4
Cane sugar, raw . . . . .	119.2	112.1	113.2	115.2	119.7	118.6	116.8	117.2
Crude nonfood materials . . . . .	101.5	93.5	94.7	94.8	96.8	104.5	106.4	88.3
Raw cotton . . . . .	118.2	89.8	91.9	121.3	156.2	130.0	116.5	111.0
Leaf tobacco . . . . .	95.8	101.0	100.3	100.2	102.5	105.1	(NA)	104.6
Cattle hides . . . . .	217.8	171.4	180.2	200.9	209.9	186.5	196.1	153.3
Coal . . . . .	97.5	95.0	96.1	96.7	95.0	94.5	96.3	93.1
Natural gas . . . . .	80.4	80.6	84.7	78.8	66.6	91.2	101.7	83.7
Crude petroleum . . . . .	71.0	58.0	51.4	47.1	51.1	62.2	57.5	35.7
Logs and timber . . . . .	142.8	164.8	212.3	219.1	220.4	206.8	214.4	208.2
Wastepaper . . . . .	138.9	117.5	117.4	209.5	371.1	141.6	163.3	146.0
Iron ore . . . . .	83.3	83.7	82.7	82.7	91.8	96.7	96.3	95.5
Iron and steel scrap . . . . .	166.0	139.2	172.5	192.9	202.7	191.1	188.9	164.9
Nonferrous metal ores (Dec. 1983=100) . . . . .	98.3	75.4	67.2	81.4	101.6	90.2	82.2	66.9
Copper base scrap . . . . .	181.3	162.9	136.1	155.5	193.5	166.3	157.7	116.3
Aluminum base scrap . . . . .	172.6	137.6	129.2	172.9	209.4	173.4	195.1	162.8
Construction sand, gravel, and crushed stone . . . . .	125.4	130.6	134.0	137.9	142.3	145.6	148.2	152.7

# No. 783. Producer Price Indexes for the Net Output of Selected Industries: 1990 to 1998

[Indexes are based on selling prices reported by establishments of all sizes by probability sampling. Manufacturing industries selected by shipment value. N.e.c.= not elsewhere classified. See text, Section 27, Domestic Trade]

Industry	SIC code <sup>1</sup>	Index base	1990	1995	1996	1997	1998
Iron ores . . . . .	1011	12/84	82.2	91.0	95.7	95.3	94.5
Copper ores . . . . .	1021	06/88	112.8	157.1	117.0	110.4	78.0
Lead and zinc ores . . . . .	1031	12/85	(X)	103.1	109.4	138.6	107.2
Gold ores . . . . .	1041	06/85	113.8	115.9	117.0	100.9	90.0
Metal mining services . . . . .	1081	12/85	108.6	111.4	112.5	116.8	122.2
Metal ores, n.e.c. . . . .	1099	12/85	137.9	119.3	110.5	100.8	90.3
Bituminous coal and lignite . . . . .	1211	12/81	100.5	95.3	95.0	95.9	92.7
Anthracite mining . . . . .	1231	12/79	157.8	158.9	158.6	159.0	160.1

## No. 791. Import Price Indexes—Selected Commodities: 1990 to 1998

[1995=100. Indexes are weighted by the 1990 Tariff Schedule of the United States Annotated, a scheme for describing and reporting product composition and value of U.S. imports. Import prices are based on U.S. dollar prices paid by importer. F.o.b. = Free on board; c.i.f. = Cost, insurance, and freight; n.e.s. = Not elsewhere specified]

## No. 792. Export Price Indexes—Selected Commodities: 1990 to 1998

[1990=100. Indexes are weighted by 1980 export values according to the Schedule B classification system of the U.S. Census Bureau. Prices used in these indexes were collected from a sample of U.S. manufacturers of exports and are factory transaction prices, except as noted. F.a.s. = free alongside ship. N.e.s. = not elsewhere specified. F.o.b. = free on board]

## Banking, Finance, and Insurance

This section presents data on the Nation's finances, various types of financial institutions, money and credit, securities, and insurance. The primary sources of these data are publications of several departments of the Federal Government, especially the Treasury Department, and independent agencies such as the Federal Deposit Insurance Corporation, the Federal Reserve System, and the Securities and Exchange Commission. National data on insurance are available primarily from private organizations, such as the American Council of Life Insurance.

**Flow of funds**—The flow of funds accounts of the Federal Reserve System (see Tables 797 to 800) bring together statistics on all of the major forms of financial instruments to present an economy-wide view of asset and liability relationships. In flow form, the accounts relate borrowing and lending to one another and to the nonfinancial activities that generate income and production. Each claim outstanding is included simultaneously as an asset of the lender and as a liability of the debtor. The accounts also indicate the balance between asset totals and liability totals over the economy as a whole. Several publications of the Board of Governors of the Federal Reserve System contain information on the flow of funds accounts: Summary data on flows and outstandings, in the *Federal Reserve Bulletin*, *Flow of Funds Accounts of the United States* (quarterly), and *Annual Statistical Digest*; and concepts and organization of the accounts, in *Guide to the Flow of Funds Accounts* (1993). Data are also available at the Board's web site <<http://www.federalreserve.gov/releases>>.

**Banking system**—Banks in this country are organized under the laws of both the states and the Federal Government and are regulated by several bank supervisory agencies. National banks are supervised by the Comptroller of the Currency. *Reports of*

*Condition* have been collected from national banks since 1863. Summaries of these reports are published in the Comptroller's *Annual Report*, which also presents data on the structure of the national banking system.

The Federal Reserve System was established in 1913 to exercise central banking functions, some of which are shared with the U.S. Treasury. It includes national banks and such state banks that voluntarily join the system. Statements of state bank members are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the system. Balance sheet data for member banks and other commercial banks are published quarterly in the *Federal Reserve Bulletin*. The Federal Deposit Insurance Corporation (FDIC), established in 1933, insures each depositor up to \$100,000. Major item balance sheet and income data for all commercial banks are published in the *FDIC Quarterly Banking Profile*. This publication is also available on the Internet at the following address: <<http://www.fdic.gov>>. Balance sheet and income data for individual institutions are also available at this site in the Institution Directory (ID) system.

The FDIC is the primary Federal regulator of state-chartered banks that are not members of the Federal Reserve System and of most savings banks insured by the Bank Insurance Fund (BIF). The agency also has certain backup supervisory authority, for safety and soundness purposes, over state-chartered banks that are members of the Federal Reserve System, national banks, and savings associations.

**Savings institutions**—Savings institutions are primarily involved in credit extension in the form of mortgage loans. Statistics on savings institutions are collected by

the U.S. Office of Thrift Supervision and the FDIC. The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) authorized the establishment of the Resolution Trust Corporation (RTC) which was responsible for the disposal of assets from failed savings institutions. FIRREA gave the FDIC the job of managing the Federal deposit insurance fund for savings institutions (SAIF=Savings Association Insurance Fund). Major balance sheet and income data for all insured savings institutions are published in the *FDIC Quarterly Banking Profile*.

**Credit unions**—Federally chartered credit unions are under the supervision of the National Credit Union Administration. State-chartered credit unions are supervised by the respective state supervisory authorities. The Administration publishes comprehensive program and statistical information on all Federal and federally insured state credit unions in the *Annual Report of the National Credit Union Administration*. Deposit insurance (up to \$100,000 per account) is provided to members of all Federal and those state credit unions that are federally-insured by the National Credit Union Share Insurance Fund which was established in 1970. Deposit insurance for state chartered credit unions is also available in some states under private or state-administered insurance programs.

**Other credit agencies**—Insurance companies, finance companies dealing primarily in installment sales financing, and personal loan companies represent important sources of funds for the credit market. Statistics on loans, investments, cash, etc., of life insurance companies are published principally by the American Council of Life Insurance in its *Life Insurance Fact Book* and in the *Federal Reserve Bulletin*. Consumer credit data are published currently in the *Federal Reserve Bulletin*.

Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions.

Data on operations of government credit agencies, along with other government corporations, are available in reports of individual agencies; data on their debt outstanding are published in the *Federal Reserve Bulletin*.

**Currency**—Currency, including coin and paper money, represents about 42 percent of all media of exchange in the United States, with most payments made by check. All currency is now issued by the Federal Reserve Banks.

**Securities**—The Securities and Exchange Commission (SEC) was established in 1934 to protect the interests of the public and investors against malpractices in the securities and financial markets and to provide the fullest possible disclosure of information regarding securities to the investing public. Statistical data are published in the *SEC Annual Report*.

**Insurance**—Insuring companies, which are regulated by the various states or the District of Columbia, are classified as either life or property. Companies that underwrite accident and health insurance only and those that underwrite accident and health insurance in addition to one or more property lines are included with property insurance. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital or surplus.

There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Organizations representing certain classes of insurers publish reports for these classes. Among them are the annual commercial publishers, such as The National Underwriter Company whose *Argus Chart* (annual) contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. The American Council of Life Insurance publishes statistics on life insurance purchases, ownership, benefit payments, and assets in its *Life Insurance Fact Book*.

## No. 794. Gross Domestic Product in Finance, Insurance, and Real Estate, in Current and Real (1992) Dollars: 1990 to 1996

[In billions of dollars, except percent (1,024.1 represents \$1,024,100,000,000). For definition of gross domestic product, see text, Section 14, Income. Based on 1987 Standard Industrial Classification; see text, Section 17, Business]

## No. 808. Retail Fees and Services of Banks: 1996 and 1997

[In dollars, except as noted. Data for 1996 as of November or December; 1997 data as of June. For most services, fees are reported in terms of (1) the proportion of those banks offering a service that charge for the service and (2) the average fee charged by the institutions that charge for the service. Based on a random sample of depository institutions belonging to the Bank Insurance Fund, whose members are predominantly commercial banks]

Type of account or service	1996	1997	Type of account or service	1996	1997
<b>NONINTEREST CHECKING ACCOUNT</b>			<b>AUTOMATED TELLER MACHINES (ATMs)</b>		
Percent offering . . . . .	97.8	98.7	Percent offering . . . . .	72.9	79.4
Single-balance, single-fee account: <sup>1</sup>			Annual fee:		
Percent offering . . . . .	32.9	39.3	Percent charging . . . . .	13.4	16.7
Monthly fee (low balance) . . . . .	6.34	6.09	Average . . . . .	7.94	11.51
Minimum balance to avoid fee . . . . .	480	479	Fees for customer transactions on us: <sup>4</sup>		
Minimum balance to open . . . . .	123	124	Withdrawals:		
Fee-only account: <sup>2</sup>			Percent charging . . . . .	6.8	7.4
Percent offering . . . . .	34.2	33.3	Average . . . . .	0.59	0.65
Monthly fee (low balance) . . . . .	5.02	4.49	Balance inquiries:		
Check charge:			Percent charging . . . . .	4.4	6.7
Percent charging . . . . .	45.8	32.4	Average . . . . .	0.70	0.65
Average . . . . .	0.34	0.38	Fees for customer transactions on others: <sup>4</sup>		
Minimum balance to open . . . . .	82	61	Withdrawals:		
<b>NOW ACCOUNTS <sup>3</sup></b>			Percent charging . . . . .	79.8	67.0
Percent offering . . . . .	97.3	97.6	Average . . . . .	1.10	1.06
Single-fee account: <sup>1</sup>			Balance inquiries:		
Percent offering . . . . .	44.0	56.7	Percent charging . . . . .	64.7	55.2
Monthly fee (low balance) . . . . .	8.11	7.81	Average . . . . .	1.03	0.99
Minimum balance to avoid fee . . . . .	1,079	1,052	Surcharge: <sup>5</sup>		
Minimum balance to open . . . . .	654	663	Percent charging . . . . .	44.8	60.1
			Average . . . . .	1.19	1.14

<sup>1</sup> A monthly fee for balances below the minimum, no monthly fee for balances above the minimum, and no other charges.  
<sup>2</sup> A monthly fee, no minimum balance to eliminate the fee, and a charge per check in some cases. <sup>3</sup> NOW (negotiable order of withdrawal) accounts are checking accounts that pay interest and often have fee structures that differ from those of noninterest checking accounts. <sup>4</sup> An institution's "customer" is one who has an account at the institution. A customer's ATM transactions in which the machine used is that of the customer's institution are called "on us"; a customer's transactions in which the machine used is that of another institution are called "on others". <sup>5</sup> An ATM surcharge is a fee imposed by the ATMs institution, typically on every transaction by the machine's noncustomer users.

No. 814. Foreign Lending by U.S. Banks, by Type of Borrower and Country: 1998

[In millions of dollars (367,397 represents \$367,397,000,000). As of December. Covers 108 U.S. banking organizations which do nearly all of the foreign lending in the country. Data represent claims on foreign residents and institutions held at all domestic and foreign offices of covered banks. Data cover only cross-border and nonlocal currency lending. These result from a U.S. bank's office in one country lending to residents of another country or lending in a currency other than that of the borrower's country. Excludes local currency loans and other claims and local currency liabilities held by banks' foreign offices on residents of the country in which the office was located (e.g. Deutsche mark loans to German residents booked at the German branch of the reporting U.S. bank). Criteria for country selection is \$4.5 billion or more]

1997	6,981	4,257	16	43,491	27,921	215,104	136,074	140,104	92,117	187,822	119,359
1998	6,814	4,181	14	43,865	29,674	231,904	156,787	144,849	100,890	202,651	137,347

<sup>1</sup> Through 1994 for year ending September 30; 1995 reflects 15-month period from October 1994 through December 1995; beginning 1996 reflects calendar year. A failed institution is defined as a credit union which has ceased operation because it was involuntarily liquidated or merged with assistance from the National Credit Union Share Insurance Fund. Assisted mergers were not identified until 1981.

**No. 821. Estimated Home Equity Debt Outstanding, by Type and Source of Credit: 1990 to 1998**

[In billions of dollars (258 represents \$258,000,000,000). A "traditional home equity loan" is a closed-end loan extended for a specific period that generally requires repayment of interest and principal in equal monthly installments. Such a loan typically has a fixed interest rate. A "home equity line of credit" is a revolving account that permits borrowing from time to time, at the homeowner's discretion, up to the amount of the credit line. It usually has a more flexible repayment schedule and a variable interest rate. Based on reports from lending institutions and data from the Survey of Consumers, a sample survey of households]

Year	Home equity lines of credit				Traditional home equity loans		
	Total	All lenders	Commercial banks	Other sources	All lenders	Commercial banks	Other sources
1990	258	105	61	44	153	54	99
1992	258	114	73	41	144	50	94
1993	261	110	73	37	151	49	102
1994	274	116	76	40	158	54	104
1995	299	123	79	44	176	61	115

# No. 838. Foreign Purchases and Sales of U.S. Securities, by Type of Security, 1980 to 1998, and by Selected Country, 1998

[In billions of dollars (15.8 represents \$15,800,000,000). Covers transactions in all types of long-term domestic securities by foreigners as reported by banks, brokers, and other entities in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series). Data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. Includes transactions executed in the United States for the account of foreigners and transactions executed abroad for the account of reporting institutions and their domestic customers. Data by country show the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The term "foreigner" covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and businesses; the central governments, central banks, and other official institutions of foreign countries; and international and regional organizations. "Foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners. Minus sign (-) indicates net sales by foreigners or a net outflow of capital from the United States]

No. 850. Mutual Fund Retirement Assets: 1990 to 1997

[In billions of dollars, except percent (230 represents \$230,000,000,000). Based on data from the Institute's Annual Questionnaire for Retirement Statistics. The 1997 survey gathered data from 7,088 mutual fund share classes representing 82 percent of mutual fund industry assets. Assets were estimated for all non-respondent funds to produce total industry retirement plan assets. Reporting funds were grouped by investment objective and ratios were calculated of the reported retirement assets to the total net assets for each type of retirement plan. These ratios were used to estimate data for non-respondents. A similar survey was conducted of brokers to ascertain the amount of retirement assets held in street name and omnibus accounts. The results of the broker survey and the mutual fund survey were combined to produce total mutual fund retirement assets]

Type of account	1990	1991	1992	1993	1994	1995	1996	1997
Mutual fund retirement assets . . . . .	230	358	485	649	738	1,000	1,250	1,596

Defined benefit plans . . . . .	7	11	16	22	26	27	34	39
Percent of all mutual funds:								
Mutual fund retirement assets . . . . .	22	26	29	31	34	35	35	36
Individual retirement accounts (IRAs) . . . . .	14	14	15	17	17	18	18	18
Employer-sponsored retirement plans . . . . .	8	12	14	15	17	17	17	17

<sup>1</sup> Defined-contribution plans other than 401(k) plans include profit-sharing, stock bonus, and money-purchase plans without 401(k) features as well as 403(b), 457, and Keogh plans. The source no longer collects separate assets data for Keogh plan holdings of mutual funds, and these assets are now included in other defined-contribution plan assets. <sup>2</sup> See headnote, Table 624. <sup>3</sup> Section 403(b) of the Internal Revenue Code permits employees of certain charitable organizations, nonprofit hospitals, universities, and public schools to establish tax-sheltered retirement programs. These plans may invest in either annuity contracts or mutual fund shares. <sup>4</sup> These plans are deferred compensation arrangements for government employees and employees of certain tax-exempt organizations.

## Business Enterprise

This section relates to the place and behavior of the business firm and to business initiative in the American economy. It includes data on the number, type, and size of businesses; financial data of domestic and multinational U.S. corporations; business investments, expenditures, and profits; sales and inventories; and business failures.

The principal sources of these data are the *Survey of Current Business*, published by the Bureau of Economic Analysis (BEA), the *Federal Reserve Bulletin*, issued by the Board of Governors of the Federal Reserve System, the annual *Statistics of Income* (SOI) reports of the Internal Revenue Service (IRS), *The Business Failure Record* issued by the Dun & Bradstreet Corporation, Murray Hill, NJ.; and the *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations* (QFR).

**Business firms**—A firm is generally defined as a business organization under a single management and may include one or more establishments. The terms firm, business, company, and enterprise are used interchangeably throughout this section. A firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. The industrial classification is based on the Standard Industrial Classification (SIC) Manual.

The IRS concept of a business firm relates primarily to the legal entity used for tax reporting purposes. A **sole proprietorship** is an unincorporated business owned by one person including large enterprises with many employees and hired managers and part-time operations in which the owner is the only person involved. A **partnership** is an unincorporated business owned by two or more persons, each of whom has a financial interest in the business. A **corporation** is

a business that is legally incorporated under state laws. While many corporations file consolidated tax returns, most corporate tax returns represent individual corporations, some of which are affiliated through common ownership or control with other corporations filing separate returns.

**Economic censuses**—The economic censuses constitute comprehensive and periodic canvasses of the Nation's industrial and business activities. The first economic census of the United States was conducted as part of the 1810 decennial census, when inquiries on manufacturing were included with the census of population. Minerals data were collected in 1840. The first censuses of construction and business were taken for 1929. An integrated economic census program was begun for 1954. In that year, the censuses covered the retail and wholesale trades, selected service industries, manufactures, and mineral industries. In 1992, coverage was expanded to 95 percent of the private U.S. economy. The economic censuses are taken at 5-year intervals covering years ending in "2" and "7." Special surveys are conducted every 5 years as part of the economic censuses to determine the extent of business ownership by specific minority groups and women.

**Industrial groups**—Establishments are classified into industries on the basis of their principal product or activity in accordance with the 1987 *Standard Industrial Classification (SIC) Manual*, Office of Management and Budget. The SIC is a classification structure for the entire national economy. The structure provides data on a division and industry code basis, according to the level of industrial detail. For example, manufacturing is a major industrial division; food and kindred products (Code 20) is one of its major groups. One of the

ways this group is further divided is into meat products (Code 201) and meat packing plants (Code 2011).

**Changes in industry presentation**—The country detail in this presentation is identical to that in the 1989 benchmark survey and in the intervening annual surveys. However, three changes have affected the industry detail. First, beginning with the publication of the preliminary 1994 benchmark survey results, the data for nonbank U.S. parents and foreign affiliates exclude savings institutions and credit unions. The change in coverage reflects the reclassification of savings institutions and credit unions from the “finance, except banking” industry (which is covered by the nonbank data) to the industry “depository institutions” (which will replace the industry “banking” in the publication of the final 1994 benchmark results). This change will not materially affect the comparisons of the data for 1993 with the data for 1994, because in 1993, only one U.S. parent and no foreign affiliates were classified as a savings institution or credit union.

Second, beginning with the preliminary 1994 benchmark survey results, the “communication and public utilities” group was disaggregated and the “metal mining” and “nonmetallic minerals mining” groups were aggregated in the industry table stub. Third, beginning with the revised 1993 annual estimates, the names of two industry groups were changed; the group “machinery, except electrical” is now called “industrial machinery and equipment,” and the group “electric and electronic equipment” is now called “electronic and other electric equipment.”

**North American Industry Classification System (NAICS)**—The United States has a new industry classification system! On April 9, 1997, the Office of Management and Budget (OMB) announced its decision to adopt the North American Industry Classification System (NAICS pronounced Nakes) as the industry classification system used by the statistical agencies of the United States. NAICS replaces the

1987 Standard Industrial Classification (SIC).

NAICS is based on a consistent, economic concept. Establishments that use the same or similar processes to produce goods or services are grouped together. The SIC, developed in the 1930s and revised periodically over the past 50 years, was not based on a consistent economic concept. Some industries are demand based while others are production based.

NAICS recognizes the changing and growing services-based economy of the United States and its North American neighbors. NAICS includes 1,170 industries of which 565 are service-based industries. The SIC had 1,004 industries of which 416 were service-related industries. Three hundred and fifty eight new industries are recognized in NAICS, 250 of which are services producing industries. There are 20 sectors in NAICS of which 16 are services related. The SIC had 10 divisions of which 5 were service related.

NAICS provides for comparable statistics among the North American countries. In addition, it provides for more comparable information with the Internal Standard Industrial Classification of All Economic Activities (ISIC). The SIC did not.

NAICS is a six-digit system that provides for comparability among the three countries at the five-digit level, albeit with a few exceptions. The SIC was a four-digit system that was not linked in any way to the systems of Canada and Mexico. A six-digit system was adopted for NAICS to provide for increased flexibility in the system. NAICS allows each country to recognize activities that are important in the respective countries, but may not be large enough or important enough to recognize in all three countries. The sixth digit is reserved for this purpose.

The nomenclature of the groupings within the system is different in NAICS. NAICS calls the highest level of aggregation in the system a sector; the SIC referred to this grouping as a division.

**No. 861. Number of Returns and Business Receipts, by Type of Business Size of Receipts: 1980 to 1996**

[2,711 represents 2,711,000. Covers active enterprises only. Figures are estimates based on sample of unaudited tax returns; see Appendix III. The industrial distribution is based on data collected from companies; see text, this section]

<sup>1</sup> Excludes investment income except for partnerships and corporations in finance, insurance, and real estate. Starting 1990, investment income no longer included for S corporations. S corporations are certain small companies with 35 shareholders (15 in 1980), mostly individuals, electing to be taxed through shareholders. <sup>2</sup> Includes firms with no receipts. <sup>3</sup> Number of businesses for 1980. Number of nonfarm sole proprietorship returns is not available by size prior to 1981. However, the number of returns and the number of businesses are very closely related. The ratio of number of returns to the number of businesses is approximately 1 to 1.3.

Services . . . . .	8,234	297	1,557	287	249	1,409	102	44	44

<sup>1</sup> Z Less than \$500 million. <sup>2</sup> In 1980, represents individually owned businesses, including farms; thereafter, represents only nonfarm proprietors, i.e., business owners. <sup>3</sup> Excludes investment income except for partnerships and corporations in finance, insurance, and real estate. Starting 1985, investment income no longer included for S corporations. <sup>4</sup> Net income (less loss) is defined differently by form of organization, basically as follows: (a) Proprietorships: Total taxable receipts less total business deductions, including cost of sales and operations, depletion, and certain capital expensing, excluding charitable contributions and owners' salaries; (b) Partnerships: Total taxable receipts (including investment income except capital gains) less deductions, including cost of sales and operations and certain payments to partners, excluding charitable contributions, oil and gas depletion, and certain capital expensing; (c) Corporations: Total taxable receipts (including investment income, capital gains, and income from foreign subsidiaries deemed received for tax purposes, except for S corporations beginning 1985) less business deductions, including cost of sales and operations, depletion, certain capital expensing, and officers' compensation excluding S corporation charitable contributions and investment expenses starting 1985; net income is before income tax. <sup>5</sup> Includes businesses not allocable to individual industries. <sup>6</sup> Represents agricultural services only. <sup>7</sup> Includes trade business not identified as wholesale or retail.

**No. 879. Employer Firm Births and Deaths by Employment Size of Firms: 1989-95**

[Longitudinal data for establishments active (payroll) in first quarter of the year (establishments with 0 employment in the first quarter were excluded). New firm births are classified by their employment size at the first quarter. Represents private establishments excluding railroad, domestic and farms. The number of continuing firms was calculated from static and longitudinal data. Existing firms with ownership changes are considered continuing firms]

No. 891. Mergers and Acquisitions—Summary: 1985 to 1998

[Covers transactions valued at \$5 million or more. Values based on transactions for which price data revealed. **All activity** includes mergers, acquisitions, acquisitions of partial interest that involve a 40% stake in the target or an investment of at least \$100 million, divestitures, and leveraged transactions that result in a change in ownership. **Divestiture**: sale of a business, division, or subsidiary by corporate owner to another party. **Leveraged buyout**: acquisition of a business in which buyers use mostly borrowed money to finance purchase price and incorporate debt into capital structure of business after change in ownership]

## No. 898. Fixed Nonresidential Private Capital: 1980 to 1997

[In billions of dollars (3,641 represents \$3,641,000,000,000) except as indicated. End-of-year stocks; depreciation over entire calendar year. Data refer to privately owned assets and are based on the fixed capital formation components of the gross domestic product. Excludes residential capital and government enterprises; includes nonprofit institutions. Net stock and depreciation estimates are usually based on geometric depreciation rates]

## No. 902. Business Cycle Expansions and Contractions—Months of Duration: 1919 to 1997

[A trough is the low point of a business cycle; a peak is the high point. Contraction or recession is the period from peak to subsequent trough; expansion is the period from trough to subsequent peak. Business cycle reference dates are determined by the National Bureau of Economic Research, Inc.]

Business cycle reference date				Contraction (trough from previous peak)	Expansion (trough to peak)	Length of cycle	
Trough		Peak				Trough from previous trough	Peak from previous peak
Month	Year	Month	Year				
March	1919	January	1920	17	10	251	17
July	1921	May	1923	18	22	28	40
July	1924	October	1926	14	27	36	41
November	1927	August	1929	13	21	40	34
March	1933	May	1937	43	50	64	93
June	1938	February	1945	13	80	63	93
October	1945	November	1948	8	37	88	45
October	1949	July	1953	11	45	48	56
May	1954	August	1957	10	39	55	49
April	1958	April	1960	8	24	47	32
February	1961	December	1969	10	106	34	116
November	1970	November	1973	11	36	117	47
March	1975	January	1980	16	58	52	74
July	1980	July	1981	6	12	64	18
November	1982	July	1990	16	92	28	108
March	1991	(X)	(X)	8	(X)	100	(X)
Average, all cycles:							
1854 to 1991 (31 cycles)				18	35	53	353
1854 to 1919 (16 cycles)				22	27	48	449
1919 to 1945 (six cycles)				18	35	53	53
1945 to 1991 (nine cycles)				11	50	61	61
Average, peacetime cycles:							
1854 to 1991 (26 cycles)				19	29	48	548
1854 to 1919 (14 cycles)				22	24	46	647
1919 to 1945 (5 cycles)				20	26	46	45
1945 to 1991 (7 cycles)				11	43	53	53

X Not applicable. <sup>1</sup> Previous peak: August 1918. <sup>2</sup> Previous trough: December 1914. <sup>3</sup> 30 cycles. <sup>4</sup> 15 cycles. <sup>5</sup> 25 cycles. <sup>6</sup> 13 cycles.

X Not applicable. <sup>1</sup> In the old series, "income taxes" refers to Federal income taxes only, as state and local income taxes had already been deducted. In the new series, no income taxes have been deducted. <sup>2</sup> Annual data are average equity for the year (using four end-of-quarter figures). <sup>3</sup> Beginning 1988, profits before and after income taxes reflect inclusion of minority stockholders' interest in net income before and after income taxes. <sup>4</sup> Data for 1992 (most significantly 1992:I) reflect the early adoption of Financial Accounting Standards Board Statement 106 (Employer's Accounting for Post-Retirement Benefits Other Than Pensions) by a large number of companies during the fourth quarter of 1992. Data for 1993: I also reflect adoption of Statement 106. Corporations must show the cumulative effect of a change in accounting principle in the first quarter of the year in which the change is adopted.

## No. 913. U.S. Multinational Companies—Gross Product: 1995 and 1996

[In millions of dollars (1,831,046 represents \$1,831,046,000,000). Gross product measures value added by a firm. Consists of nonbank U.S. parent companies and their nonbank foreign affiliates. A U.S. parent comprises the domestic operations of a multinational and is a U.S. person that owns or controls 10 percent or more of the voting securities, or the equivalent, of a foreign business enterprise. A U.S. person can be an incorporated business enterprise. A majority-owned foreign affiliate is a foreign business enterprise in which a U.S. parent company owns or controls 50 percent or more of the voting securities]

## Communications and Information Technology

---

This section presents statistics on the various communications media: telephone, telegraph, radio, television, newspapers, and periodicals and the usage, finances, and operations of the Postal Service. Expenditure data for advertising in the media are also included.

**Communication media**—The U.S. Census Bureau's *Annual Survey of Communication Services* (ASCS) covers all employer firms with one or more establishments that are primarily engaged in providing point-to-point communication services, whether by wire or radio, and whether intended to be received aurally or visually. This includes telephone communications, including cellular and other radiotelephone services; telegraph and other message communications, such as electronic mail services, facsimile transmission services, telex services, etc.; radio and television broadcasting stations and networks; cable and other pay television services; and other communication services, such as radar station operations, satellite earth stations, satellite or missile tracking stations, etc. The report presents statistics that are summarized by kind-of-business classification based on the 1987 edition of the *Standard Industrial Classification Manual*. See text, Section 17, Business.

The Federal Communications Commission (FCC), established in 1934, regulates wire and radio communications. Only the largest carriers and holding companies file annual or monthly financial reports. The FCC has jurisdiction over interstate and foreign communication services but not over intrastate or local services. The gross operating revenues of the telephone carriers reporting annually to the FCC, however, are estimated to cover about 90 percent of the revenues of all U.S. telephone companies. Data are not

comparable with Census Bureau *Annual Survey of Communication Services* because of coverage (ASCS includes all domestic long-distance telephone companies, all local exchange carriers, and all cellular telephone companies) and different accounting practices for those telephone companies which report to the FCC.

Reports filed by the broadcasting industry cover all radio and television stations operating in the United States. The private radio services represent the largest and most diverse group of licensees regulated by the FCC. These services provide voice, data communications, point-to-point, and point-to-multipoint radio communications for fixed and mobile communicators. Major users of these services are small businesses, the aviation industry, the maritime trades, the land transportation industry, manufacturing industry, state and local public safety and governmental authorities, emergency medical service providers, amateur radio operators, and personal radio operations (CB and the General Mobile Radio Service). The FCC also licenses entities as private and common carriers. Private and common carriers provide fixed and land mobile communications service on a for-profit basis. Principal sources of wire, radio, and television data are the FCC's *Annual Report* and its annual *Statistics of Communications Common Carriers*.

Statistics on the printed media are available from the Census Bureau, as well as from various private agencies. The censuses of manufactures (conducted by the Census Bureau every 5 years, for the years ending in "2" and "7") provide statistics on the number and circulation of newspapers and periodicals and on sales of books and pamphlets. Editor & Publisher Co., New York, NY, presents annual data on the

number and circulation of daily and Sunday newspapers in its *International Year Book*. Monthly data on new books and new editions appear in *Publishers Weekly*, issued by R. R. Bowker Company, New York. (See Table 938 for annual data.)

**Advertising**—Data on advertising expenditures are compiled primarily by McCann-Erickson, Inc., which compiles certain of the data shown (see Table 947). Monthly index figures of advertising in certain media are also published periodically by McCann-Erickson in *Advertising Age*.

The Broadcast Advertisers Reports distinguishes between spot and local advertising primarily on the basis of the type of advertiser to whom the time is sold, rather than how and by whom it is sold. In general, time purchased on behalf of retail or service establishments in the market is considered local, even though the establishments may be part of a national or regional chain. That is, spot advertising promotes a product, while local advertising promotes a given establishment. Network advertising, mutually exclusive of spot and local, is broadcast through the network system.

**Postal Service**—The Postal Service provides mail processing and delivery

services within the United States. The Postal Reorganization Act of 1970 created the Postal Service, effective July 1971, as an independent establishment of the Federal Executive Branch.

Revenue and cost analysis describes the Postal Service's system of attributing revenues and costs to classes of mail and service. This system draws primarily upon probability sampling techniques to develop estimates of revenues, volumes, and weights, as well as costs by class of mail and special service. The costs attributed to classes of mail and special services are primarily incremental costs which vary in response to changes in volume; they account for roughly 60 percent of the total costs of the Postal Service. The balance represents "institutional costs." Statistics on revenues, volume of mail, and distribution of expenditures are presented in the Postal Service's annual report, *Cost and Revenue Analysis*, and its *Annual Report of the Postmaster General* and its annual *Comprehensive Statement on Postal Operations*.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

## No. 920. Media Usage and Consumer Spending: 1992 to 2002

[Estimates of time spent were derived using rating data for television and radio, survey research and consumer purchase data for recorded music, newspapers, magazines, books, home video, admissions for movies, and consumer on-line/Internet access services. Adults 18 and older except for recorded music, movies in theaters, and video games where estimates include persons 12 years old and older]

Average monthly bill	Dollars	80.90	68.68	61.48	56.21	51.00	47.70	42.78	39.43
Average length of call <sup>3</sup>	Minutes	2.20	2.58	2.41	2.24	2.15	2.32	2.31	2.39

<sup>1</sup> The basic geographic unit of a wireless PCS or cellular system. A city or county is divided into smaller "cells," each of which is equipped with a low-powered radio transmitter/receiver. The cells can vary in size depending upon terrain, capacity demands, etc. By controlling the transmission power, the radio frequencies assigned to one cell can be limited to the boundaries of that cell. When a wireless PCS or cellular phone moves from one cell toward another, a computer at the Switching Office monitors the movement and at the proper time, transfers or hands off the phone call to the new cell and another radio frequency. <sup>2</sup> Service revenue generated by subscribers' calls outside of their system areas. <sup>3</sup> As of December 31.

Inventories, Dec. 31	857	767	894	902	1,067	1,216	2,091	2,944	3,320

NA Not available. <sup>1</sup> Represents the average number of production workers plus the number of other employees in mid-March. <sup>2</sup> By manufacture, derived by subtracting the cost of materials, supplies, containers, fuel, purchased electricity, and contract work from the value of shipments. This result is then adjusted by the addition of value added by merchandising operations, plus the net change in finished goods and work-in-process inventories between the beginning and the end of the year.

## Energy

This section presents statistics on fuel resources, energy production and consumption, electric energy, hydroelectric power, nuclear power, solar energy, wood energy and the electric and gas utility industries. The principal sources are the U.S. Department of Energy's Energy Information Administration (EIA), the Edison Electric Institute, Washington, DC, and the American Gas Association, Arlington, VA. The Department of Energy was created in October 1977 and assumed and centralized the responsibilities of all or part of several agencies including the Federal Power Commission (FPC), the U.S. Bureau of Mines, the Federal Energy Administration, and the U.S. Energy Research and Development Administration. For additional data on transportation, see Section 21; on fuels, see Section 24; and on energy-related housing characteristics, see Section 25.

The EIA, in its *Annual Energy Review*, provides statistics and trend data on energy supply, demand, and prices. Information is included on petroleum and natural gas, coal, electricity, hydroelectric power, nuclear power, solar, wood, and geothermal energy. Among its annual reports are *Annual Energy Review*, *Electric Power Annual*, *Natural Gas Annual*, *Petroleum Supply Annual*, *State Energy Data Report*, *State Energy Price and Expenditure Report*, *Financial Statistics of Selected Electric Utilities*, *Performance Profiles of Major Energy Producers*, *Annual Energy Outlook*, and *International Energy Annual*. These various publications contain state, national, and international data on production of electricity, net summer capability of generating plants, fuels used in energy production, energy sales and consumption, and hydroelectric power. The EIA also issues the *Monthly Energy Review*, which presents current supply, disposition, and price data and monthly publications on petroleum, coal, natural gas, and electric power. Data on residential energy consumption,

expenditures, and conservation activities are available from EIA's Residential Energy Consumption Survey and are published triennially in *Residential Energy Consumption Survey: Consumption and Expenditures*, and *Residential Energy Consumption Survey: Housing Characteristics*, and other reports.

The Edison Electric Institute's monthly bulletin and annual *Statistical Year Book of the Electric Utility Industry for the Year* contain data on the distribution of electric energy by public utilities; information on the electric power supply, expansion of electric generating facilities, and the manufacture of heavy electric power equipment is presented in the annual *Year-End Summary of the Electric Power Situation in the United States*. The American Gas Association, in its monthly and quarterly bulletins and its yearbook, *Gas Facts*, presents data on gas utilities, financial and operating statistics.

**Btu conversion factors**—Various energy sources are converted from original units to the thermal equivalent using British thermal units (Btu). A Btu is the amount of energy required to raise the temperature of 1 pound of water 1 degree Fahrenheit (F) at or near 39.2 degrees F. Factors are calculated annually from the latest final annual data available; some are revised as a result. The following list provides conversion factors used in 1995 for production and consumption, in that order, for various fuels: Petroleum, 5.800 and 5.586 mil. Btu per barrel; total coal, 21.278 and 20.852 mil. Btu per short ton; and natural gas (dry), 1,028 Btu per cubic foot for both. The factors for the production of nuclear power and geothermal power were 10,676 and 20,914 Btu per kilowatt-hour, respectively. The fossil fuel steam-electric power plant generation factor of 10,272 Btu per kilowatt-hour was used for hydroelectric power generation and for wood and waste, wind, photovoltaic, and solar thermal energy consumed at electric utilities.

## No. 952. Energy Supply and Disposition, by Type of Fuel: 1970 to 1998

[In quadrillion British thermal units (Btu). For Btu conversion factors, see text, this section]

- Represents zero. <sup>1</sup> Sources of energy includes geothermal, wood and waste, and net interstate sales of electricity, including losses, not shown separately. <sup>2</sup> Based on estimated resident population as of July 1. <sup>3</sup> Includes 27.2 trillion Btu of net imports of coal coke not allocated by State. <sup>4</sup> A negative number occurs when more electricity is expended than is created to provide electricity during peak demand periods.

No. 957. Energy Expenditures—End-Use Sector and Selected Source,  
by State: 1995

[In millions of dollars (\$15,800 represents \$515,800,000,000), except as indicated. End-use sector and electric utilities exclude expenditures on energy sources such as hydropower, solar, wind, and geothermal. Also excludes expenditures for reported amounts of energy consumed by the energy industry for production, transportation, and processing operations]

## No. 959. Residential Energy Consumption, Expenditures, and Average Price, 1980 to 1993, and by Region, 1993

[For period April to March for 1980-1985; January to December for 1987 to 1993. Excludes Alaska and Hawaii in 1980. Covers occupied units only. Excludes household usage of gasoline for transportation and the use of wood or coal. Based on Residential Energy Consumption Survey; see source. For composition of regions, see inside front cover. Btu = British thermal unit; see text, this section]

# No. 961. Manufacturing Primary Energy Consumption for all Purposes, by Type of Fuel and Major Industry Group: 1994

[In trillions of Btu (21,663 represents 21,663,000,000,000). Estimates represented in this table are for the primary consumption of energy for heat and power and as feedstocks or raw material inputs. Primary consumption is defined as the consumption of the energy that was originally produced offsite or was produced onsite from input materials not classified as energy. Examples of the latter are hydrogen produced from the electrolysis of brine; the output of captive (onsite) mines or wells; woodchips, bark, and woodwaste from wood purchased as a raw material input; and waste materials such as wastepaper and packing materials. Primary consumption excludes quantities of energy that are produced from other energy inputs and, therefore, avoids double counting. Based on the 1994 Manufacturing Energy Consumption Survey and subject to sampling variability]

- Represents zero. NA Not available. Z Represents less than half the unit of measure. <sup>1</sup> OPEC (Organization of Petroleum Exporting Countries) includes the Persian Gulf nations shown below, except Bahrain, which is not a member of OPEC, and also includes nations shown under "Other OPEC". <sup>2</sup> Excludes petroleum imported into the United States indirectly from members of the OPEC countries. <sup>3</sup> Imports from the Neutral Zone between Kuwait and Saudi Arabia are included in Saudi Arabia. <sup>4</sup> Ecuador withdrew from OPEC on Dec. 31, 1992; therefore, it is included under OPEC for the period 1973 to 1992. <sup>5</sup> Includes petroleum imported into the United States indirectly from member of OPEC, primarily from Caribbean and West European areas, as petroleum products that were refined from crude oil produced by OPEC.

NA Not available. <sup>1</sup> Change from immediate prior year except for 1980, change from 1975. For explanation of average annual percent change, see Guide to Tabular Presentation. <sup>2</sup> Net summer capability is the steady hourly output that generating equipment is expected to supply to system load, exclusive of auxiliary power as demonstrated by test at the time of summer peak demand. <sup>3</sup> Includes small percentage (5 percent) from wood and waste, geothermal, and petroleum coke. <sup>4</sup> A prime mover is the engine, turbine, water wheel, or similar machine which drives an electric generator. <sup>5</sup> Fossil fuels only. <sup>6</sup> Includes wind, solar thermal, and photovoltaic, not shown separately. <sup>7</sup> Includes fossil steam, wood, and waste. <sup>8</sup> Each prime mover type in combination plants counted separately. Includes geothermal, wind, and solar, not shown separately. <sup>9</sup> Includes small amounts of wood, waste, wind, geothermal, solar thermal, and photovoltaic.

No. 973. Electric Utility Industry—Capability, Peak Load, and Capacity Margin: 1980 to 1997

[Excludes Alaska and Hawaii. Capability represents the maximum kilowatt output with all power sources available and with hydraulic equipment under actual water conditions, allowing for maintenance, emergency outages, and system operating requirements. Capacity margin is the difference between capability and peak load]

Year	Capability at the time of—				Noncoincident peak load		Capacity margin			
	Summer peak load (1,000 kW)		Winter peak load (1,000 kW)		Summer	Winter	Summer		Winter	
	Amount	Change from prior year	Amount	Change from prior year			Amount (1,000 kW)	Percent of capability	Amount (1,000 kW)	Percent of capability

## No. 977. Nuclear Power Plants—Number, Capacity, and Generation: 1980 to 1997

Item	1980	1985	1988	1989	1990	1991	1992	1993	1994	1995	1996	1997
Operable generating units <sup>1</sup>	71	96	109	111	112	111	109	110	109	109	109	107
Net summer capacity <sup>2</sup> (mil. kW)	51.8	79.4	94.7	98.2	99.6	99.6	99.0	99.0	99.1	99.5	100.8	100.8
Net generation (bil. kWh)	251.1	383.7	527.0	529.4	576.9	612.6	618.8	610.3	640.4	673.4	674.7	629.4
Percent of total electric utility generation	11.0	15.5	19.5	19.0	20.5	21.7	22.1	21.2	22.0	22.5	21.9	20.1
Capacity factor <sup>3</sup>	56.3	58.0	63.5	62.2	66.0	70.2	70.9	70.5	73.8	77.4	76.3	70.8

<sup>1</sup> As of year-end. <sup>2</sup> Net summer capacity is the peak steady hourly output that generating equipment is expected to supply to system load, exclusive of auxiliary and other power plant, as demonstrated by test at the time of summer peak demand. <sup>3</sup> Weighted average of monthly capacity factors. Monthly factors are derived by dividing actual monthly generation by the maximum possible generation for the month (hours in month times net maximum dependable capacity).

No. 983. Solar Collector Shipments, by Type, End Use, and Market Sector: 1984 to 1997

[In thousands of square feet, except number of manufacturers. Solar collector is a device for intercepting sunlight, converting the light to heat, and carrying the heat to where it will be either used or stored. 1985 data are not available]

Year	Number of manufacturers	Collector type			End use			Market sector		
		Total shipments <sup>1</sup>	Low temperature	Medium temperature, special, other	Pool heating	Hot water	Space heating	Residential	Commercial	Industrial
1984 <sup>2</sup>	225	17,191	4,479	11,939	4,427	8,930	2,370	13,980	2,091	289
1986 <sup>2</sup>	98	9,360	3,751	1,111	3,494	1,181	127	4,131	703	13
1987 <sup>2</sup>	59	7,269	3,157	957	3,111	964	23	3,775	305	11
1988 <sup>2</sup>	51	8,174	3,326	732	3,304	726	7	3,796	255	7
1989 <sup>2</sup>	44	11,482	4,283	1,989	4,688	1,374	205	5,804	424	42
1990	51	11,409	3,645	2,527	5,016	1,091	2	5,835	294	22
1991	48	6,574	5,585	989	5,535	989	24	6,322	225	13
1992	45	7,086	6,187	897	6,210	801	35	6,832	204	27
1993	41	6,968	6,025	931	6,040	880	15	6,694	215	31
1994	41	7,627	6,823	803	6,813	790	19	7,026	583	16
1995	36	7,666	6,813	840	6,763	755	132	6,966	604	82
1996	28	7,616	6,821	785	6,787	765	57	6,873	682	54
1997	29	8,138	7,524	606	7,528	595	10	7,360	768	7

<sup>1</sup> Includes high temperature collectors, end uses such process heating, and utility and other market sectors not shown separately. <sup>2</sup> Declines between 1984 and 1989 are primarily due to the expiration of the Federal energy tax credit and industry consolidation.

## Section 20

# Science and Technology

---

This section presents statistics on scientific, engineering, and technological resources, with emphasis on patterns of research and development (R&D) funding and on scientific, engineering, and technical personnel, education, and employment. Also included are statistics on space program outlays and accomplishments. Principal sources of these data are the National Science Foundation (NSF) and the National Aeronautics and Space Administration (NASA).

NSF gathers data chiefly through recurring surveys. Current NSF publications containing data on funds for research and development and on scientific and engineering personnel include the *Science Resources Studies Highlights* summaries series; *Detailed Statistical Tables*; and annual, biennial, triennial, and special reports. Titles or the areas of coverage of these reports include the following: *Science and Engineering Indicators*; *National Patterns of R&D Resources*; *Science and Engineering Personnel—A National Overview*; *Women and Minorities in Science and Engineering*; science and technology data presented in chart and tabular form in a pocket-size publication; *International Science and Technology Data Update*; profiles on human resources and funding in individual fields of science and engineering; *Federal Funds for Research and Development*; *Federal R&D Funding by Budget Function*; *Federal Support to Universities, Colleges, and Selected Nonprofit Institutions*; *Scientific and Engineering Facilities at Universities and Colleges*; *Geographic Distribution of Industrial R&D Expenditures*; *Research and Development in Industry*; R&D funds and graduate enrollment and support in academic science and engineering; characteristics of doctoral scientists and engineers and of recent graduates in the United States; *U.S. Scientists and Engineers*; and scientists,

engineers, and technicians in manufacturing, nonmanufacturing, and trade and regulated industries. Statistical surveys in these areas pose problems of concept and definition and the data should, therefore, be regarded as broad estimates rather than precise quantitative statements. See sources for details.

The National Science Board's biennial *Science and Engineering Indicators* contains data and analysis of international and domestic science and technology, including measures of inputs and outputs. The *Budget of the United States Government*, published by the U.S. Office of Management and Budget, contains summary financial data on Federal R&D programs.

**Research and development outlays—**NSF defines research as a "systematic and intensive study directed toward a fuller knowledge of the subject studied" and development as "the systematic use of scientific knowledge directed toward the production of useful materials, devices, systems, methods, or processes." National coverage of R&D expenditures is developed primarily from periodic surveys in four principal economic sectors: (1) *Government*, made up primarily of Federal executive agencies; (2) *industry*, consisting of manufacturing and nonmanufacturing firms and the federally funded research and development centers (FFRDCs) they administer; (3) *universities and colleges*, composed of universities, colleges, and their affiliated institutions, agricultural experiment stations, and associated schools of agriculture, and FFRDCs administered by educational institutions; and (4) *other nonprofit institutions*, consisting of such organizations as private philanthropic foundations, nonprofit research institutes, voluntary health agencies, and FFRDCs administered by nonprofit

organizations. The R&D funds reported consist of current operating costs, including planning and administration costs, except as otherwise noted. They exclude funds for routine testing, mapping and surveying, collection of general-purpose data, dissemination of scientific information, and training of scientific personnel.

**Scientists, engineers, and technicians**—Scientists and engineers are defined as persons engaged in scientific

and engineering work at a level requiring a knowledge of sciences equivalent at least to that acquired through completion of a 4-year college course. Technicians are defined as persons engaged in technical work at a level requiring knowledge acquired through a technical institute, junior college, or other type of training less extensive than 4-year college training. Craftsmen and skilled workers are excluded.

<sup>1</sup> For R&D funded by the Federal Government. FFRDCs are federally funded research and development centers. <sup>2</sup> Includes all non-Federal sources. <sup>3</sup> Includes all R&D expenditures of FFRDCs administered by academic institutions and funded by the Federal Government. In 1994, 99 percent of total funds used were from Federal sources.

## Transportation—Land

---

This section presents statistics on revenues, passenger and freight traffic volume, and employment in various revenue-producing modes of the transportation industry, including motor vehicles, trains, and pipelines. Data are also presented on commuting travel, highway mileage and finances, motor vehicle travel, accidents, sales, and registrations; automobile operating costs; and characteristics of public transit, railroads, and pipelines.

The principal compiler of data on public roads and on operation of motor vehicles is the U.S. Department of Transportation's (DOT) Federal Highway Administration (FHWA). These data appear in FHWA's annual *Highway Statistics* and other publications. The U.S. Interstate Commerce Commission (ICC) presents data on interstate land transport in its publications, the *Annual Report to Congress* and the *Transport Statistics in the United States*, which contain data on railroads and motor carriers subject to ICC regulations.

The U.S. National Highway Traffic Safety Administration issues data on traffic accident deaths and death rates in two annual reports: the *Fact Book* and the *Fatal Accident Reporting System Annual Report*. DOT's Federal Railroad Administration presents data on accidents involving railroads in its annual *Accident/Incident Bulletin*, and the *Rail-Highway Crossing Accident/Incident and Inventory Bulletin*.

Various censuses and surveys conducted by the U.S. Census Bureau also provide data. Results of the censuses of transportation are presented in the *Truck Inventory and Use Survey*. The *Annual Survey of Manufactures* and reports of the censuses of manufactures, wholesale and retail trade, and service industries contain statistics on the motor vehicle and equipment industry and on retail, wholesale, and services aspects of this industry. Data on

persons commuting to work were collected as part of the 1980 census and are in various census reports.

Data are also presented in many nongovernment publications. Among them are the weekly and annual *Cars of Revenue Freight Loaded* and the annual *Yearbook of Railroad Facts*, both published by the Association of American Railroads, Washington, DC; *Transit Fact Book*, containing electric railway and motorbus statistics, published annually by the American Public Transit Association, Washington, DC.; *Accident Facts*, issued by the National Safety Council, Chicago, IL; and *Transportation in America*, issued by the Eno Foundation for Transportation, Westport, Connecticut.

### **Urban and rural highway mileage—**

Beginning in 1980, mileage is classified in urban and rural categories, rather than municipal and rural. Urban denotes the Federal-aid legislation definition of an area. Such areas include, as a minimum, a census place with a population of 5,000 to 49,999 or a designated urbanized area with a population of 50,000 or more. These Federal-aid urban areas may extend beyond corporate and census boundaries, and thus are not necessarily coextensive with municipal boundaries. Rural in 1980 refers to non-Federal-aid urban area mileage. Prior to 1980, municipal referred to roads within incorporated places, densely populated New England towns, and certain of the more populous unincorporated areas and rural to nonmunicipal roads.

**Federal-aid highway systems—**The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 eliminated the historical Federal-Aid Highway Systems and created the National Highway System (NHS) and other Federal-aid highway categories. The final NHS was approved by Congress in December of 1995 under the National Highway System Designation Act.

**Functional systems**—Roads and streets are assigned to groups according to the character of service intended. The functional systems are (1) arterial highways that generally handle the long trips, (2) collector facilities that collect and disperse traffic between the arterials and the lower systems, and (3) local roads and streets that primarily serve direct access to residential areas, farms, and other local areas.

**Regulatory bodies**—The ICC, created by the U.S. Congress to regulate transportation in interstate commerce, has jurisdiction over railroads, trucking companies, bus lines, freight forwarders, water carriers, coal slurry pipelines, and transportation brokers. The Federal Energy Regulatory Commission is responsible for setting rates and charges for transportation and sale of natural gas and for establishing rates or charges for transportation.

**Motor carriers**—For 1960-73, Class I for-hire motor carriers of freight were classified by the ICC as those with \$1 million or more of gross annual operating revenue; 1974-79, the class minimum was \$3 million. Effective January 1, 1980, Class I carriers are those with \$5 million or more in revenue. For 1960-68, Class I motor carriers of passengers were classified by the ICC as those with \$200,000 or more of gross annual operating revenue; for 1969-76, as those with revenues of \$1 million or more; and since 1977, as those with \$3 million or more. Effective January 1, 1988, Class I motor carriers of passengers are those with \$5 million or more in operating revenues; Class II less than \$5 million in operating revenues.

**Railroads**—Railroad companies reporting to the ICC are divided into specific groups

as follows: (1) Regular line-haul (interstate) railroads (and their nonoperating subsidiaries), (2) switching and terminal railroads, (3) private railroads prior to 1964 (identified by ICC as "circular" because they reported on brief circulars), and (4) unofficial railroads, so designated when their reports are received too late for tabulation. For the most part, the last three groups are not included in the statistics shown here.

For years prior to 1978, Class I railroads were those with annual revenues of \$1 million or more for 1950-55; \$3 million or more for 1956-64; \$5 million or more for 1965-75; and \$10 million or more for 1976-77. In 1978, the classification became Class I, those having more than \$50 million gross annual operating revenue; Class II, from \$10 million to \$50 million+; and Class III, less than \$10 million. Effective January 1, 1982, the ICC adopted a procedure to adjust the threshold for inflation by restating current revenues in constant 1978 dollars. In 1988, the criteria for Class I and Class II railroads were \$92.0 million and \$18.4 million, respectively. Also effective January 1, 1982, the ICC adopted a Carrier Classification Index Survey Form for carriers not filing annual report Form R-1 with the commission. Class II and Class III railroads are currently exempted from filing any financial report with the Commission. The form is used for reclassifying carriers.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability, see Appendix III.

No. 1013. Passenger and Freight Transportation Outlays, by Type of Transport: 1980 to 1997

[In billions of dollars (\$338.1 represents \$338,100,000,000). Freight data include outlays for mail and express. ICC=Interstate Commerce Commission]

Type of transport	1980	1985	1990	1992	1993	1994	1995	1996	1997
<b>Total outlays <sup>1</sup></b>	<b>338.1</b>	<b>492.2</b>	<b>630.4</b>	<b>644.6</b>	<b>683.7</b>	<b>715.2</b>	<b>763.4</b>	<b>800.9</b>	<b>833.0</b>

No. 1014. Volume of Domestic Intercity Freight and Passenger Traffic, by Type of Transport: 1980 to 1997

[Freight traffic in bil. ton-miles; passenger traffic in bil. passenger-miles. A ton-mile is the movement of 1 ton (2,000 pounds) of freight for the distance of 1 mile. A passenger-mile is the movement of one passenger for the distance of 1 mile. Comprises public and private traffic, both revenue and nonrevenue]

Type of transport	Traffic volume						Percent distribution

- Represents or rounds to zero. NA Not available. <sup>1</sup> Data on deaths are from U.S. National Highway Traffic Safety Administration and are based on 30 day definition. Includes only police reported crashes. <sup>2</sup> Accidents which result in damages to railroad property. Grade crossing accidents are also included when classified as a train accident. Deaths exclude fatalities in railroad-highway grade crossing accidents. <sup>3</sup> Includes scheduled and nonscheduled (charter) air carriers. Represents serious injuries. <sup>4</sup> All scheduled service. Represents serious injuries. <sup>5</sup> All nonscheduled service. Represents serious injuries. <sup>6</sup> Accidents resulting in death; injury or requiring medical treatment beyond first aid; damages exceeding \$500; or a person's disappearance. <sup>7</sup> Pipeline accidents/incidents are credited to year of occurrence; prior data are credited to the year filed. <sup>8</sup> Pipelines carrying hazardous materials, petroleum, and liquid petroleum products. <sup>9</sup> Covers accidents involving commercial vessels which must be reported to U.S. Coast Guard if there is property damage exceeding \$25,000; material damage affecting the seaworthiness or efficiency of a vessel; stranding or grounding; loss of life; or injury causing a person's incapacity for more than 3 days. <sup>10</sup> Reporting criteria and source of data changed between 1989 and 1990; these data from 1990 to present are not comparable to earlier years. <sup>11</sup> Accidents, deaths, and injuries involving hazardous materials cover all types of transport.

No. 1027. Motor Vehicle Registrations, 1980 to 1997, and Drivers Licenses, and Motorcycle Registrations 1997, by State

[In thousands (155,796 represents 155,796,000). Motor vehicle registrations cover publicly, privately, and commercially owned vehicles. For uniformity, data have been adjusted to a calendar-year basis as registration years in states differ; figures represent net numbers where possible, excluding re-registrations and nonresident registrations]

No. 1039. National Personal Transportation Survey (NPTS)—  
Summary of Travel Trends: 1969 to 1990

[62,504 represents 62,504,000. Data obtained by collecting information on all trips taken by the respondent on a specific day (known as travel day), combined with longer trips taken over a 2-week period (known as travel period). Contains data from previous NPTS surveys. For compatibility with previous survey data, all data are based only on trips taken during travel day. Be aware that terminology changes from survey to survey. See source for details]

# No. 1043. Fatal Motor Vehicle Accidents—National Summary: 1980 to 1997

[Based on data from the Fatal Accident Reporting System (FARS). FARS gathers data on accidents that result in loss of human life. FARS is operated and maintained by National Highway Traffic Safety Administration's (NHTSA) National Center for Statistics and Analysis (NCSA). FARS data are gathered on motor vehicle accidents that occurred on a roadway customarily open to the public, resulting in the death of a person within 30 days of the accident. Collection of these data depend on the use of police, hospital, medical examiner/coroner, and Emergency Medical Services reports; State vehicle registration, driver licensing, and highway department files; and vital statistics documents and death certificates. See source for further detail]

## Transportation—Air and Water

---

This section presents data on civil air transportation, both passenger and cargo, and on water transportation, including inland waterways, oceanborne commerce, the merchant marine, cargo and vessel tonnages, and shipbuilding. Comparative data on various types of transportation carriers are presented in Section 21, Land Transportation.

Principal sources of these data are the annual *National Transportation Statistics*, issued by the U.S. Bureau of Transportation Statistics; the annual *Air Transport Facts and Figures* issued by the Air Transport Association of America, Washington, DC; and the annual *Waterborne Commerce of the United States* issued by the Corps of Engineers of the Department of the Army. In addition, the U.S. Census Bureau in its commodity transportation survey (part of the census of transportation, taken every 5 years, for years ending in "2" and "7") provides data on the type, weight, and value of commodities shipped by manufacturing establishments in the United States, by means of transportation, origin, and destination. See text, Section 17, Business, for a discussion of the 1997 Economic Census.

Additional sources of data on water transportation include *Merchant Fleets of the World*, issued periodically by the U.S. Maritime Administration; *The Bulletin*, issued monthly by the American Bureau of Shipping, New York, NY; and the annual *World Fleet Statistics* and the *Register Book*, published by Lloyd's Register of Shipping, London, England.

**Civil aviation**—Federal promotion and regulation of civil aviation have been carried out by the FAA and the Civil Aeronautics Board (CAB). The CAB promoted and regulated the civil air transportation industry within the United States and between the United States and foreign countries. The Board granted licenses to provide

air transportation service, approved or disapproved proposed rates and fares, and approved or disapproved proposed agreements and corporate relationships involving air carriers. In December 1984, the CAB ceased to exist as an agency. Some of its functions were transferred to the Department of Transportation (DOT), as outlined below. The responsibility for investigation of aviation accidents resides with the National Transportation Safety Board.

The Office of the Secretary, DOT aviation activities include: negotiation of international air transportation rights, selection of U.S. air carriers to serve capacity controlled international markets, oversight of international rates and fares, maintenance of essential air service to small communities, and consumer affairs. DOT's Bureau of Transportation Statistics (BTS) handles aviation information functions formerly assigned to CAB. Prior to BTS, the Research and Special Programs Administration handled these functions.

The principal activities of the FAA include: the promotion of air safety; controlling the use of navigable airspace; prescribing regulations dealing with the competency of airmen, airworthiness of aircraft and air traffic control; operation of air route traffic control centers, airport traffic control towers, and flight service stations; the design, construction, maintenance, and inspection of navigation, traffic control, and communications equipment; and the development of general aviation.

The CAB published monthly and quarterly financial and traffic statistical data for the certificated route air carriers. BTS continues these publications, including both certificated and noncertificated (commuter) air carriers. The FAA publishes annually data on the use of airway facilities; data related to the location of airmen, aircraft, and airports; the volume of activity in the field of

nonair carrier (general aviation) flying; and aircraft production and registration.

General aviation comprises all civil flying (including such commercial operations as small demand air taxis, agriculture application, powerline patrol, etc.) but excludes certificated route air carriers, supplemental operators, large-aircraft commercial operators, and commuter airlines.

**Air carriers and service**—The CAB previously issued "certificates of public convenience and necessity" under Section 401 of the Federal Aviation Act of 1958 for scheduled and nonscheduled (charter) passenger services and cargo services. It also issued certificates under Section 418 of the Act to cargo air carriers for domestic all-cargo service only. The DOT Office of the Secretary now issues the certificates under a "fit, willing, and able" test of air carrier operations. Carriers operating only a 60-seat-or-less aircraft are given exemption authority to carry passengers, cargo, and mail in scheduled and nonscheduled service under Part 298 of the DOT (formerly CAB) regulations. Exemption authority carriers who offer scheduled passenger service to an essential air service point must meet the "fit, willing, and able" test.

**Vessel shipments, entrances, and clearances**—Shipments by dry cargo vessels comprise shipments on all types of watercraft, except tanker vessels; shipments by tanker vessels comprise all types of cargo, liquid and dry, carried by tanker vessels.

A vessel is reported as entered only at the first port which it enters in the United States, whether or not cargo is unloaded at that port. A vessel is reported as cleared only at the last port at which clearance is made to a foreign port, whether or not it takes on cargo. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures.

**Units of measurement**—Cargo (or freight) tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. However, shipping weight excludes lift and cargo vans and similar substantial outer containers. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. Substantially, it represents space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Deadweight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is, therefore, the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

## No. 1077. On-Time Flight Arrivals and Departures at Major U.S. Airports: 1998

[In percent. Quarterly, based on gate arrival and departure times for domestic scheduled operations of U.S. major airlines. All U.S. airlines with 1 percent or more of total U.S. domestic scheduled airline passenger revenues are required to report on-time data. A flight is considered on time if it operated less than 15 minutes after the scheduled time shown in the carrier's computerized reservation system. Cancelled and diverted flights are considered late. See source for data on individual airlines]

No. 1079. Commuter/Regional Airline Operations—Summary: 1980 to 1997

[Calendar year data (14.8 represents 14,800,000). Commuter/regional airlines operate primarily aircraft of predominately 75 passengers or less and 18,000 pounds of payload capacity serving short haul and small community markets. Represents operations within all North America by U.S. regional carriers. Averages are means. For definition of mean, see Guide to Tabular Presentation]

Item	Unit	1980	1985	1990	1993	1994	1995	1996	1997
Passenger carriers operating	Number	214	179	150	130	125	124	109	104
Passengers enplaned	Millions	14.8	126.0	42.1	52.7	57.1	57.2	61.9	66.3
Average passengers enplaned per carrier	1,000	69.2	152.4	277.5	405.2	457.0	461.4	568.3	637.5
Revenue passenger miles (RPM)	Billions	1.92	4.41	7.61	10.81	12.02	12.75	14.22	15.30
Average RPMs per carrier	Millions	8.97	24.64	50.75	81.59	96.15	102.80	130.49	147.09
Airports served	Number	732	854	811	829	808	780	782	766
Average trip length	Miles	129	173	183	201	210	223	230	231
Passenger aircraft operated	Number	1,339	1,745	1,917	2,208	2,172	2,138	2,127	2,104
Average seating capacity (seats)	Number	13.9	19.2	22.1	23.0	23.7	24.6	25.1	25.9
Fleet flying hours	1,000	1,740	2,854	3,447	4,490	4,565	4,659	4,568	4,695
Average annual utilization per aircraft	Hours	1,299	1,635	1,798	2,033	2,102	2,179	2,148	2,231

<sup>1</sup> Adjusted to exclude a merger in 1986. <sup>2</sup> Prior to 1993, utilization results reflected airborne rather than block hours. Data inclusive of carriers which may have operated during only part of calendar year 1996.

Jet fuel <sup>15</sup>	Mil. gal.	415	766	691	663	560	608	642

NA Not available. X Not applicable. <sup>1</sup> Existing airports, heliports, seaplane bases, etc. recorded with FAA. Includes military airports with joint civil and military use. Includes U.S. outlying areas. Airport-type definitions: Public—publicly owned and under control of a public agency; private—owned by a private individual or corporation. May or may not be open for public use. <sup>2</sup> Fiscal year data. Does not include System Planning Grants. Includes U.S. outlying areas. 1970-1980 data are obligated Federal funds for the Airport Development Aid Program. Thereafter, data are appropriated Federal funds under the Airport and Airway Improvement Act of 1982. <sup>3</sup> Registered aircraft that flew 1 or more hours during the year. <sup>4</sup> Includes helicopters. <sup>5</sup> See text, this section. Beginning 1995, excludes commuters and includes experimental aircraft, not shown separately. Prior to 1995, experimental aircraft were included in the appropriate type. Data beginning 1995 may not be comparable to data for earlier years due to revisions in survey procedures. <sup>6</sup> Includes autogyros; excludes air carrier helicopters. <sup>7</sup> Includes all active pilots. An active pilot is one with a pilot certificate and a valid medical certificate. Also includes pilots who hold a recreational certificate or only a helicopter, glider, or lighter than air certificate, not shown separately. <sup>8</sup> Includes dispatchers, flight navigators and engineers, and ground technicians—mechanics, parachute riggers, and ground and ground instructors. Data for 1996 on mechanics, repairmen, parachute riggers, ground instructors, and dispatchers are limited to those ages 70 years and less. <sup>9</sup> No medical examinations are required, therefore, data represent all certificates on record and include retired or otherwise inactive technicians. See footnote 8. <sup>10</sup> Includes all air traffic control specialists (staff positions, managers, supervisors, and for 1970-85 traffic management coordinators, not shown separately) and air traffic assistants. <sup>11</sup> Serving in-flight service stations, towers, and centers. <sup>12</sup> Prior to 1990, included in total air traffic control specialists. <sup>13</sup> Airway Transportation Systems Specialists. <sup>14</sup> Source: 1970, U.S. Bureau of Mines; thereafter, FAA General Aviation Activity and Avionics Survey. Data for 1996 are estimated using new information on survey nonresponse and so are not strictly comparable to earlier years. <sup>15</sup> Includes kerosene-type and naphtha-type jet fuels.

<sup>1</sup> Reflects unusually large nonoperating expenses totalling \$3.4 billion in 1991 and \$8.7 billion in 1992 due to the initial implementation of a change in accounting for future retirement benefit costs and defense-downsizing restructuring charges. Many large aerospace corporations chose to write off against first quarter earnings amounts required to comply with FASB 106.

No. 1088. International Transportation Transactions of the United States: 1985 to 1998

[In millions of dollars (19,085 represents \$19,085,000,000). Data are international transportation transactions recorded for balance of payment purposes (see Table 1307). Receipts include freight on exports carried by U.S.-operated carriers and foreign carrier expenditures in U.S. ports. Payments include freight on imports carried by foreign carriers and U.S. carrier port expenditures abroad. Freight on exports carried by foreign carriers is excluded since such payments are directly or indirectly for foreign account. Similarly, freight on U.S. imports carried by U.S. carriers is a domestic rather than an international transaction. Minus sign (-) indicates excess of payments over receipts]

Item	1985	1990	1992	1993	1994	1995	1996	1997	1998

No. 1089. Federal Expenditures for Civil Functions of the Corps of Engineers, United States Army: 1970 to 1997

[In millions of dollars (1,128 represents \$1,128,000,000). For fiscal years ending in year shown, see text, Section 9, State and Local Government. These expenditures represent the work of the Corps of Engineers to plan, design, construct, operate, and maintain civil works projects and activities, particularly in the management and improvement of rivers, harbors, and waterways for navigation, flood control, and multiple purposes. The amounts listed below do not include the expenditure of funds contributed, advanced, or reimbursed by other government agencies or local interests. Includes Puerto Rico and outlying areas]

Fiscal year	Total program <sup>1</sup>	Navigation	Flood control	Multiple purpose	Fiscal year	Total program <sup>1</sup>	Navigation	Flood control	Multiple purpose
1970	1,128	398	379	331	1990	3,297	1,391	1,397	375
1980	3,061	1,225	1,228	551	1991	3,511	1,473	1,447	443
1984	3,085	1,383	1,154	445	1992	3,675	1,562	1,469	469
1985	2,956	1,234	1,187	419	1993	3,335	1,461	1,243	464
1986	3,163	1,345	1,300	402	1994	3,727	1,607	1,436	521
1987	2,937	1,135	1,272	411	1995	3,796	1,620	1,399	598

## Section 23

# Agriculture

---

This section presents statistics on farms and farm operators; land use; farm income, expenditures, and debt; farm output, productivity, and marketings; foreign trade in agricultural products; specific crops; and livestock, poultry, and their products.

The principal sources are the reports issued by the National Agricultural Statistics Service (NASS) and the Economic Research Service (ERS) of the U.S. Department of Agriculture. The information from the 1997 Census of Agriculture is available in printed form in the Volume 1, Geographic Area Series; in electronic format on CD-ROM; and on the Internet (<http://www.nass.usda.gov/census/>). The Department of Agriculture publishes annually *Agricultural Statistics*, a general reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The Economic Research Service publishes data on farm assets, debt, and income in the annual *Farm Business Economic Report*. Sources of current data on agricultural exports and imports include *Foreign Agricultural Trade of the United States*, published by the ERS, and the reports of the U.S. Census Bureau, particularly *U.S. Imports of Merchandise on CD-ROM*, and *U.S. Exports of Merchandise on CD-ROM*.

The 45 field offices of the NASS collect data on crops, livestock and products, agricultural prices, farm employment, and other related subjects mainly through sample surveys. Information is obtained on some 75 crops and 50 livestock items as well as scores of items pertaining to agricultural production and marketing. State estimates and supporting information are sent to the Agricultural Statistics Board of NASS which reviews the estimates and issues reports containing state and national data. Among these reports are annual summaries such as *Crop Production*, *Crop Values*, *Agricultural Prices*, and *Livestock*

*Production, Disposition and Income*. For more information about concepts and methods underlying USDA's statistical series, see *Major Statistical Series of the U.S. Department of Agriculture* (Agricultural Handbook No. 671), a 12-volume set of publications.

**Farms and farmland**—The definitions of a farm have varied through time. Since 1850, when minimum criteria defining a farm for census purposes first were established, the farm definition has been changed nine times. The current definition, first used for the 1974 census, is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year.

Acreage designated as "land in farms" consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator's total operation. Land in farms includes acres set aside under annual commodity acreage programs as well as acres in the Conservation Reserve and Wetlands Reserve Programs for places meeting the farm definition. Land in farms is an operating unit concept and includes land owned and operated as well as land rented from others. All grazing land, except land used under government permits on a per-head basis, was included as "land in farms" provided it was part of a farm or ranch.

Since 1945, an evaluation of census coverage has been conducted for each census of agriculture to provide estimates of the completeness of census farm counts. According to coverage evaluation results, the past five censuses of agriculture included an average of 92 percent of U.S. farms and 98 percent of agriculture production. The

1997 coverage evaluation program was designed to measure four components of error in the census farm counts. These components include undercount due to farms not on the mail list; overcount due to farms duplicated or enumerated more than once; undercount due to farms incorrectly classified as nonfarms; and overcount due to nonfarms incorrectly classified as farms. The first component, mail list undercount, is by far the largest component of coverage error. The percentage of farms missed in the census varies considerably by state. In general, farms not on the mail list tended to be small in acreage, production, and sales of agricultural products. For more explanation about mail list compilation and census coverage, see Appendixes A and C, *1997 Census of Agriculture*, Volume 1, reports.

**Farm income**—The final agricultural sector output comprises cash receipts from farm marketings of crops and livestock, Federal government payments made directly to farmers for farm-related activities, rental value of farm homes, value of farm products consumed in farm homes, and other farm-related income such as machine hire and custom work. Farm marketings represent quantities of agricultural products sold by farmers multiplied by prices received per unit of production at the local market. Information on prices received for farm products is generally obtained by the NASS Agricultural Statistics Board from surveys of firms (such as grain elevators, packers, and processors) purchasing agricultural commodities directly from producers. In some cases, the price information is obtained directly from the producers.

**Crops**—Estimates of crop acreage and production by the NASS are based on current sample survey data obtained from

individual producers and objective yield counts, reports of carlot shipments, market records, personal field observations by field statisticians, and reports from other sources. Prices received by farmers are marketing year averages. These averages are based on U.S. monthly prices weighted by monthly marketings during specific periods. U.S. monthly prices are state average prices weighted by marketings during the month. Marketing year average prices do not include allowances for outstanding loans, government purchases, deficiency payments or disaster payments.

All state prices are based on individual state marketing years, while U.S. marketing year averages are based on standard marketing years for each crop. For a listing of the crop marketing years and the participating states in the monthly program, see *Crop Values*. Value of production is computed by multiplying state prices by each state's production. The U.S. value of production is the sum of state values for all states. Value of production figures shown in Tables 1128-1131, 1135, and 1136 should not be confused with cash receipts from farm marketings which relate to sales during a calendar year, irrespective of the year of production.

**Livestock**—Annual inventory numbers of livestock and estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture are based on information from farmers and ranchers obtained by probability survey sampling methods.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Department of Agriculture data, see Appendix III.

No. 1100. Farms—Number and Acreage, by Size of Farm: 1987 to 1997

[2,088 represents 2,088,000]

Size of farm	Number of farms (1,000)			Land in farms (mil. acres)			Cropland harvested (mil. acres)			Percent distribution, 1997		
	1987	1992	1997	1987	1992	1997	1987	1992	1997	Num- ber of farms	All land in farms	Crop- land har- vested

## No. 1107. Farms—Number and Acreage: 1980 to 1998

[As of June 1 (2,440 represents 2,440,000). Based on 1974 census definition; for definition of farms and farmland, see text of this section. Data for census years (indicated by italics) have been adjusted for underenumeration and are used as reference points along with data from acreage and livestock surveys in estimating data for other years. Minus sign (-) indicates decrease]

Year	Farms		Land in farms		Year	Farms		Land in farms	
	Number (1,000)	Annual change <sup>1</sup> (1,000)	Total (mil. acres)	Average per farm (acres)		Number (1,000)	Annual change <sup>1</sup> (1,000)	Total (mil. acres)	Average per farm (acres)
1980 . . . . .	2,440	3	1,039	426	1992 . . . . .	2,108	-9	979	464
1985 . . . . .	2,293	-41	1,012	441	1993 . . . . .	2,202	94	969	440
1986 . . . . .	2,250	-43	1,005	447	1994 . . . . .	2,198	-4	966	440
1987 . . . . .	2,213	-37	999	451	1995 . . . . .	2,196	-2	963	438
1988 . . . . .	2,201	-12	994	452	1996 . . . . .	2,191	-5	959	438
1989 . . . . .	2,175	-26	991	456	1997 . . . . .	2,191	-	956	436
1990 . . . . .	2,146	-29	987	460	1998 . . . . .	2,192	1	954	435
1991 . . . . .	2,117	-29	982	464					

- Represents zero. <sup>1</sup> Annual change from immediate preceding year.

## No. 1111. Farm Income—Cash Receipts From Farm Marketings: 1990 to 1997

[In millions of dollars (\$169,517 represents \$169,517,000,000). Represents gross receipts from commercial market sales as well as net Commodity Credit Corporation loans. The source estimates and publishes individual cash receipt values only for major commodities and major producing states. The U.S. receipts for individual commodities, computed as the sum of the reported states, may understate the value of sales for some commodities. The degree of underestimation in some of the minor commodities can be substantial]

## No. 1117. Value of Selected Commodities Produced Under Contracts: 1997

[59,826 represents \$59,826,000,000. Marketing contracts refer to verbal or written agreements between a buyer and a grower that set a price and determine an outlet for a specified quantity of a commodity before harvest or before the farmer markets the commodity. Production contracts involve paying the farmer a fee for providing management, labor, facilities, and equipment, while assigning ownership of the product to the contractor. Excludes Alaska and Hawaii. Based on Agricultural Resource Management Study, for details see source]

Commodity	Value of production under contract (mil. dol.)	Percent of total production <sup>1</sup>	Commodity	Value of production under contract (mil. dol.)	Percent of total production <sup>1</sup>
<b>Total</b> . . . . .	<b>59,826</b>	<b>231</b>	Sugar beets . . . . .	973	82
Marketing contracts <sup>3</sup> . . . . .	41,610	222	Vegetables . . . . .	3,374	24
Cattle . . . . .	2,735	9	Production contracts <sup>3</sup> . . . . .	18,215	210
Corn . . . . .	1,720	8	Broilers . . . . .	6,664	99
Cotton . . . . .	1,923	33	Cattle . . . . .	4,280	14
Fruits . . . . .	7,199	59	Hogs . . . . .	3,097	33
Soybeans . . . . .	1,672	9	Vegetables . . . . .	1,145	8

<sup>1</sup> Represents percent of production under contract as percent of total commodity production, except as noted. <sup>2</sup> Percent of total value of agricultural production. <sup>3</sup> Includes other commodities not shown separately.

## No. 1123. Imports Share of Food Consumption, by Commodity: 1990 to 1997

[In percent. Import share is the total quantity imported divided by the quantity available for domestic human food consumption. Calculated from supply and utilization balance sheets. A portion of the imports of some commodities is exported; therefore, the ratios presented here may overstate the importance of imports in domestic consumption for some commodity groups. Similarly, a portion of the imports of some commodities is diverted to such nonfood uses as feed, seed, alcohol and fuel production, and industrial uses. This too can overstate the importance of imports]

Commodity	1990	1995	1996	1997	Commodity	1990	1995	1996	1997
Red meat . . . . .	8.1	6.5	6.4	7.1	Grapes . . . . .	37.6	38.8	42.2	41.2
Beef . . . . .	9.8	8.3	8.0	9.2	Fruit juice . . . . .	47.6	25.0	30.5	27.7
Pork . . . . .	5.6	3.8	3.7	3.8	Orange . . . . .	46.3	14.0	18.8	17.6
Fish and shellfish . . . . .	56.3	55.3	58.5	62.1	Apple . . . . .	63.9	53.7	63.4	59.4
Dairy products . . . . .	1.9	1.9	1.9	1.9	Fresh vegetables . . . . .	7.5	9.5	11.0	10.3
Cheese . . . . .	4.8	4.7	4.5	4.1	Cucumbers . . . . .	33.7	38.1	42.9	39.5
Salad and cooking oils . . . . .	5.9	12.1	12.3	12.4	Peppers . . . . .	19.7	19.1	19.5	20.4

Citrus . . . . .	3.4	7.1	6.7	7.0	Wheat . . . . .	4.6	7.7	10.4	10.4
Apples . . . . .	4.7	7.7	7.4	7.2	Rice . . . . .	7.9	10.2	10.6	13.5
Bananas . . . . .	99.8	99.8	99.8	99.8	Cane and beet sugar . . . . .	24.9	19.1	30.9	27.9

<sup>1</sup> Milk equivalent of all dairy products calculated on a milkfat basis. <sup>2</sup> Natural equivalent of cheese and cheese products. Includes all types of cheese except full-skim American and cottage, pot, and baker's cheeses. <sup>3</sup> Olive and canola oil imports. <sup>4</sup> Flour and other wheat products included. Grain equivalent. <sup>5</sup> Rough equivalent. Includes milled rice converted to rough basis at annual extraction rate. <sup>6</sup> Import share is the quantity of imports for domestic consumption (net of re-exports) divided by domestic food consumption.

- Represents or rounds to zero.

<sup>1</sup> Includes areas not shown separately.

<sup>2</sup> See text, Section 30, International Statistics.

<sup>3</sup> Includes Canary Islands and Madeira Islands. <sup>4</sup> Includes Belgium, Luxembourg, Denmark, Greece, Ireland, and Portugal. Beginning 1995, also includes Austria, Finland, and Sweden. As of Jan. 1, 1981, Greece became a member of the European Union. As of Jan. 1, 1986, Spain and Portugal became members of the European Union. For consistency, data for all years are shown on same basis. <sup>5</sup> As of Jan. 1, 1984, includes Canary Islands and Spanish Africa, not elsewhere classified. <sup>6</sup> Beginning 1997, covers Russia only.

NA Not available. <sup>1</sup> Except as noted, marketing year average price. U.S. prices are computed by weighting U.S. monthly prices by estimated monthly marketings and do not include an allowance for outstanding loans and government purchases and payments. <sup>2</sup> Comprises production, imports, and beginning stocks. <sup>3</sup> Includes feed, residual, and other domestic uses not shown separately. <sup>4</sup> Prices are for hay sold baled. <sup>5</sup> Season average prices received by farmers. U.S. prices are computed by weighting state prices by estimated sales and include an allowance for outstanding loans and government purchases, if any, for crops under government programs. <sup>6</sup> Bales of 480 pounds, net weight. <sup>7</sup> State production figures, which conform with annual ginning enumeration with allowance for cross-state ginnings, rounded to thousands and added for U.S. totals. <sup>8</sup> Stock estimates based on Census Bureau data which results in an unaccounted difference between supply and use estimates and changes in ending stocks. <sup>9</sup> Flue-cured and cigar wrapper, crop year July-June; all other types October-September. Farm-sales-weight basis.

## Natural Resources

---

This section presents data on the area, ownership, production, trade, reserves, and disposition of natural resources. Natural resources is defined here as including forestry, fisheries, and mining and mineral products.

**Forestry**—Presents data on the area, ownership, and timber resource of commercial timberland; forestry statistics covering the National Forests and Forest Service cooperative programs; product data for lumber, pulpwood, woodpulp, paper and paperboard, and similar data.

The principal sources of data relating to forests and forest products are *An Analysis of the Timber Situation in the United States, 1989-2040, 1990*; *Forest Resources of the United States, 1992*; *U.S. Timber Production, Trade, Consumption, and Price Statistics*; *Land Areas of the National Forest System*, issued annually by the Forest Service of the Department of Agriculture; *Agricultural Statistics* issued by the Department of Agriculture; and reports of the census of manufactures (taken every 5 years) and the annual *Current Industrial Reports*, issued by the Census Bureau issued on the Internet, and in print in the annual *Manufacturing Profiles*. Additional information is published in the monthly *Survey of Current Business* of the Bureau of Economic Analysis; and the annual *Wood Pulp and Fiber Statistics* and *The Statistics of Paper, Paperboard, and Wood Pulp* of the American Forest and Paper Association, Washington, DC.

The completeness and reliability of statistics on forests and forest products vary considerably. The data for forest land area and stand volumes are much more reliable for areas which have been recently surveyed than for those for which only estimates are available. In general,

more data are available for lumber and other manufactured products such as particle board and softwood panels, etc., than for the primary forest products such as poles and piling and fuelwood.

**Fisheries**—The principal source of data relating to fisheries is *Fisheries of the United States*, issued annually by the National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA). The NMFS collects and disseminates data on commercial landings of fish and shellfish. Annual reports include quantity and value of commercial landings of fish and shellfish disposition of landings, and number and kinds of fishing vessels and fishing gear. Reports for the fish-processing industry include annual output for the wholesaling and fish processing establishments, annual and seasonal employment. The principal source for these data is the annual *Fisheries of the United States*.

**Mining and mineral products**—Presents data relating to mineral industries and their products, general summary measures of production and employment, and more detailed data on production, prices, imports and exports, consumption, and distribution for specific industries and products. Data on mining and mineral products may also be found in Sections 26 and 30 of this Abstract; data on mining employment may be found in Section 13.

Mining comprises the extraction of minerals occurring naturally (coal, ores, crude petroleum, natural gas) and quarrying, well operation, milling, refining and processing, and other preparation customarily done at the mine or well site or as a part of extraction activity. (Mineral preparation plants are usually operated

together with mines or quarries.) Exploration for minerals is included as is the development of mineral properties.

The principal governmental sources of these data are the *Minerals Yearbook* and *Mineral Commodity Summaries*, published by the U.S. Geological Survey, Department of the Interior, and various monthly and annual publications of the Energy Information Administration, Department of Energy. See text, Section 19, for a list of Department of Energy publications. In addition, the Census Bureau conducts a census of mineral industries every 5 years (1997 results are in the process of being released). Nongovernment sources include the *Annual Statistical Report* of the American Iron and Steel Institute, Washington, DC; *Metals Week* and the monthly *Engineering and Mining Journal*, issued by the McGraw-Hill Publishing Co., New York, NY; *The Iron Age*, issued weekly by the Chilton Co., Philadelphia, PA; and the *Joint Association Survey of the U.S. Oil and Gas Industry*, conducted jointly by the American Petroleum Institute, Independent Petroleum Association of America, and Mid-Continent Oil and Gas Association.

Mineral statistics, with principal emphasis on commodity detail, have been collected by the U.S. Geological Survey and the former Bureau of Mines since 1880. Current data in U.S. Geological Survey

publications include quantity and value of nonfuel minerals produced, sold or used by producers, or shipped; quantity of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials.

Censuses of mineral industries have been conducted by the Census Bureau at various intervals since 1840. Beginning with the 1967 census, legislation provides for a census to be conducted every 5 years for years ending in "2" and "7." The censuses provide, for the various types of mineral establishments, information on operating costs, capital expenditures, labor, equipment, and energy requirements in relation to their value of shipments and other receipts. Commodity statistics on many manufactured mineral products are also collected by the Census Bureau at monthly, quarterly, or annual intervals and issued in its *Current Industrial Reports* series.

In general, figures shown in the individual commodity tables include data for outlying areas and may therefore not agree with summary tables. Except for crude petroleum and refined products, the export and import figures include foreign trade passing through the customs districts of United States and Puerto Rico but exclude shipments between U.S. territories and the customs districts.

# No. 1147. Gross Domestic Product of Agriculture, Forestry, Fishing, Mining, and Timber-Related Industries in Current and Real (1992) Dollars, by Industry: 1990 to 1997

[In billions of dollars (5,743.8 represents \$5,743,800,000,000), except as indicated. Industry classifications based on the 1987 Standard Industrial Classification (SIC). Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product; corporate profits and capital consumption allowances have been shifted from a company to an establishment basis]

NA Not available. <sup>1</sup> Timberland is forest land that is producing or is capable of crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as timberland have the capability of producing in excess of 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included. <sup>2</sup> Includes Indian lands. <sup>3</sup> Sawtimber is timber suitable for sawing into lumber. Live trees of commercial species containing at least one 12-foot sawlog or two noncontiguous 8-foot logs, and meeting regional specifications for freedom from defect. Softwood trees must be at least 9.0-inches diameter, and hardwood trees must be at least 11.0-inches diameter at 4 1/2 feet above ground. International 1/4-inch rule. <sup>4</sup> Live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0-inches diameter or larger at 4 1/2 feet above ground.

No. 1168. Mineral Production: 1990 to 1998

[Data represent production as measured by mine shipments, mine sales, or marketable production]

Mineral	Unit	1990	1995	1997	1998
FUEL MINERALS					
Coal, total	Mil. sh. tons	1,029.1	1,033.0	1,089.9	1,118.7
Bituminous	Mil. sh. tons	693.2	613.8	653.8	665.1
Subbituminous	Mil. sh. tons	244.3	328.0	345.1	363.6
Lignite	Mil. sh. tons	88.1	86.5	86.3	84.8
Anthracite	Mil. sh. tons	3.5	4.7	5.2	5.2
Natural gas (marketed production)	Tril. cu. ft.	18.59	19.51	19.87	19.94
Petroleum (crude)	Mil. bbl.	2,686	2,394	2,354.98	2,279
Uranium (recoverable content)	Mil. lb.	8.9	6.0	5.64	4.71
NONFUEL MINERALS					
Asbestos (sales)	1,000 metric tons	(D)	9.3	6.9	6.0
Barite, primary, sold/used by producers	1,000 metric tons	430	543	692	660
Boron minerals, sold or used by producers	1,000 metric tons	1,090	1,190	1,190	(NA)
Bromine, sold or used by producers	1,000 metric tons	177	218	247	234
Cement:					
Portland	Mil. metric tons	67.0	73.3	78.9	(NA)
Masonry	Mil. metric tons	2.9	3.6	(NA)	(NA)
Clays	1,000 metric tons	42,900	43,100	42,000	43,000
Diatomite	1,000 metric tons	631	722	773	767
Feldspar	1,000 metric tons	630	880	900	800
Fluorspar, finished shipments	1,000 metric tons	64	51	-	-
Garnet (abrasive)	1,000 metric tons	47.0	46.3	64.9	57
Gypsum, crude	Mil. metric tons	14.9	16.6	18.6	19.0
Helium	Mil. cu. meters	84.8	99	(NA)	(NA)
Lime, sold or used by producers	Mil. metric tons	15.8	18.5	19.7	20.4
Mica, scrap & flake, sold/used by producers	1,000 metric tons	109	108	114	81
Peat, sales by producers	1,000 metric tons	721	660	753	(NA)
Perlite, processed, sold or used	1,000 metric tons	576	700	706	828
Phosphate rock (marketable)	Mil. metric tons	46.3	43.5	43.3	44.6
Potash (K <sub>2</sub> O equivalent) sales	1,000 metric tons	1,710	1,480	1,400	1,300
Pumice & pumicite, producer sales	1,000 metric tons	443	529	577	616
Salt, common, sold/used by producers	Mil. metric tons	36.9	40.8	40.6	42.1
Sand & gravel, sold/used by producer	Mil. metric tons	855	935	981	1,049
Construction	Mil. metric tons	829	907	952	1,020
Industrial	Mil. metric tons	26	28.2	28.5	29.0
Silica	Metric tons	3,710	979	(NA)	(NA)
Sodium carbonate (natural) (soda ash)	1,000 metric tons	9,100	10,100	10,700	10,300
Sodium sulfate (natural)	1,000 metric tons	349	327	318	290
Stone	Mil. metric tons	1,110	2,420	2,600	2,580
Crushed and broken	Mil. metric tons	1,110	1,260	1,420	1,500
Dimension	1,000 metric tons	1,120	1,160	1,180	1,080
Sulfur: Frasch mines (shipments)	1,000 metric tons	3,680	(D)	(D)	(D)
Talc, and pyrophyllite, crude	1,000 metric tons	1,270	1,060	1,050	958
Tripoli	1,000 metric tons	81	80	(NA)	(NA)
Vermiculite concentrate	1,000 metric tons	209	171	(D)	(D)
METALS					
Antimony ore and concentrate	Metric tons	(D)	262	356	500
Aluminum	1,000 metric tons	4,048	3,375	3,603	3,700
Bauxite (dried)	1,000 metric tons	(D)	(D)	(NA)	(NA)
Copper (recoverable content)	1,000 metric tons	1,590	1,850	1,940	1,850
Gold (recoverable content)	Metric tons	294	317	360	350
Iron ore (gross weight)	Mil. metric tons	57.0	61.1	62.8	62.0
Lead (recoverable content)	1,000 metric tons	484	386	448	449
Magnesium metal	1,000 metric tons	139	142	125	117
Manganiferous ore (gross weight)	1,000 metric ton	(D)	(D)	(D)	(D)
Mercury	Metric tons	562	(D)	(D)	(D)
Molybdenum (concentrate)	1,000 metric tons	61.6	60.9	60.9	53.5
Nickel	1,000 metric tons	0.3	1.6	-	-
Palladium metal	Kilograms	5,930	5,260	8,400	10,500

# No. 1170. Nonfuel Mineral Commodities—Summary: 1997

Mineral	Unit	Mineral disposition			Consumption, apparent	Average price per unit (dollars)	Employment (number)
		Production	Exports	Net import reliance (percent)			
Aluminum . . . . .	1,000 metric tons . . . . .	5,300	1,600	23	6,900	20.75	18,000
Antimony (contained) . . . . .	Metric tons . . . . .	31,000	4,500	(NA)	(NA)	21.10	100
Asbestos . . . . .	1,000 metric tons . . . . .	9	13	38	21	(D)	30
Barite . . . . .	1,000 metric tons . . . . .	700	35	71	2,435	425.00	380
Bauxite and alumina . . . . .	1,000 metric tons . . . . .	(NA)	1,300	100	4,300	427.00	(NA)
Beryllium (contained) . . . . .	Metric tons . . . . .	210	45	(5)	205	28,927	425
Bismuth (contained) . . . . .	Metric tons . . . . .	(D)	200	(D)	(D)	23.50	30
Boron (B <sub>2</sub> O <sub>3</sub> content) . . . . .	1,000 metric tons . . . . .	622	(NA)	(5)	(NA)	4,7340	900
Bromine (contained) . . . . .	1,000 metric tons . . . . .	250	14	-	341	890.988	1,700
Cadmium (contained) . . . . .	Metric tons . . . . .	31,750	100	33	2,600	210.100	150
Cement . . . . .	1,000 metric tons . . . . .	80,900	850	14	93,602	474.50	17,900
Chromium . . . . .	1,000 metric tons . . . . .	11,124	33	76	513	412,150	(NA)
Clays . . . . .	1,000 metric tons . . . . .	43,900	4,970	(5)	39,000	(NA)	13,900
Cobalt (contained) . . . . .	Metric tons . . . . .	112,000	1,700	78	9,200	223.00	(NA)
Copper (Mine, contained) . . . . .	1,000 metric tons . . . . .	1,920	670	12	2,830	21.08	13,300
Diamond (industrial) . . . . .	Million carats . . . . .	135	139	(NA)	244	130.44	(NA)
Diatomite . . . . .	1,000 metric tons . . . . .	705	144	(5)	561	4252	1,000
Feldspar . . . . .	1,000 metric tons . . . . .	930	8	-	931	445.09	400
Fluorspar . . . . .	1,000 metric tons . . . . .	121	60	100	609	(NA)	-
Garnet (industrial) . . . . .	Metric tons . . . . .	71,000	13,000	(5)	59,000	450-2,000	250
Gemstones . . . . .	Million dollars . . . . .	67	2,700	99	5,370	(NA)	800
Germanium (contained) . . . . .	Kilograms . . . . .	20,000	(NA)	(NA)	30,000	8141.475	115
Gold (contained) . . . . .	Metric tons . . . . .	325	550	(5)	(NA)	15325	14,000
Graphite (crude) . . . . .	1,000 metric tons . . . . .	-	27	100	28	4167.16	(NA)
Gypsum (crude) . . . . .	1,000 short tons . . . . .	17,000	200	30	26,300	47.10	6,000
Iodine . . . . .	Metric tons . . . . .	1,330	2,400	65	3,700	814.60	40
Iron ore (usable) . . . . .	Million metric tons . . . . .	62	5	15	73.7	41730.41	7,500
Iron and steel scrap (metal) . . . . .	Million metric tons . . . . .	78	9	(5)	70	4124.00	38,000
Iron and steel slag (metal) . . . . .	1,000 metric tons . . . . .	21,000	3	1	21,400	47.00	2,500
Lead (contained) . . . . .	1,000 metric tons . . . . .	450	30	14	1,660	20,470	1,200
Lime . . . . .	1,000 metric tons . . . . .	19,300	58	1	19,500	455.40	5,700
Magnesium compounds . . . . .	1,000 metric tons . . . . .	400	55	33	595	(NA)	600
Magnesium metal . . . . .	1,000 metric tons . . . . .	190	40	10	166	2181.65	1,400
Manganese (gross weight) . . . . .	1,000 metric tons . . . . .	-	63	100	715	42.44	(NA)
Mercury . . . . .	Metric tons . . . . .	11400	60	(D)	(D)	200.00	(NA)
Mica, scrap and flake . . . . .	1,000 metric tons . . . . .	91	7	3	100	491.00	(NA)
Molybdenum (contained) . . . . .	Metric tons . . . . .	55,500	50,000	(5)	11,700	8.50	700
Nickel (contained) . . . . .	Metric tons . . . . .	16,100	17,300	54	150,000	46,931	4
Nitrogen (fixed)-ammonia . . . . .	1,000 metric tons . . . . .	13,000	500	14	15,100	4192	2,500
Peat . . . . .	1,000 metric tons . . . . .	500	20	58	1,200	426.00	800
Perlite . . . . .	1,000 metric tons . . . . .	703	38	11	790	431.82	140
Phosphate rock . . . . .	1,000 metric tons . . . . .	46,300	600	(5)	42,500	423.70	5,000
Platinum-group metals . . . . .	Kilograms . . . . .	10,800	60,100	(NA)	(NA)	219394.83	550
Potash (K <sub>2</sub> O equivalent) . . . . .	1,000 metric tons . . . . .	1,430	450	76	5,890	420.140	1,650
Pumice and pumicite . . . . .	1,000 metric tons . . . . .	538	13	21	680	426.29	70
Salt . . . . .	1,000 metric tons . . . . .	41,700	675	14	48,700	421120.00	4,150
Silicon (contained) . . . . .	1,000 metric tons . . . . .	424	41	34	637	2220.55	(NA)
Silver (contained) . . . . .	Metric tons . . . . .	1,600	3,000	(NA)	(NA)	4.62	1,400
Sodium carbonate (soda ash) . . . . .	1,000 metric tons . . . . .	10,400	4,000	(5)	6,480	23,105	2,800
Sodium sulfate . . . . .	1,000 metric tons . . . . .	320	80	12	659	24,114	240
Stone (crushed) . . . . .	Million metric tons . . . . .	1,390	4	-	1,397	455.55	78,000
Sulfur (all forms) . . . . .	1,000 metric tons . . . . .	11,900	730	11	13,500	42538.00	3,100
Talc . . . . .	1,000 metric tons . . . . .	1,060	197	(5)	955	4122	750
Tin (contained) . . . . .	Metric tons . . . . .	11,000	4,500	85	49,000	22.65	(NA)
Titanium dioxide . . . . .	1,000 metric tons . . . . .	1,330	368	(5)	1,150	2250.93	4,600
Tungsten (contained) . . . . .	Metric tons . . . . .	(D)	20	85	11,400	27.66	60
Vermiculite . . . . .	1,000 metric tons . . . . .	(D)	8	(D)	(D)	(D)	230
Zinc (contained) . . . . .	1,000 metric tons . . . . .	607	427	35	1,500	20810	2,700
Zirconium (ZrO <sub>2</sub> content) . . . . .	Metric tons . . . . .	(D)	26,590	(D)	(D)	428400	(NA)

- Represents or rounds to zero. <sup>1</sup> D Withheld to avoid disclosure. <sup>2</sup> NA Not available. <sup>3</sup> Calculated as a percent of apparent consumption. <sup>4</sup> Price per pound. <sup>5</sup> Refinery production. <sup>6</sup> Price per metric ton. <sup>7</sup> Net exporter. <sup>8</sup> Metal, vacuum-cast ingot. <sup>9</sup> Granulated pentahydrate borax in bulk, f.o.b. mine. <sup>10</sup> Dollars per kilogram. <sup>11</sup> Cents per kilogram, bulk, purified bromine. <sup>12</sup> 1- to 5-short ton lots. <sup>13</sup> Secondary production. <sup>14</sup> Turkish, chromite price. <sup>15</sup> Value of imports per carat. <sup>16</sup> Zone refined, first reduction quality. <sup>17</sup> Price per troy ounce. <sup>18</sup> Price of flake imports. <sup>19</sup> Delivered, No. 1 Heavy Melting composite price. <sup>20</sup> Year-end price. <sup>21</sup> Dealer price of platinum. <sup>22</sup> Price of K<sub>2</sub>O, muriate. <sup>23</sup> Vacuum and open pan, bulk, pellets and packaged, f.o.b. mine and plant. <sup>24</sup> Ferrosilicon, 50% Si. <sup>25</sup> Quoted year-end price, dense, bulk, f.o.b. No. 1174. Federal Strategic and Critical Materials Inventory: 1990 to 1997

[As of Dec. 31. Covers strategic and critical materials essential to military and industrial requirements in time of national emergency]

Mineral	Quantity <sup>1</sup>					Value (mil. dol.) <sup>2</sup>			
	Unit	1990	1995	1996	1997	1990	1995	1996	1997
Tin	1,000 metric ton	169	130	116	104	962	908	712	651
Silver	1,000 troy oz.	92,151	46,667	46,667	39,152	374	158	158	96
Cobalt	Mil. lb.	53	44	40	38	443	1,121	872	900
Bauxite <sup>3</sup>	1,000 lg. ton	18,033	16,032	15,380	14,006	888	203	207	111
Manganese <sup>4</sup>	1,000 sh. ton	4,017	2,817	2,683	2,691	962	464	464	330
Tungsten <sup>5</sup>	Mil. lb.	82	82	82	82	253	253	323	283
Zinc	1,000 sh. ton	379	301	286	244	483	281	272	256
Titanium	1,000 sh. ton	37	37	37	37	402	221	249	249
Platinum	1,000 troy oz.	453	453	432	440	186	154	134	162
Chromium <sup>6</sup>	1,000 sh. ton	1,074	1,192	1,145	1,128	917	839	980	1,125
Diamonds:									
Stones	Carat 1,000	7,777	5,135	4,655	3,751	267	52	78	99
Industrial, bort	Carat 1,000	17,353	1,967	816	62	16	8	4	4

<sup>1</sup> Consists of stockpile and nonstockpile grades and reflects uncommitted balances. <sup>2</sup> Mktgt values are estimated trade values of similar materials and not necessarily amounts that would be realized at time of sale. <sup>3</sup> Consists of abrasive grade, metallic grade Jamaica, metallic grade Suriname, and refractory. <sup>4</sup> Consists of chemical grade, dioxide battery natural, dioxide battery synthetic, electrolytic, ferro-high carbon, ferro-med. carbon, ferro-silicon, and metal. <sup>5</sup> Consists of carbide powder, ferro, metal powder, and ores and concentrates. <sup>6</sup> Consists of ferro-high carbon, ferro-low carbon, ferro-silicon, and metal.

## No. 1180. Crude Oil, Natural Gas, and Natural Gas Liquids—Reserves by State: 1990 and 1997

[As of December 31. Proved reserves are estimated quantities of the mineral, which geological and engineering data demonstrate with reasonable certainty, to be recoverable in future years from known reservoirs under existing economic and operating conditions. Indicated reserves of crude oil are quantities other than proved reserves, which may become economically recoverable from existing productive reservoirs through the application of improved recovery techniques using current technology. Based on a sample of operators of oil and gas wells]

## No. 1186. Coal and Coke—Summary: 1980 to 1998

(830 short tons represents 830,000,000 short tons). Includes coal consumed at mines. Demonstrated coal reserve base for United States on Jan. 1, 1997, was an estimated 508 billion tons. Recoverability varies between 40 and 90 percent for individual deposits; 50 percent or more of overall U.S. coal reserve base is believed to be recoverable]

## No. 1188. Demonstrated Coal Reserves, by Type of Coal and Major Producing State: 1997

[In millions of short tons (507,740 represents 507,740,000,000). As of January 1. The demonstrated reserve base represents the sum of coal in both measured and indicated resource categories of reliability. Measured resources of coal are estimates that have a high degree of geologic assurance from sample analyses and measurements from closely spaced and geological well known sample sites. Indicated resources are estimates based partly from sample and analyses and measurements and partly from reasonable geologic projections. For more information on the classification of coal resources and related terminology, see report cited below]

## Construction and Housing

This section presents data on the construction industry and on various indicators of its activity and costs; on housing units and their characteristics and occupants; and on the characteristics and vacancy rates for commercial buildings. This edition contains data from the newly released 1997 American Housing Survey.

The principal source of these data is the U.S. Census Bureau, which issues a variety of current publications. Construction statistics compiled by the Census Bureau appear in its monthly *Current Construction Reports* series with various quarterly or annual supplements; *Housing Starts* and *Housing Completions* present data by type of structure and by four major census regions; *New One-Family Houses Sold and For Sale* also provides statistics annually on physical and financial characteristics for all new housing by the four major census regions; *Price Index of New One-Family Houses Sold* presents quarterly figures and annual regional data; and *Housing Units Authorized by Building Permits* covers approximately 19,000 permit-issuing jurisdictions in the United States (prior to 1995, 17,000 places). Statistics on expenditures by owners of residential properties are issued quarterly and annually in *Expenditures for Residential Upkeep and Improvements*. *Value of New Construction Put in Place* presents data on all types of construction and includes monthly composite cost indexes. Reports of the censuses of construction industries (see below) are also issued on various topics.

Other Census Bureau publications include the *Current Housing Reports* series, which comprises the quarterly *Housing Vacancies*, the quarterly *Market Absorption of Apartments*, the biennial *American Housing Survey* (formerly *Annual Housing Survey*), and reports of the censuses of housing and of construction industries.

*Construction Review*, published quarterly by the International Trade Administration, U.S. Department of Commerce, contains many of the census series and other construction statistics series from the Federal Government and private agencies.

Other sources include the monthly *Dodge Construction Potentials* of F. W. Dodge Division, McGraw-Hill Information Systems Company, New York, NY, which presents national and state data on construction contracts; the National Association of Home Builders with state-level data on housing starts; the National Association of REALTORS, which presents data on existing home sales; the Society of Industrial and Office Realtors and Oncor International on commercial office and industrial space; the Bureau of Economic Analysis, which presents data on residential capital and gross housing product; and the U.S. Energy Information Administration, which provides data on commercial buildings through its periodic sample surveys.

**Censuses and surveys**—Censuses of the construction industry were first conducted by the Census Bureau for 1929, 1935, and 1939; beginning in 1967, a census has been taken every 5 years (for years ending in "2" and "7"). The latest complete reports are for 1992. The 1997 census results, part of the 1997 Economic Census, are being released on a flow basis. See Tables 1190 and 1191 for some preliminary data.

The census of construction industries, covers all employer establishments primarily engaged in (1) building construction by general contractors or operative builders; (2) heavy (nonbuilding) construction by general contractors; and (3) construction by special trade contractors. The 1997 census was conducted in accordance with the 1997 *North American Industry Classification System* (NAICS); the 1992 census was conducted in accordance with the

1987 *Standard Industrial Classification* (SIC). This sector now includes construction management and land subdividers and developers, not included previously. See text, Section 17, Business, for general information on the SIC and NAICS.

From 1850 through 1930, the Census Bureau collected some housing data as part of its censuses of population and agriculture. Beginning in 1940, separate censuses of housing have been taken at 10-year intervals. For the 1970 and 1980 censuses, data on year-round housing units were collected and issued on occupancy and structural characteristics, plumbing facilities, value, and rent; for 1990 such characteristics were presented for all housing units.

The American Housing Survey (*Current Housing Reports* Series H-150 and H-170), which began in 1973, provided an annual and ongoing series of data on selected housing and demographic characteristics until 1983. In 1984, the name of the survey was changed from the Annual Housing Survey. Currently, national data are collected every other year, and data for selected metropolitan areas are collected on a rotating basis. All samples represent a cross section of the housing stock in their respective areas. Estimates are subject to

both sampling and nonsampling errors; caution should therefore be used in making comparisons between years.

Data on residential mortgages were collected continuously from 1890 to 1970, except 1930, as part of the decennial census by the Census Bureau. Since 1973, mortgage status data, limited to single family homes on less than 10 acres with no business on the property, have been presented in the American Housing Survey. Data on mortgage activity are covered in Section 16, Banking.

**Housing units**—In general, a housing unit is a group of rooms or a single room occupied or intended for occupancy as separate living quarters; that is, the occupants do not live and eat with any other persons in the structure, and there is direct access from the outside or through a common hall. Transient accommodations, barracks for workers, and institutional-type quarters are not counted as housing units.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

## No. 1190. Construction—Summary (SIC Basis): 1992 and 1997

[Preliminary. For establishments with payroll (\$59,085 represents \$539,085,000,000). See Tables 872 and 873 in Section 17, Business, for more 1997 Economic Census data]

## No. 1192. Construction Materials—Producer Price Indexes: 1990 to 1998

[1982=100, except as noted. For discussion of producer price index, see text, Section 15, Prices. This index, more formally known as the special commodity grouping index for construction materials, covers materials incorporated as integral part of a building or normally installed during construction and not readily removable. Excludes consumer durables such as kitchen ranges, refrigerators, etc. This index is not the same as the stage-of-processing index of intermediate materials and components for construction]

Commodity	1990	1991	1992	1993	1994	1995	1996	1997	1998 <sup>1</sup>
<b>Construction materials</b> . . . . .	<b>119.6</b>	<b>120.4</b>	<b>122.5</b>	<b>128.6</b>	<b>133.8</b>	<b>138.8</b>	<b>139.6</b>	<b>142.1</b>	<b>141.4</b>
Interior solvent based paint . . . . .	133.0	140.2	141.7	142.9	148.1	164.5	175.6	180.5	185.7
Plastic construction products . . . . .	117.2	115.1	112.7	116.6	122.9	133.8	130.9	128.2	126.2

## No. 1193. Price and Cost Indexes for Construction: 1980 to 1998

[1992=100. Excludes Alaska and Hawaii. Indexes of certain of these sources are published on bases different from those shown here]

Name of index	1980	1985	1990	1993	1994	1995	1996	1997	1998
U.S. Census Bureau:									
Composite fixed-weighted <sup>1</sup>	68.6	82.9	98.5	103.7	108.0	112.5	115.0	118.7	122.0
Implicit price deflator <sup>2</sup>	67.8	81.8	97.8	103.8	108.1	112.6	115.2	118.9	122.2
U.S. Census Bureau houses under construction: <sup>3</sup>									
Fixed-weighted	67.6	81.4	98.6	104.9	109.7	114.4	116.4	119.9	123.3
Price deflator	66.4	79.6	97.2	104.8	109.5	114.3	116.5	119.9	123.0
Federal Highway Administration, composite <sup>4</sup>	92.5	97.1	103.2	103.0	109.5	115.9	116.1	124.7	122.2
Bureau of Reclamation composite <sup>5</sup>	70	84	98	103	106	110	112	116	118
Turner Construction Co., Building construction <sup>6</sup>	61	83	98	102	105	109	112	117	122
E. H. Boeckh, building cost index:									
Residences	(NA)	82.4	94.2	103.9	107.4	111.0	112.9	115.8	118.1
Apartments, hotels, and office buildings	(NA)	83.8	94.9	102.8	105.6	109.0	111.1	113.9	116.2
Commercial and factory buildings	(NA)	82.3	94.4	102.6	105.7	108.3	110.7	114.7	116.6
Engineering News-Record: <sup>8</sup>									
Buildings	68.5	85.7	95.4	105.7	109.8	109.8	113.0	118.7	119.7
Construction	64.9	84.2	94.9	104.5	108.5	109.8	112.8	116.9	118.8
Handy-Whitman public utility: <sup>9</sup>									
Buildings <sup>10</sup>	78	90	101	105	112	115	118	122	123
Electric	68	83	97	103	107	111	112	115	117
Gas	67	85	96	103	109	111	112	115	117
Water <sup>11</sup>	73	88	98	104	109	112	115	118	120
C. A. Turner Telephone Plant <sup>12</sup>	90	89	99	102	103	110	115	117	117

NA Not available. <sup>1</sup> Weighted average of the various indexes used to deflate the Construction Put in Place series. In calculating the index, the weights (i.e., the composition of current dollar estimates in 1992 by category) are held constant.

<sup>2</sup> Derived ratio of total current to constant dollar Construction Put in Place (multiplied by 100). <sup>3</sup> Excludes value of site. <sup>4</sup> Based on average contract unit bid prices for composite mile (involving specific average amounts of excavation, paving, reinforcing steel, structural steel, and structural concrete). <sup>5</sup> Derived from the four quarterly indexes which are weighted averages of costs of labor, materials, and equipment for the construction of dams and reclamation projects. <sup>6</sup> Based on firm's cost experience with respect to labor rates, materials prices, competitive conditions, efficiency of plant and management, and productivity. <sup>7</sup> Average of 20 cities for types shown. <sup>8</sup> Weights based on surveys of building costs. Wage rates used for both common and skilled labor.

<sup>9</sup> Building construction index computed on the basis of a hypothetical unit of construction requiring 6 bbl. of portland cement, 1.088 M bbl. ft. of 2" x 4" lumber, 2,500 lb. of structural steel, and 68.38 hours of skilled labor. General construction index based on same materials components combined with 200 hours of common labor. <sup>10</sup> Based on data covering public utility construction costs in six geographic regions. Covers skilled and common labor. <sup>11</sup> As derived by U.S. Census Bureau. Covers steam generation plants only. <sup>12</sup> As derived by U.S. Census Bureau. Reflects costs for structures and improvements at water pumping and treatment plants. <sup>13</sup> Computed by the Census Bureau by averaging the weighted component indexes published for six geographic regions.

## No. 1194. Value of New Construction Put in Place: 1964 to 1998

[In millions of dollars (75,097 represents \$75,097,000,000). Represents value of construction put in place during year; differs from building permit and construction contract data in timing and coverage. Includes installed cost of normal building service equipment and selected types of industrial production equipment (largely site fabricated). Excludes cost of shipbuilding, land, and most types of machinery and equipment. For methodology, see Appendix III]

## No. 1201. Characteristics of New Privately Owned One-Family Houses Completed: 1970 to 1998

[Percent distribution, except as indicated (793 represents 793,000). Data beginning 1980 show percent distribution of characteristics for all houses completed (includes new houses completed, houses built for sale completed, contractor-built and owner-built houses completed, and houses completed for rent). Data for 1970 cover contractor-built, owner-built, and houses for rent for year construction started and houses sold for year of sale. Percents exclude houses for which characteristics specified were not reported]

## No. 1220. Debt Status of Homeowners, by Selected Characteristic: 1997

[In percent. See headnote, Table 821]

Homeowner characteristic	All homeowners	No mortgage debt	First mortgage only <sup>1</sup>	Home equity line of credit	Traditional home equity loan	Either type of home equity loan
<b>All homeowners</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>
Age of head:						
18 to 34 years old	16	7	24	5	23	12
35 to 44 years old	23	9	31	28	32	30
45 to 54 years old	20	12	24	34	27	31
55 to 64 years old	16	18	13	20	11	17
65 years old and over	26	55	8	12	6	10
Family income:						
Less than \$15,000	10	20	4	2	2	2
\$15,000 to \$24,999	16	26	11	3	6	4
\$25,000 to \$49,999	34	32	38	25	32	27
\$50,000 to \$74,999	23	12	26	38	42	39
\$75,000 to \$99,999	10	5	13	16	8	14
\$100,000 or more	8	5	8	16	11	14
Home equity <sup>2</sup> :						
Less than \$50,000	41	24	55	21	69	38
\$50,000 to \$99,999	33	38	29	40	21	34
\$100,000 or more	26	37	16	39	10	28

<sup>1</sup> Excludes those who have only a home equity line of credit. <sup>2</sup> Home equity consists of the market value of the home less all debts secured by the home, including balances outstanding on equity lines of credit and traditional home equity loans.

# No. 1228. Commercial Buildings—Selected Characteristics, by Square Footage of Floorspace: 1995

[Excludes buildings 1,000 square feet or smaller (4,579 represents 4,579,000). Building type based on predominant activity in which the occupants were engaged. Based on a sample survey of building representatives conducted between August and December 1995; therefore, subject to sampling variability. For composition of regions, see map inside front cover]

Characteristic	Number of buildings (1,000)	Floorspace (mil. sq. ft.)							Mean sq. ft. per building (1,000)	Median sq. ft. per building (1,000)
		Total	Within buildings having square footage of—							
			5,000 or less	5,001 to 10,000	10,001 to 25,000	25,001 to 50,000	50,001 to 100,000	100,001 and over

**Manufacturers Shipments, and New Orders: 1990 to 1997**

Source: Chart prepared by U.S. Census Bureau. For data, see Table 1237.

## Manufactures

This section presents summary data for manufacturing as a whole and more detailed information for major industry groups and selected products. The types of measures shown at the different levels include data for establishments, employment and wages, plant and equipment expenditures, value and quantity of production and shipments, value added by manufacture, inventories, and various indicators of financial status.

The principal sources of these data are U.S. Census Bureau reports of the censuses of manufactures conducted every 5 years, the *Annual Survey of Manufactures*, and *Manufacturing Profiles*, an annual compilation of the formerly printed series of *Current Industrial Reports*. Indexes of industrial production are presented monthly in the Federal Reserve Board's *Federal Reserve Bulletin*. These numbers were recently changed to a new index base year (1992 = 100) as of early 1997. Reports on current activities of industries or current movements of individual commodities are compiled by such government agencies as the Bureau of Labor Statistics; the Economic research Service of the Department of Agriculture; the International Trade Administration; and by private research or trade associations such as The Conference Board, Inc., the American Iron and Steel Institute, the Electronic Industries Association, and several others.

Data on financial aspects of manufacturing industries are collected by the Bureau of Economic Analysis (BEA) and the Census Bureau. Industry aggregates in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and amounts of security issues are published for leading manufacturing corporations registered with the Securities and Exchange Commission. The BEA issues

data on capital in manufacturing industries and capacity utilization rates in manufacturing. See also Section 17, Business Enterprise.

**Censuses and annual surveys**—The first census of manufactures covered the year 1809. Between 1809 and 1963, a census was conducted at periodic intervals. Since 1967, it has been taken every 5 years (for years ending in "2" and "7"). Results from the 1997 census are expected in 1999 and 2000. Census data, either direct reports or estimates from administrative records, are obtained for every manufacturing plant with one paid employee or more. The *Annual Survey of Manufactures (ASM)*, conducted for the first time in 1949, collects data for the years between censuses for the more general measure of manufacturing activity covered in detail by the censuses. The annual survey data are estimates derived from a scientifically selected sample of establishments. The 1996 annual survey is based on a sample of about 58,000 establishments of an approximate total of 230,000. These establishments represent all manufacturing establishments of multiunit companies and all single-establishment manufacturing companies mailed schedules in the 1992 Census of Manufactures. For the current panel of the ASM sample, all establishments of companies with 1992 shipments in manufacturing in excess of \$500 million were included in the survey with certainty. For the remaining portion of the mail survey, the establishment was defined as the sampling unit. For this portion, all establishments with 250 employees or more and establishments with a very large value of shipments also were included. Therefore, of the 58,000 establishments included in the ASM panel, approximately 33,000 are selected with certainty. These establishments account for approximately 80 percent of total

value of shipments in the 1992 census. Smaller establishments in the remaining portion of the mail survey were selected by sample.

**Establishments and classification—**

The censuses of manufactures for 1947 through 1992 cover operating manufacturing establishments as defined in the *Standard Industrial Classification Manual (SIC)*, issued by the U.S. Office of Management and Budget (see text, Section 13). The Manual is also used for classifying establishments in the annual surveys. The comparability of manufactures data over time is affected by changes in the official definitions of industries as presented in the Manual. It is important to note, therefore, that the 1987 edition of the Manual was used for the 1987 and 1992 censuses; and the 1972 edition of the Manual and the 1977 Supplement were used for the 1972 through 1982 censuses. This Manual defines an industry as a number of establishments producing a single product or a closely related group of products. In the main, an establishment is classified in a particular industry if its production of a product or product group exceeds in value added its production of any other product group. While some establishments produce only the products of the industry in which they are classified, few within an industry specialize to that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect both the primary and secondary activities of the establishments in that industry. For this reason, care should be exercised in

relating such statistics to the total shipments figures of products primary to the industry. Beginning with 1997 census, the Manual will be replaced with a new way of organizing economic statistics called the North American Industry Classification System (NAICS) (see Table 1245 as an example and the new *North American Industry Classification System (NAICS) - United States, 1997*.

**Establishment**—Establishment signifies a single physical plant site or factory. It is not necessarily identical to the business unit or company, which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payroll and inventory records is also required to submit separate reports.

**Durable goods**—Items with a normal life expectancy of 3 years or more. Automobiles, furniture, household appliances, and mobile homes are common examples.

**Nondurable goods**—Items which generally last for only a short time (3 years or less). Food, beverages, clothing, shoes, and gasoline are common examples.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

# No. 1231. Gross Domestic Product in Manufacturing in Current and Real (1992) Dollars, by Industry: 1990 to 1997

(In billions of dollars (5,743.8 represents \$5,743,837,000,000). Data are based on the 1987 Standard Industrial Classification (SIC). Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product; corporate profits and capital consumption allowances have been shifted from a company to an establishment basis)

<sup>1</sup> Represents the average of production workers plus all other employees for the payroll period ended nearest the 15th of March.

Note: Reports for manufacturing industries for 1997 from the 1997 Economic Census are being issued on a flow basis beginning in the summer of 1999.

<sup>1</sup> Includes employment and payroll at administrative offices and auxiliary units. All employees represents the average of production workers plus all other employees for the payroll period ended nearest the 12th of March. Production workers represents the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November. <sup>2</sup> Adjusted value added: takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year. <sup>3</sup> Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification.

Note: Reports for manufacturing by state for 1997 from the 1997 *Economic Census* are being issued on a flow basis beginning in the summer of 1999.

## No. 1241. Index of Manufacturing Capacity: 1980 to 1998

[1992 output=100. Annual figures are averages of quarterly data. Capacity represents estimated quantity of output relative to output in 1992 which the *current* stock of plant and equipment in manufacturing industries was capable of producing. Primary processing industries comprise textiles, lumber, paper and pulp, petroleum, rubber, stone, clay, glass, primary metals, fabricated metals, and a portion of chemicals. Advanced processing industries comprise chemical products, food, beverages, tobacco, apparel, furniture, printing and publishing, leather, machinery, transportation equipment, instruments, ordnance, and miscellaneous industry groups]

Year	Relation of output to capacity (percent)				Year	Relation of output to capacity (percent)			
	Index of capacity	All manufacturing	Primary processing	Advanced processing		Index of capacity	All manufacturing	Primary processing	Advanced processing
1980 . . . .	95	79	77	81	1990 . . . .	121	81	84	80
1981 . . . .	98	78	77	79	1991 . . . .	123	78	80	77
1982 . . . .	100	72	69	73	1992 . . . .	126	79	82	78
1983 . . . .	102	74	74	74	1993 . . . .	129	80	84	79
1984 . . . .	105	80	80	80	1994 . . . .	133	83	87	81
1985 . . . .	109	79	79	79	1995 . . . .	140	83	86	81
1986 . . . .	112	79	80	78	1996 . . . .	149	81	85	80
1987 . . . .	114	81	84	80	1997 . . . .	158	82	85	81
1988 . . . .	116	84	87	82	1998 . . . .	167	81	84	80
1989 . . . .	118	84	86	82

**No. 1248. Broadwoven and Knit Fabrics—Shipments, Foreign Trade, and Apparent Consumption: 1997**

[4,246,048 represents 4,246,048,000. Fabric blends as shown in the CIF report, MQ22T are reported based on the chief weight of the fiber, whereas, fabrics blends as shown for imports are based on the chief value of the fiber. Apparent consumption represents new domestic supply and is derived by subtracting exports for the total manufacturers' shipments plus imports]

Product description	Manufacturers' shipments (quantity)	Imports for consumption		Percent imports to manufacturers' shipments	Exports of domestic merchandise		Percent exports to manufacturers' shipments	Apparent consumption (quantity)

<sup>1</sup> Includes man-made fiber top converted from tow without combing. A number of companies were added for 1990 based on information in the 1987 Census of Manufactures. Data were received from these companies for 1990; therefore, the information shown for years prior to 1990 may not be directly comparable. These changes represent approximately 20 percent of the total fibers consumed on the woolen system and worsted combing. <sup>2</sup> Data are shown on a scoured basis for greasy wool. <sup>3</sup> Shorn and pulled wool of sheep excludes raw wool consumed in cotton system spinning to avoid disclosing figures for individual companies. <sup>4</sup> Includes reprocessed and reused wool, mohair, alpaca, vicuna, and other specialty fibers as well as tops and noils consumed in woolen spinning and mohair consumed in worsted combing. Does not include wool tops consumed in cotton system spinning.

Source: U.S. Census Bureau, 1990 and 1992, *Current Industrial Reports*, MA22K, MA22Q, and MQ23X, annual; thereafter, *Manufacturing Profiles*, Series MP, annual.

No. 1253. Glass Containers, Clay Construction Products, and Refractories—Shipments: 1990 to 1997

[In millions of dollars (285 represents 285,000,000)]

## No. 1255. Iron and Steel Industry—Summary: 1990 to 1998

[For financial data, the universe in 1992 consists of the companies that produced 68 percent of the total reported raw steel production. The financial data represent the operations of the steel segment of the companies. Minus sign (-) indicates net loss]

Item	Unit	1990	1992	1993	1994	1995	1996	1997	1998
Steel mill products, apparent supply	Mil. tons <sup>1</sup>	97.8	95.0	104.6	121.3	114.8	125.0	131.0	(NA)
Net shipments	Mil. tons <sup>1</sup>	85.0	82.2	89.0	95.1	97.5	100.9	105.9	102.1
Exports	Mil. tons <sup>1</sup>	4.3	4.3	4.0	3.8	7.1	5.0	6.0	5.5
Imports	Mil. tons <sup>1</sup>	17.2	17.1	19.5	30.1	24.4	29.2	31.2	41.5
Scrap consumed	Mil. tons	50.1	51.9	58.5	60.0	62.0	62.0	64.0	(NA)
Scrap inventory	Mil. tons	3.6	3.3	3.6	4.0	4.1	5.3	5.0	(NA)
Iron and steel products: Exports	Mil. tons <sup>1</sup>	5.3	5.3	4.7	4.9	8.2	6.2	7.4	(NA)
Imports	Mil. tons <sup>1</sup>	21.9	21.9	21.8	32.7	27.3	32.1	34.4	(NA)
Capacity by steelmaking process	Mil. net tons	116.7	113.1	109.9	108.2	112.4	116.1	121.4	(NA)
Revenue	Bil. dol.	30.9	26.9	29.5	34.1	35.1	35.0	35.9	(NA)
Net income	Bil. dol.	0.1	-4.1	1.9	1.3	1.5	0.4	1.1	(NA)
Stockholders' equity	Bil. dol.	2.1	2.8	-0.6	3.7	7.4	10.2	10.9	(NA)
Total assets	Bil. dol.	28.3	28.8	30.6	34.3	35.1	35.8	37.0	(NA)
Capital expenditures	Bil. dol.	2.6	1.8	1.5	2.2	2.5	2.3	2.6	(NA)
Working capital ratio <sup>2</sup>	Ratio	1.8	1.4	1.5	1.5	1.6	1.7	1.6	(NA)
Inventories	Bil. dol.	4.7	4.5	4.6	5.0	5.1	5.4	5.6	(NA)
Average employment	1,000	164	140	127	126	123	119	112	(NA)
Hours worked	Million	350	293	274	273	269	259	247	(NA)
Index of output, all employees <sup>3</sup>	1987=100	109.6	117.1	133.5	142.4	142.7	153.6	(NA)	(NA)
Producer price indexes: <sup>4</sup>									
Iron and steel, total	1982=100	117.2	111.5	116.0	122.0	128.8	125.8	126.5	122.6
Steel mill products	1982=100	112.1	106.4	108.2	113.4	120.1	115.6	116.4	113.9

## No. 1256. Raw Steel, Pig Iron, and Ferroalloys Production: 1990 to 1998

[In millions (849.4 represents 849,400,000), except percent]

Item	1990	1992	1993	1994	1995	1996	1997	1998, prel.
Raw steel (net tons):								
World production	849.4	797.0	802.0	799.6	829.4	826.9	874.9	(NA)
U.S. production	98.9	92.9	97.9	100.6	104.9	105.3	108.6	107.6
Percent of world	11.6	11.8	12.2	12.6	12.6	12.7	12.4	(NA)
Furnace:								
Basic oxygen process	58.5	57.6	59.3	61.0	62.5	60.4	61.1	59.7
Electric	36.9	35.3	38.5	39.6	42.4	44.9	47.5	48.0
Open hearth	3.5	-	-	-	-	-	-	-
Grade:								
Carbon	86.6	82.5	86.9	89.5	92.7	93.6	95.9	(NA)
Alloy and stainless	12.3	10.4	11.0	11.1	12.3	11.7	12.6	(NA)
Pig iron and ferroalloys production (sh. tons)	54.8	52.2	53.1	54.4	56.1	54.5	54.7	53.2

- Represents or rounds to zero. NA Not available.

## No. 1257. Steel Products—Net Shipments, by Market Classes: 1990 to 1998

[In thousands of short tons (84,981 represents 84,981,000). Comprises carbon, alloy, and stainless steel]

Market class	1990	1992	1993	1994	1995	1996	1997	1998, prel.
Total <sup>1</sup>	84,981	82,241	89,022	95,084	97,494	100,878	105,858	102,143
Automotive	11,100	11,092	12,719	14,753	14,622	14,665	15,251	(NA)
Steel service centers, distributors	21,111	21,328	23,714	24,153	23,751	27,124	27,800	(NA)
Construction, incl. maintenance <sup>2</sup>	9,245	9,536	13,429	10,935	14,892	15,561	15,885	(NA)
Containers, packaging, shipping	4,474	3,974	4,355	4,495	4,139	4,101	4,163	(NA)
Machinery, industrial equipment, tools	2,388	1,951	2,191	2,427	2,310	2,410	2,355	(NA)
Steel for converting and processing	9,441	9,226	9,451	10,502	10,440	10,245	11,263	(NA)
Rail transportation	1,080	1,052	1,223	1,248	1,373	1,400	1,410	(NA)
Contractors' products	2,870	2,694	2,913	3,348	( <sup>c</sup> )	( <sup>c</sup> )	( <sup>c</sup> )	( <sup>c</sup> )
Oil and gas industries	1,892	1,454	1,526	1,703	2,643	3,254	3,811	(NA)
Electrical equipment	2,453	2,136	2,213	2,299	2,397	2,401	2,434	(NA)
Appliances, utensils, and cutlery	1,540	1,503	1,592	1,736	1,589	1,713	1,635	(NA)

<sup>1</sup> Includes nonclassified shipments and other classes not shown separately. <sup>2</sup> Beginning 1994, contractors' products included with construction.

## Domestic Trade and Services

This section presents statistics relating to the distributive trades and service industries. Data shown for the trades, classified by kind of business, and for the various categories of services (e.g., personal, business, repair, hotel) cover sales or receipts, establishments, employees, payrolls, and other items. The principal sources of these data are census reports and survey reports of the U.S. Census Bureau. Data on gross product in trade and service industries usually appear in the *Survey of Current Business*, issued by the U.S. Bureau of Economic Analysis. Financial data for firms engaged in retail, wholesale, or service activities appear in the annual *Statistics of Income*, published by the Internal Revenue Service.

**Censuses**—Censuses of retail trade and wholesale trade have been taken at various intervals since 1929. Limited coverage of the service industries started in 1933. Beginning with the 1967 census, legislation provides for a census of each area to be conducted every 5 years (for years ending in "2" and "7"). The industries covered in the censuses and surveys of business are those classified in three divisions defined in the *Standard Industrial Classification Manual* (see text, Section 13). *Retail trade* refers to places of business primarily engaged in selling merchandise for personal or household consumption; *wholesale trade*, to establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business and farm uses; and *services*, to establishments primarily engaged in providing a wide range of services for individuals and for businesses.

Beginning with the 1954 Censuses of Retail Trade and Service industries, data for nonemployer establishments are included

and published separately. The census of wholesale trade excludes establishments with no paid employees. Beginning in 1977, sales taxes and finance charges are excluded from sales (or receipt) figures of the three censuses. In 1982 and prior censuses, the count of establishments represented the number in business at the end of the year. Beginning 1987, the count of establishments represents those in business at any time during the year.

For the 1987 and 1992 Censuses of Service Industries, hospitals operated by governmental organizations are included. Government-operated facilities in other service kind-of-business classifications are excluded from the census. In 1987 and 1992, data were not collected for elementary and secondary schools, colleges and universities, labor unions and similar organizations, and political organizations.

The census of retail trade beginning in 1977, excludes nonemployer direct sellers. Beginning 1982, the census treated each leased department in a store as a separate establishment and classified it according to the kind of business it conducted. In prior years, data for leased departments were consolidated with the data for stores in which they were located.

**Current surveys**—Current sample surveys conducted by the Census Bureau cover various aspects of the retail and wholesale trade and selected service industries. Its *Monthly Retail Trade Report* contains monthly estimates of sales, inventories, and inventory/sales ratios, purchases, and accounts receivable for the United States, by kind of business. Annual figures on sales, year-end inventories, and sales/inventory ratios,

by kind of business, appear in the *Annual Benchmark Report for Retail Trade*.

Statistics from the Bureau's monthly wholesale trade survey include national estimates of merchant wholesalers' sales, inventories, and stock-sales ratios by major summary groups—durable and nondurable—and selected kinds of business. Merchant wholesalers are those wholesalers who take title to the goods they sell (e.g., jobbers, exporters, importers, major distributors). These data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale Trade Report*. Annual figures on sales, sales-inventory ratios, year-end inventories, and purchases appear in the *Annual Benchmark Report for Wholesale Trade*.

The *Service Annual Survey* provides annual estimates of nationwide receipts for selected personal, business, leasing and repair, amusement and entertainment, social and health, and other professional service industries in the United States. For selected accommodation, social, health, and other professional service industries, separate estimates are developed for receipts of taxable firms and revenue and expenses for firms and organizations exempt from Federal income taxes. The estimates for tax exempt firms in these industries are derived from a sample of employer firms only. All other estimates represent the combined total for employer and nonemployer firms.

The *Transportation Annual Survey* provides annual, nationwide estimates of

detailed revenue and expenses for firms engaged in providing commercial motor freight transportation or public warehousing services. This includes firms furnishing local or long distance trucking or transfer services or in storage of farm products, furniture or household goods, or commercial goods of any nature. The survey excludes private trucking and owner-operators with no paid employees.

The *Annual Survey of Communication Services* provides detailed nationwide estimates of detailed revenue and expenses for employer firms primarily engaged in providing telephone, radio and television broadcasting, cable television, or other communication services.

For the current sample survey programs, retail trade coverage is the same as for the census; wholesale trade coverage is limited to merchant wholesalers, and selected services coverage is less inclusive than the census.

Estimates obtained from annual and monthly surveys are based on sample data and are not expected to agree exactly with results that would be obtained from a complete census of all establishments. Data include estimates for sampling units not reporting.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

# **No. 1273. Gross Domestic Product in Domestic Trade and Service Industries in Current and Real (1992) Dollars: 1990 to 1996**

[In billions of dollars (870.7 represents \$870,700,000,000), except percent. For definition of gross domestic product, see text, Section 14, Based on 1987 Standard Industrial Classification]

No. 1288. U.S. Mail Order Sales, by Kind of Business: 1990 to 1995

[In millions of dollars (151,640 represents \$151,640,000,000). Mail order sales represent orders placed by mail, phone, or electronically without the person ordering coming to the point of sale to place the order, or the seller coming to the office or home of the orderer to take the order or using an agent to collect the order. Excludes orders placed at catalog desks or elsewhere in stores even in response to a catalog but does include products or services delivered in the store as long as the order was placed by mail, phone, or electronically. Statistics are generated independently each year and are not adjusted for any discontinuities of available data]

Kind of business	1990	1991	1992	1993	1994	1995

**No. 1292. Shopping Centers—Number, Gross Leasable Area, and Retail Sales, by Gross Leasable Area: 1990 to 1998**

[As of December 31. A shopping center is a group of architecturally unified commercial establishments built on a site that is planned, developed, owned, and managed as an operating unit related in its location, size, and type of shops to the trade area that the unit serves. The unit provides on-site parking in definite relationship to the types and total size of the stores. The data base attempts to include all centers with three or more stores. Estimates are based on a sample of data available on shopping center properties; for details, contact source]

Year	Gross leasable area (sq. ft.)						
	Total	Less than 100,001	100,001-200,000	200,001-400,000	400,001-800,000	800,001-1,000,000	More than 1 million
NUMBER							
1990	36,515	23,231	8,756	2,781	1,102	288	357

## Foreign Commerce and Aid

This section presents data on the flow of goods, services, and capital between the United States and other countries; changes in official reserve assets of the United States; international investments; and foreign assistance programs.

The Bureau of Economic Analysis publishes current figures on U.S. international transactions and the U.S. international investment position in its monthly *Survey of Current Business*. Statistics for the foreign aid programs are presented by the Agency for International Development (AID) in its annual *U.S. Overseas Loans and Grants and Assistance from International Organizations* and by the Department of Agriculture in its *Foreign Agricultural Trade of the United States*.

The principal source of merchandise import and export data is the U.S. Census Bureau. Current data are presented monthly in *U.S. International Trade in Goods and Services* report Series FT 900. Census Bureau *Catalog & Guide* and the *Guide to Foreign Trade Statistics* lists the Bureau's monthly and annual products and services in this field. In addition, the International Trade Administration and the Bureau of Economic Analysis present summary as well as selected commodity and country data for U.S. foreign trade in the *U.S. Foreign Trade Highlights* and the *Survey of Current Business*, respectively. The merchandise trade data in the latter source include balance of payments adjustments to the Census Bureau data. The Treasury Department's *Monthly Treasury Statement of Receipts and Outlays of the United States Government* contains information on import duties.

**International accounts**—The international transactions tables (Nos. 1307 to 1309) show, for given time periods, the transfer of goods, services, grants, and financial assets and liabilities between the

United States and the rest of the world. The international investment position table (No. 1310) presents, for specific dates, the value of U.S. investments abroad and of foreign investments in the United States. The movement of foreign and U.S. capital as presented in the balance of payments is not the only factor affecting the total value of foreign investments. Among the other factors are changes in the valuation of assets or liabilities, including changes in prices of securities, defaults, expropriations, and write-offs.

Direct investment abroad means the ownership or control, directly or indirectly, by one person or 10 percent or more of the voting securities of an incorporated business enterprise or an equivalent interest in an unincorporated business enterprise. Direct investment position is the value of U.S. parents' claims on the equity of and receivables due from foreign affiliates, less foreign affiliates' receivables due from their U.S. parents. Income consists of parents' shares in the earnings of their affiliates plus net interest received by parents on intercompany accounts, less withholding taxes on dividends and interest.

**Foreign aid**—Foreign assistance is divided into three major categories—grants (military supplies and services and other grants), credits, and other assistance (through net accumulation of foreign currency claims from the sale of agricultural commodities). *Grants* are transfers for which no payment is expected (other than a limited percentage of the foreign currency "counterpart" funds generated by the grant), or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. *Credits* are loan disbursements or transfers under other agreements which give rise to specific obligations to repay, over a period of

years, usually with interest. All known returns to the U.S. Government stemming from grants and credits (reverse grants, returns of grants, and payments of principal) are taken into account in net grants and net credits, but no allowance is made for interest or commissions. *Other assistance* represents the transfer of U.S. farm products in exchange for foreign currencies (plus, since enactment of Public Law 87-128, currency claims from principal and interest collected on credits extended under the farm products program), less the Government's disbursements of the currencies as grants, credits, or for purchases. The net acquisition of currencies represents net transfers of resources to foreign countries under the agricultural programs, in addition to those classified as grants or credits.

The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949. Prior to 1952, economic and technical aid was authorized in the Foreign Assistance Act of 1948, the 1950 Act for International Development, and other legislation which set up programs for specific countries. In 1952, these economic, technical, and military aid programs were combine under the Mutual Security Act, which in turn was followed by the Foreign Assistance Act passed in 1961. Appropriations to provide military assistance were also made in the Department of Defense Appropriation Act (rather than the Foreign Assistance Appropriation Act) beginning in 1966 for certain countries in Southeast Asia and in other legislation concerning program for specific countries (such as Israel). Figures on activity under the Foreign Assistance Act as reported in the *Foreign Grants and Credits* series differ from data published by AID or its immediate predecessors, due largely to differences in reporting, timing, and treatment of particular items.

**Exports**—The Census Bureau compiles export data primarily from Shipper's Export Declarations required to be filed with customs officials for shipments leaving the United States. They include U.S. exports

under mutual security programs and exclude shipments to U.S. Armed Forces for their own use.

The value reported in the export statistics is generally equivalent to a free alongside ship (f.a.s.) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. This value, as defined, excludes the cost of loading merchandise aboard the exporting carrier and also excludes freight, insurance, and any other charges or transportation and other costs beyond the U.S. port of exportation. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. When ultimate destination is not known, the shipment is statistically credited to the last country to which the shipper knows the merchandise will be shipped in the same form as exported.

For certain "low-valued" shipments, the export statistics include estimates based upon selected samples of such shipments. The dollar value of the "low-valued" shipments have varied. For instance, effective January 1987 through September 1989, data are estimated for shipments valued under \$1,501; from October 1989 through December 1989, data are estimated for shipments valued under \$2,501 to all countries.

Effective January 1990, the United States began substituting Canadian import statistics for U.S. exports to Canada. As a result of the data exchange between the United States and Canada, the United States has adopted the Canadian import exemption level for its export statistics based on shipments to Canada.

Data are estimated for shipments valued under \$2,501 to all countries, except Canada, using factors based on the ratios of low-valued shipments to individual country totals. These shipments represent slightly less than 2.5 percent of the

monthly value of U.S. exports to those countries. Data are estimated for shipments reported on Canadian import documents which total less than \$900 (Canadian). Such shipments represent 2 percent of the monthly value of U.S. exports to Canada.

Prior to 1989, exports were based on Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. These statistics were retabulated and published using Schedule E, Standard International Trade Classification, Revision 2. Beginning in 1989, Schedule B classifications were based on the Harmonized System and made to coincide with the Standard International Trade Classification, Revision 3. This revision will affect the comparability of most export series beginning with the 1989 data for commodities.

**Imports**—The Census Bureau compiles import data from various customs forms required to be filed with customs officials. Data on import values are presented on two bases in this section: The c.i.f. (cost, insurance, and freight) and the customs import value (as appraised by the U.S. Customs Service in accordance with legal requirements of the Tariff Act of 1930, as amended). This latter valuation, primarily used for collection of import duties, frequently does not reflect the actual transaction value. Country of origin is defined as country where the merchandise was grown, mined, or manufactured. If country of origin is unknown, country of shipment is reported.

Imports are classified either as "General imports" or "Imports for consumption." *General imports* are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise. *Imports for consumption* are a combination of entries for immediate consumption, withdrawals from warehouses for consumption, and entries of merchandise into U.S. customs territory from U.S. Foreign Trade Zones, thus generally reflecting the

total of the commodities entered into U.S. consumption channels.

Since July 1953, the import statistics include estimates, not classified by commodity, for certain low-valued shipments. For instance, from January 1985 through September 1989, import statistics include estimates for shipments valued under \$1,001. Effective October 1989, import statistics are fully compiled on shipments valued over \$1,250 or, under certain textile programs, for any article which must be reported on a formal entry. Value data for shipments valued under \$1,251 and not required to be reported on formal entries are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimated low-valued shipments generally amount to slightly less than 4 percent of the import total.

Prior to 1989, imports were based on the Tariff Schedule of the United States Annotated. The statistics were retabulated and published using Schedule A, Standard International Trade Classification, Revision 2. Beginning in 1989, the statistics are based on the Harmonized Tariff Schedule of the United States, which coincides with the Standard International Trade Classification, Revision 3. This revision will affect the comparability of most import series beginning with the 1989 data.

**Area coverage**—Except as noted, the geographic area covered by the export and import trade statistics is the United States Customs area (includes the 50 states, the District of Columbia, and Puerto Rico), the U.S. Virgin Islands (effective January 1981), and U.S. Foreign Trade Zones (effective July 1982). Data for selected tables and total values for 1980 have been revised to reflect the U.S. Virgin Islands' trade with foreign countries, where possible.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

# No. 1315. U.S. Businesses Acquired or Established by Foreign Direct Investors— Investment Outlays, by Industry of U.S. Business Enterprise and Country of Ultimate Beneficial Owner: 1990 to 1998

[In millions of dollars (65,932 represents \$65,932,000,000). Foreign direct investment is the ownership or control directly or indirectly, by one foreign individual branch, partnership, association, trust, corporation, or government of 10 percent or more of the voting securities of a U.S. business enterprise or an equivalent interest in an unincorporated one. Data represent number and full cost of acquisitions of existing U.S. business enterprises, including business segments or operating units of existing U.S. business enterprises and establishments of new enterprises. Investments may be made by the foreign direct investor itself, or indirectly by an existing U.S. affiliate of the foreign direct investor. Covers investments in U.S. business enterprises with assets of over \$1 million, or ownership of 200 acres of U.S. land.]

D Suppressed to avoid disclosure of data of individual companies. <sup>1</sup> Prior to 1992, "depository institutions" excludes, and "finance, depository institutions" includes, savings institutions and credit unions. Beginning with 1992, savings institutions and credit unions have been reclassified from "finance, except depository institutions" to "depository institutions". For investments in which more than one investor participated, each investor and each investor's outlays are classified by country of each ultimate beneficial owner. <sup>2</sup> Prior to 1990, this line includes data only for the Federal Republic of Germany. Beginning in 1990, this line also includes the former German Democratic Republic (GDR). This change has no effect on the data because, prior to 1991, there were no U.S. affiliates of the former GDR.

# No. 1317. U.S. Direct Investment Position Abroad on a Historical-Cost Basis, by Country: 1990 to 1998

[in millions of dollars (430,521 represents \$430,521,000,000). U.S. investment abroad is the ownership or control by one U.S. person of 10 percent or more of the voting securities of an incorporated foreign business enterprise or an equivalent interest in a unincorporated foreign business enterprise. Negative position can occur when a U.S. parent company's liabilities to the foreign affiliate are greater than its equity in, and loans to the foreign affiliate]

- Represents zero or rounds to zero. X Not applicable. Z Less than \$500,000. <sup>1</sup> Includes European Atomic Energy Community, European Coal and Steel Community, European Payments Union, European Productivity Agency, North Atlantic Treaty Organization, and Organization for European Economic Cooperation. <sup>2</sup> In 1992, some successor countries assumed portions of outstanding credits of the former Yugoslavia (assignment of the remaining portions is pending). Subsequent negative totals reflect payments to the United States on these assumed credits which were greater than the extension of new credits and grants to these countries. <sup>3</sup> In recent years, significant amounts of foreign assistance has been reported on a regional, inter-regional, and worldwide basis. Country totals in this table may understate actual assistance to many countries. <sup>4</sup> Foreign assistance to Iraq in 1991-96 was direct humanitarian assistance to ethnic minorities of Northern Iraq after the conflict in the Persian Gulf. <sup>5</sup> United Nations Relief and Works Agency for Palestine refugees. <sup>6</sup> Excludes transactions with Commonwealth of the Northern Mariana Islands after October 1986; includes transactions with Federated States of Micronesia, Republic of the Marshall Islands, and Republic of Palau. <sup>7</sup> Includes Andean Development Corporation, Caribbean Development Bank, Central American Bank for Economic Integration, Eastern Caribbean Central Bank, Inter-American Institute of Agricultural Science, Organizations of American States, and Pan American Health Organization.

## No. 1319. U.S. Foreign Economic and Military Aid Programs: 1980 to 1997

[In millions of dollars (9,695 represents 9,695,000,000). For years ending September 30. Economic aid shown here represents U.S. economic aid—not just aid under the Foreign Assistance Act. Major components in recent years include AID, Food for Peace, Peace Corps, and paid-in subscriptions to international financial institutions, such as IBRD, and IDB. Annual figures are gross unadjusted program figures]

Year and region	Total economic and military aid	Economic aid			Military aid

<sup>1</sup> Includes nonmonetary gold, military grant aid, special category shipments, trade between the U.S. Virgin Islands and foreign countries and undocumented exports to Canada. Adjustments were also made for carryover. Import values are based on transaction prices whenever possible ("f.a.s." for 1974-1979 and Customs value thereafter). Import data before 1974 do not exist on a transaction price valuation basis. <sup>2</sup> Manufactured goods include commodity sections 5-9 under Schedules A and E for 1970-1982 and SITC Rev. 3 for 1983-forward. Manufactures include undocumented exports to Canada, nonmonetary gold (excluding gold ore, scrap, and base bullion), and special category shipments. <sup>3</sup> Data for 1970-1980 exclude trade between the U.S. Virgin Islands and foreign countries. Census data concordances link the 1980-92 trade figures into time series that are as consistent as possible. Data for 1970-79 are not linked and are from published sources. Import values are "f.a.s." for 1974-1979 and Customs value thereafter; these values are based on transaction prices while maintaining a data series as consistent as possible over time. Import data before 1974 do not exist on a transaction price valuation basis. <sup>4</sup> Imports include revisions for passenger cars, trucks, petroleum and petroleum products not included elsewhere, see footnote 7 on page 18 for more details. <sup>5</sup> Agricultural products for 1983-forward utilize the latest census definition that excludes manufactured goods that were previously classified as manufactured agricultural products. <sup>6</sup> Mineral fuels include commodity section 3 under SITC Rev. 1 for 1970-1976, SITC Rev. 2 for 1977-1982 and SITC Rev. 3 for 1983-forward.

Figure 29.1  
Selected Outlying Areas of the United States

## Outlying Areas

This section presents summary economic and social statistics for Puerto Rico, Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands. Primary sources are the decennial censuses of population and housing and the censuses of agriculture, business, manufactures, and construction (taken every 5 years) conducted by the U.S. Census Bureau; the annual *Vital Statistics of the United States*, issued by the National Center for Health Statistics; and the annual *Income and Product* of the Puerto Rico Planning Board, San Juan.

**Jurisdiction**—The United States gained jurisdiction over these areas as follows: The islands of *Puerto Rico* and *Guam*, surrendered by Spain to the United States in October 1898, were ceded to the United States by the Treaty of Paris, ratified in 1899. Puerto Rico became a commonwealth on July 25, 1952, thereby achieving a high degree of local autonomy under its own constitution. The *Virgin Islands*, comprising 50 islands and cays, was purchased by the United States from Denmark in 1917. *American Samoa*, a group of seven islands, was acquired by the United States in accordance with a convention among the United States, Great Britain, and Germany, ratified in 1900 (Swains Island was annexed in 1925). By an agreement approved by the Security Council and the United States, the Northern Mariana Islands, previously under Japanese mandate, was administered by the United States between 1947 and 1986 under the United Nations trusteeship system. The Northern Mariana Islands became a commonwealth in 1986.

**Censuses**—Because characteristics of the outlying areas differ, the presentation of census data for them is not uniform. The

1960 Census of Population covered all of the places listed above except the Northern Mariana Islands (their census was conducted in April 1958 by the Office of the High Commissioner), while the 1960 Census of Housing also excluded American Samoa. The 1970, 1980, and 1990 Censuses of Population and Housing covered all five areas. The 1959, 1969, and 1978 Censuses of Agriculture covered Puerto Rico, American Samoa, Guam, and the Virgin Islands; the 1964, 1974, and 1982 censuses covered the same areas except American Samoa; and the 1969, 1978, 1987, and 1992 censuses included the Northern Mariana Islands. Beginning in 1967, Congress authorized the economic censuses, to be taken at 5-year intervals, for years ending in "2" and "7." Prior economic censuses were conducted in Puerto Rico for 1949, 1954, 1958, and 1963 and in Guam and the Virgin Islands for 1958 and 1963. In 1967, the census of construction industries was added for the first time in Puerto Rico; in 1972, Virgin Islands and Guam were covered. For 1982, 1987, and 1992 the economic censuses covered the Northern Mariana Islands.

**Information in other sections**—In addition to the statistics presented in this section, other data are included as integral parts of many tables showing distribution by states in various sections of the *Abstract*. See "Outlying areas of the United States" in the Index. For definition and explanation of terms used, see Section 1, Population; Section 4, Education; Section 23, Agriculture; Section 25, Construction and Housing; Section 26, Manufactures; and Section 27, Domestic Trade and Services.

## No. 1332. Estimated Resident Population With Projections: 1970 to 2020

[In thousands (2,722 represents 2,722,000). Population data generally are de facto figures for the present territory. Population estimates were derived from information available as of early 1999. See text, Section 30, Comparative International Statistics, for general comments regarding the data. For details of methodology, coverage, and reliability, see source.]

## Comparative International Statistics

---

This section presents statistics for the world as a whole and for many countries on a comparative basis with the United States. Data are shown for population, births and deaths, social and industrial indicators, finances, agriculture, communication, and military affairs.

Statistics of the individual nations may be found primarily in official national publications, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages and expressed in their own or customary units of measure. (For a listing of selected publications, see Guide to Sources.) For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles data as submitted by member countries and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook*; the *Demographic Yearbook*; the *Yearbook of International Trade Statistics*; the *Yearbook of National Accounts Statistics: Vol. II, International Tables*; *Population and Vital Statistics Reports* (quarterly); the *Monthly Bulletin of Statistics*; and the *Energy Statistics Yearbook*. Specialized agencies of the United Nations also issue international summary publications on agricultural, labor, health, and education statistics. Among these are the *Production Yearbook* and *Trade Yearbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* issued by the International Labour Office, *World Health Statistics* issued by the World Health Organization, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organization.

The U.S. Census Bureau presents estimates and projections of basic demographic

measures for countries and regions of the world in the *World Population Reports* (WP) series. The *International Population Reports* (Series P95), and *International Briefs* (series IB) also present population figures for many foreign countries. Detailed population statistics are also available from the Census Bureau's International Data Base.

The International Monetary Fund (IMF) and the Organization for Economic Cooperation and Development (OECD) also compile data on international statistics. The IMF publishes a series of reports relating to financial data. These include *International Financial Statistics*, *Direction of Trade*, and *Balance of Payments Yearbook*, published in English, French, and Spanish. The OECD publishes a vast number of statistical publications in various fields such as economics, health, and education. Among these are *OECD in Figures*, *Main Economic Indicators*, *Economic Outlook*, *National Accounts*, *Labour Force Statistics*, *OECD Health Data*, and *Education at a Glance*.

**Statistical coverage, country names, and classifications**—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown. The list of countries included and the spelling of country names are based almost entirely on the list of sovereign nations, dependencies, and areas of special sovereignty provided by the U.S. Department of State.

In recent years, several important changes took place in the status of the world's nations. In 1990, a unified Germany was formed from the Federal Republic of Germany (West) and the German Democratic Republic (East). The Republic of Yemen was formed by union of the Yemen Arab Republic and the People's Democratic Republic of Yemen. Also in 1990, Namibia, once a

United Nations mandate, realized its independence from South Africa.

In 1991, the Soviet Union broke up into 15 independent countries: Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan.

In 1992, the Socialist Federal Republic of Yugoslavia dissolved; none of the successor states has been recognized as its continuation. The United States recognizes Bosnia and Herzegovina, Croatia, Slovenia, and The Former Yugoslav Republic of Macedonia as independent countries. Serbia and Montenegro have asserted the formation of a joint independent state, but this entity has not been formally recognized as a state by the United States.

On January 1, 1993, Czechoslovakia was succeeded by two independent countries: the Czech Republic and Slovakia. Eritrea announced its independence from Ethiopia in April 1993 and was subsequently recognized as an independent nation by the United States.

The population estimates and projections used in Tables 1349, 1350, and 1352 were prepared by the Census Bureau. For each country, the data on population, by age and sex, fertility, mortality, and international migration were evaluated and, where necessary, adjusted for inconsistencies and errors in the data. In most instances, comprehensive projections were made by the component method, resulting in distributions of the population by age and sex and requiring an assessment of probable future trends of fertility, mortality, and international migration.

**Economic associations**—The Organization for European Economic Co-operation (OECE), a regional grouping of Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organization for Economic Cooperation and Development (OECD). The member nations of the OECD are Australia, Austria, Belgium,

Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, South Korea, Spain, Sweden, Switzerland, Turkey, the United Kingdom, and the United States.

**Quality and comparability of the data**—The quality and comparability of the data presented here are affected by a number of factors:

1) The year for which data are presented may not be the same for all subjects for a particular country or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise specified.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-periods and coverage qualifications attached to the figures; considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 states, continuous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the United States figures by the United Nations or other sources in order to make them more comparable with figures from other countries.

**International comparisons of national accounts data**—In order to compare national accounts data for different countries, it is necessary to convert each country's

data into a common unit of currency, usually the U.S. dollar. The market exchange rates which are often used in converting national currencies do not necessarily reflect the relative purchasing power in the various countries. It is necessary that the goods and services produced in different countries be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (see Table 1363) instead of exchange rates is intended to achieve this objective.

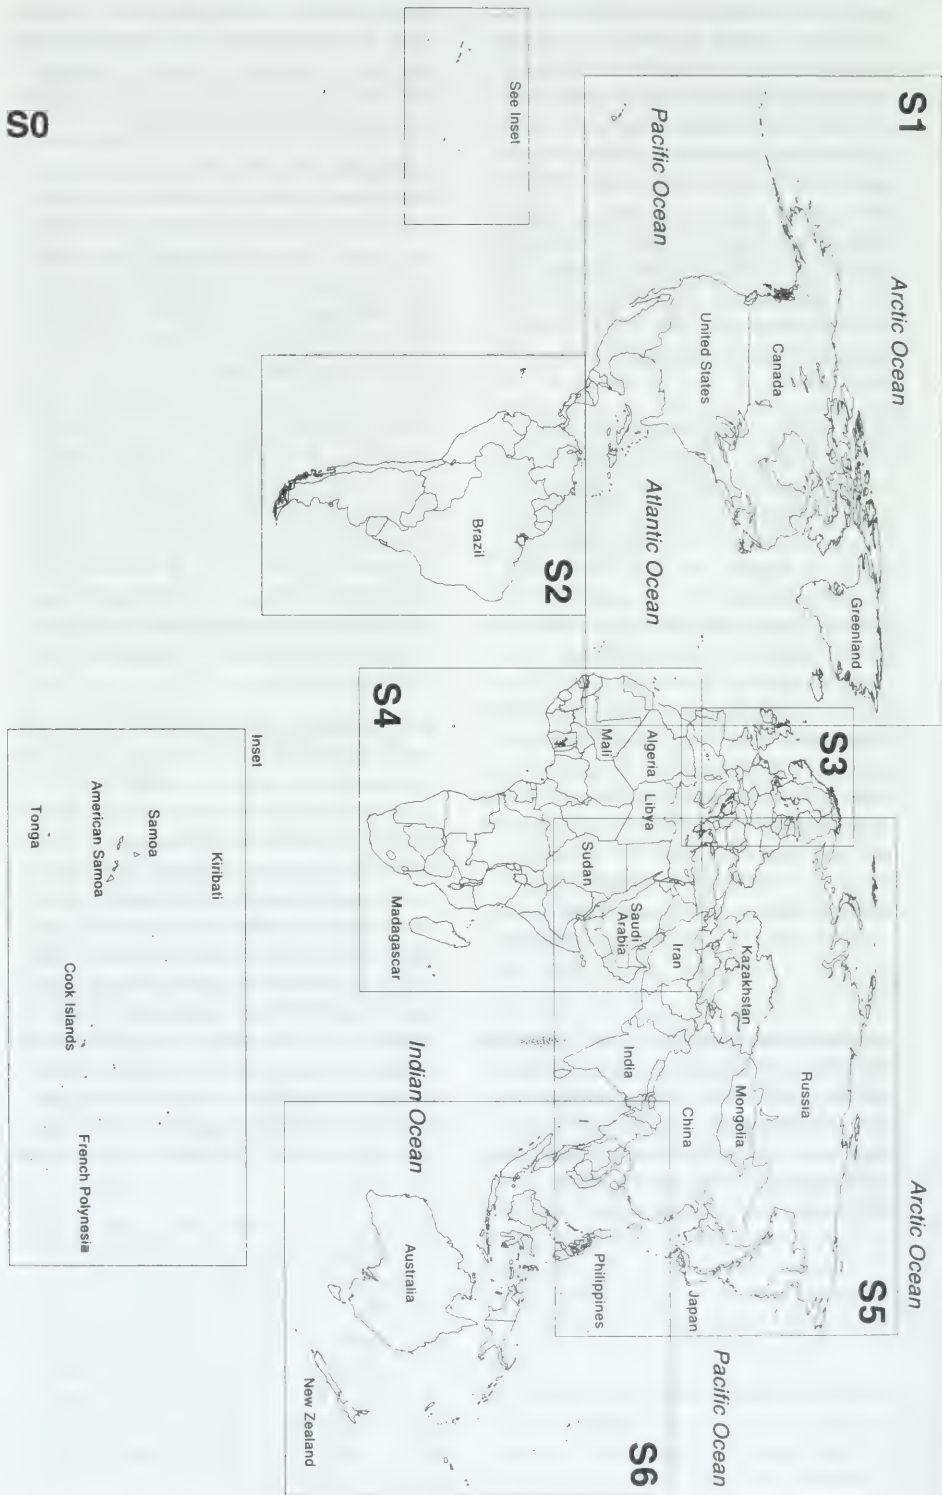

The method used to present the data shown in Table 1363 is to construct volume measures directly by revaluing the goods and services sold in different countries at a common set of international prices. By dividing the ratio of the gross domestic products of two countries expressed in their own national currencies by the corresponding ratio calculated at constant international prices, it is possible to derive the implied purchasing power parity (PPP) between the two currencies concerned. PPPs show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. For further information, see *National Accounts, Main Aggregates, Volume I*, issued annually by the Organization for Economic Cooperation and Development, Paris, France.

**International Standard Industrial Classification**—The original version of the International Standard Industrial Classification of All Economic Activities (ISIC) was adopted in 1948. Wide use has been made both nationally and internationally in classifying data according to kind of economic

activity in the fields of production, employment, national income, and other economic statistics. A number of countries have utilized the ISIC as the basis for devising their industrial classification scheme.

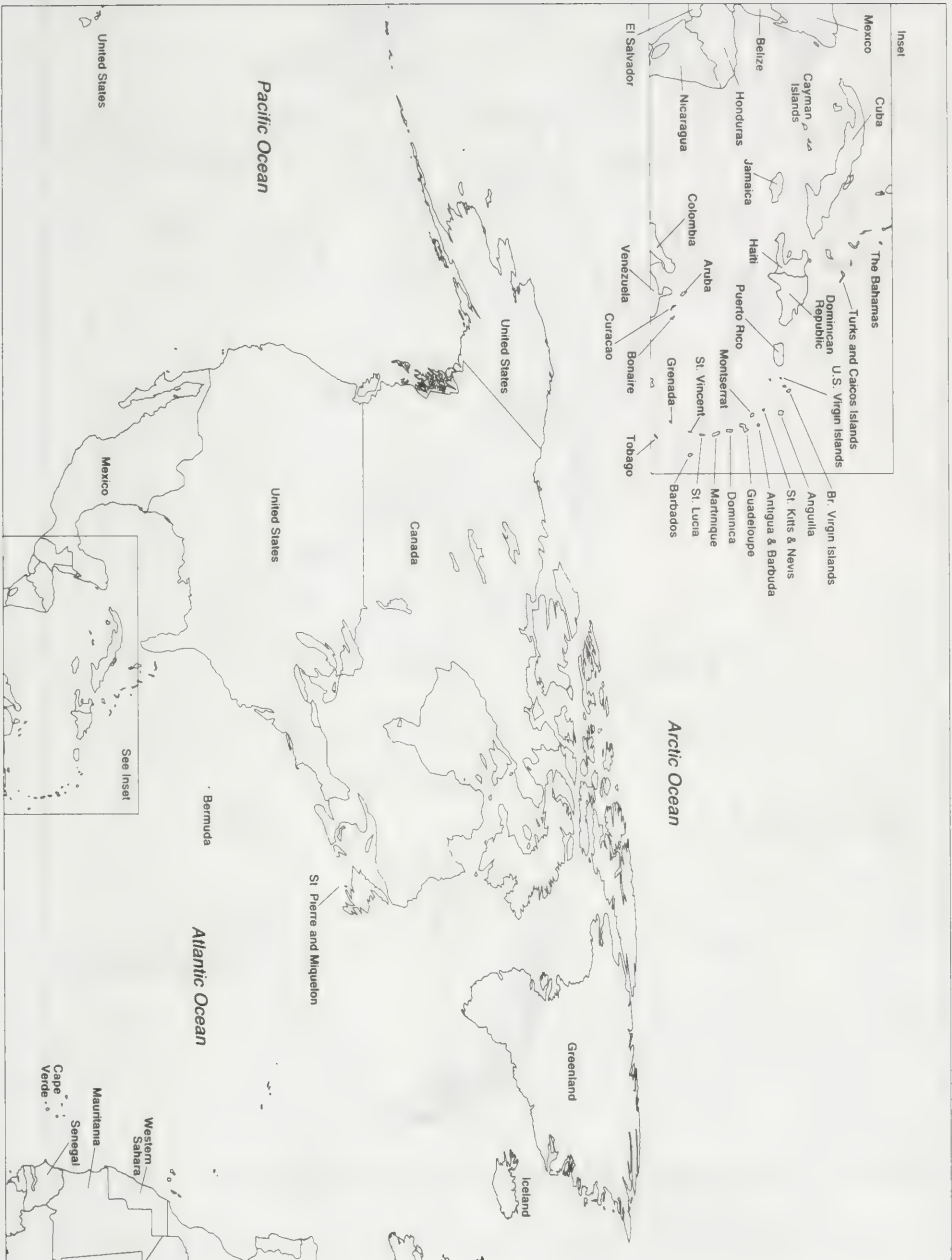

Substantial comparability has been attained between the industrial classifications of many other countries, including the United States and the ISIC by ensuring, as far as practicable, that the categories at detailed levels of classification in national schemes fitted into only one category of the ISIC. For more detail, see the Census Bureau's, *The International Standard Industrial Classification and the U.S. Standard Industrial Classification*, Technical Paper No. 14, and the text of Section 27, Manufactures. The United Nations, the International Labour Organization, the Food and Agriculture Organization, and other international bodies have utilized the ISIC in publishing and analyzing statistical data. Revisions of the ISIC were issued in 1958, 1968, and 1989.

**International maps**—A series of regional world maps is provided on pages 824-830. References are included in Table 1349 for easy location of individual countries on the maps. The Robinson map projection is used for this series of maps. A map projection is used to portray all or part of the round Earth on a flat surface, but this cannot be done without some distortion. For the Robinson projection, distortion is very low along the Equator and within 45 degrees of the center but is greatest near the poles. For additional information on map projections and maps, please contact the Earth Science Information Center, U.S. Geological Survey, 507 National Center, Reston, VA 22092.

- Represents or rounds to zero. X Not applicable. Z Less than one person per square mile. <sup>1</sup> Computed by the exponential method. For explanation of average annual percent change, see Guide to Tabular Presentation. <sup>2</sup> With the establishment of diplomatic relations with China on January 1, 1979, the U.S. Government recognized the People's Republic of China as the sole legal government of China and acknowledged the Chinese position that there is only one China and that Taiwan is part of China. <sup>3</sup> Congo is the official short-form name for both the Republic of Congo and the Democratic Republic of the Congo. To distinguish one from the other the U.S. Dept. of State adds the capital in parentheses. This practice is unofficial and provisional. <sup>4</sup> The U.S. view is that the Socialist Federal Republic of Yugoslavia has dissolved and no successor state represents its continuation. Serbia and Montenegro have asserted the formation of a joint independent state, but this entity has not been recognized by the United States. <sup>5</sup> The Gaza Strip and West Bank are Israeli occupied with interim status subject to Israeli/Palestinian negotiations. The final status is to be determined.

No. 1351. Foreign Population in Selected OECD Countries: 1985 to 1995

[In Australia, Canada, and the United States, the data refer to people present in the country who are foreign born. In the European countries and Japan, they generally refer to foreigners and represent the nationalities of residents; as a result, persons born in these countries may be counted among the foreign population, whereas others, who are foreign born, may have acquired the host-country nationality. Except as noted, data are from population registers]

Country	Number (1,000)			Percent of total population		
	1985	1990	1995	1985	1990	1995

No. 1360. Participation in Job-Related Continuing Education and Training, by Country: 1994-1995

[Percentage of the employed population 25 to 64 years old. Data refer to all job-related education and training organized, financed, or sponsored by authorities, provided by employers, or self-financed. Job-related continuing education and training refers to all organized, systematic education and training activities in which people take part in order to obtain knowledge and/or learn new skills for a current or a future job, to increase earnings, improve job and/or career opportunities in current or other fields, and generally to improve their opportunities for advancement and promotion]

# No. 1362. Gross National Product, by Country: 1997

[44 represents \$44,000,000,000. Gross national product calculated using the World Bank Atlas method; for details, see source. Some economies had missing data but were included in the ranking process at their approximate level, so that the relative order of other economies remains consistent. In 1997, Luxembourg and Liechtenstein were judged to have the highest values of GNP per capita but exact values were not available. Minus sign (-) indicates decrease]

Country	Gross national product			Gross national product per capita			GNP on purchasing power parity basis

NA Not available. X Not applicable. <sup>1</sup> The goods and services produced in different countries should be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (PPP) instead of exchange rates is intended to achieve this objective. PPPs show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. See text of this section. <sup>2</sup> Based on constant (1990) price data converted to U.S. dollars using 1990 exchange rates. <sup>3</sup> Percent change from immediate prior year. Minus sign (-) indicates decrease. <sup>4</sup> Excludes Czech Republic, Hungary, and Poland. <sup>5</sup> Excludes South Korea. <sup>6</sup> For countries, see text of this section.

## No. 1364. International Economic Composite Indexes, by Country: 1980 to 1998

[Average annual percent change from previous year; derived from indexes with base 1990=100. The coincident index changes are for calendar years and the leading index changes are for years ending June 30 because they lead the coincident indexes by about 6 months, on average. The G-7 countries are United States, Canada, France, Germany, Italy, United Kingdom, and Japan. Minus sign (-) indicates decrease]

Country	1980	1985	1989	1990	1991	1992	1993	1994	1995	1996	1997	1998

## No. 1365. Selected International Economic Indicators, by Country: 1980 to 1998

[Data cover gross domestic product (GDP) at market prices. Gross fixed capital formation covers private and government sectors except military. Savings data are calculated by deducting outlays—such as personal consumption expenditures, interest paid, and transfer payments to foreigners—from disposable personal income]

Year	United States	France	Germany	Italy	Netherlands	United Kingdom	Japan	Canada
<b>Ratio of gross fixed capital formation to GDP (current prices):</b>								
1980 . . . . .	19.6	23.4	22.6	24.5	21.4	18.8	31.6	23.1
1985 . . . . .	18.8	20.1	19.5	20.7	19.7	18.2	27.5	19.8
1990 . . . . .	16.2	22.6	20.9	20.3	20.9	20.6	31.7	20.8
1995 . . . . .	16.3	18.8	21.4	18.3	19.1	16.3	28.5	16.9
1997 . . . . .	17.1	18.1	19.9	18.0	20.0	16.7	28.4	18.7
1998 . . . . .	(NA)	18.4	19.4	18.1	20.0	17.4	26.2	19.0
<b>Ratio of savings to disposable personal income:</b>								
1980 . . . . .	8.5	17.6	14.2	21.6	11.0	11.7	17.9	14.3
1985 . . . . .	7.2	14.0	12.8	19.4	11.1	9.1	15.6	14.0
1990 . . . . .	5.3	12.5	14.7	17.0	15.5	7.4	12.1	11.1
1995 . . . . .	3.4	16.0	12.4	14.5	11.6	10.3	13.7	7.4
1997 . . . . .	2.1	16.3	12.1	12.4	11.3	9.5	12.6	2.1
1998 . . . . .	0.5	15.5	11.8	11.5	(NA)	7.0	13.6	1.2

## No. 1375. Unemployment Rates, by Country: 1995 to 1998

[Annual averages. The standardized unemployment rates shown here are calculated as the number of unemployed persons as a percentage of the civilian labor force. The unemployed are persons of working age who, in the reference period, are without work, available for work and have taken specific steps to find work]

- Represents or rounds to zero. <sup>1</sup> Former West Germany. <sup>2</sup> Compensation includes, but real hourly compensation excludes, adjustments for payroll and employment taxes that are not compensation to employees, but are labor costs to employers. <sup>3</sup> Index of hourly compensation divided by the index of consumer prices to adjust for changes in purchasing power. <sup>4</sup> Indexes in national currency adjusted for changes in prevailing exchange rates. Source: Bureau of Labor Statistics, *International Comparisons of Manufacturing Productivity and Unit Labor Cost Trends, 1997 Revised Data*, March 16, 1999.

## No. 1383. Indexes of Hourly Compensation Costs for Production Workers in Manufacturing, by Country: 1980 to 1997

[United States=100. Compensation costs include all pay made directly to the worker—pay for time worked and not worked (eg. leave, except sick leave), other direct pay, employer expenditures for legally required insurance programs and contractual and private benefit plans, and for some countries, other labor taxes. Data adjusted for exchange rates. Area averages are trade-weighted to account for difference in countries' relative importance to U.S. trade in manufactured goods. The trade weights used are the sum of U.S. imports of manufactured products for consumption (customs value) and U.S. domestic exports of manufactured products (f.a.s. value) in 1992; see source for detail]

Area or country	1980	1985	1990	1995	1996	1997	Area or country	1980	1985	1990	1995	1996	1997

## No. 1391. World Production of Major Mineral Commodities: 1990 to 1998

[5,353 represents 5,353,000,000]

Country	Unit	1990	1995	1997	1998 est.	Leading producers, 1997
<b>MINERAL FUELS</b>						
Coal . . . . .	Mil. short tons . . . . .	5,353	5,134	5,218	(NA)	China, United States, India
Dry natural gas . . . . .	Tril. cu. ft. . . . .	73.6	77.9	81.7	(NA)	Russia, United States, Canada
Natural gas plant liquids . . . . .	Mil. barrels <sup>2</sup> . . . . .	1,691	2,002	2,099	(NA)	United States, Saudi Arabia, Canada
Petroleum, crude . . . . .	Mil. barrels <sup>2</sup> . . . . .	22,107	22,752	24,243	(NA)	Saudi Arabia, United States, Russia
<b>NONMETALLIC MINERALS</b>						
Cement, hydraulic . . . . .	Mil. metric tons . . . . .	1,160	1,444	1,512	1,500	China, Japan, United States
Diamond, gem and industrial . . . . .	Mil. carats . . . . .	111	113	118	(NA)	Australia, Russia, Congo (Kinshasa)
Nitrogen in ammonia . . . . .	Mil. metric tons . . . . .	97.5	96.1	101.0	101.0	China, United States, India
Phosphate rock . . . . .	Mil. metric tons . . . . .	162	130	138	141	United States, Morocco, China
Potash, marketable . . . . .	Mil. metric tons . . . . .	27.5	24.7	25.7	24.9	Canada, Germany, Russia
Salt . . . . .	Mil. metric tons . . . . .	183	192	201	200	United States, China, Germany
Sulfur, elemental basis . . . . .	Mil. metric tons . . . . .	57.8	53.2	53.6	54.0	United States, Canada, China
<b>METALS</b>						
Aluminum <sup>3</sup> . . . . .	Mil. metric tons . . . . .	19.3	19.9	21.4	22.2	United States, Russia, Canada
Bauxite, gross weight . . . . .	Mil. metric tons . . . . .	113.0	107.0	123.0	125.0	Australia, Guinea, Brazil
Chromite, gross weight <sup>1</sup> . . . . .	1,000 metric tons . . . . .	13,200	14,300	12,500	12,600	South Africa, Turkey, India
Copper, metal content <sup>4</sup> . . . . .	1,000 metric tons . . . . .	8,950	10,100	11,400	11,900	Chile, United States, Canada
Gold, metal content . . . . .	Metric tons . . . . .	2,180	2,220	2,410	2,400	South Africa, United States, Australia
Iron ore, gross weight <sup>5</sup> . . . . .	Mil. metric tons . . . . .	983	1,030	1,040	1,020	China, Brazil, Australia
Lead, metal content <sup>4</sup> . . . . .	1,000 metric tons . . . . .	3,370	2,780	3,010	3,080	China, Australia, United States
Manganese ore, gross weight . . . . .	Mil. metric tons . . . . .	26.1	23.0	(NA)	(NA)	China, South Africa, Ukraine
Nickel, metal content <sup>4</sup> . . . . .	1,000 metric tons . . . . .	974	1,030	1,120	1,170	Russia, Canada, New Caledonia
Steel, crude . . . . .	Mil. metric tons . . . . .	771	755	795	783	European Union, China, Japan
Tin, metal content <sup>4</sup> . . . . .	1,000 metric tons . . . . .	221	195	211	216	China, Indonesia, Peru
Zinc, metal content <sup>4</sup> . . . . .	1,000 metric tons . . . . .	7,150	7,240	7,460	7,800	China, Canada, Australia

NA Not available. <sup>1</sup> Excludes China. <sup>2</sup> 42-gallon barrels. <sup>3</sup> Unalloyed ingot metal. <sup>4</sup> Mine output. <sup>5</sup> Includes iron ore concentrates and iron ore agglomerates.

## No. 1392. Forest Area, Deforestation, and Production of Forest Products

[32,712 represents 32,712,000. Forest area is land under natural or planted stands of trees whether productive or not. Average annual deforestation refers to the permanent conversion of natural forest area to other uses, including shifting cultivation, permanent agriculture, ranching, settlements, and infrastructure development. Deforested areas do not include areas logged but intended for regeneration or areas degraded by fuelwood gathering, acid precipitation, or forest fires. Minus sign (-) indicates an increase in forest area]

Country	Forest area, 1995 (1,000 sq. km)	Average annual deforestation, 1990-95		Production, 1996 (mil. cubic meters)	
		Total (sq. km)	Percent change	Fuelwood, charcoal	Industrial roundwood
<b>World, total . . . . .</b>	<b>32,712</b>	<b>101,724</b>	<b>0.3</b>	<b>1,865</b>	<b>1,490</b>

No. 1396. Meat Production, by Country: 1990 to 1998

[In thousands of metric tons, carcass weight (178,830 represents 178,830,000). Covers beef and veal (incl. buffalo meat), pork (incl. bacon and ham), mutton and lamb (incl. goat meat), horsemeat, and poultry. Refers to meat from animals slaughtered within the national boundaries irrespective of origin of animals, and relates to commercial and farm slaughter. Excludes lard, tallow, and edible offals. See text of this section for general comments concerning the data]

## No. 1399. United States and Foreign Stock Markets—Market Capitalization and Value of Shares Traded: 1990 to 1998

[In billions of U.S. dollars (3,059.4 represents \$3,059,400,000,000). Market capitalization is the market value of all domestic listed companies at the end of the year. The market value of a company is the share price times the number of shares outstanding. Value of shares traded is the annual total turnover of listed company shares]

## No. 1407. Net Flow of Financial Resources to Developing Countries: 1980 to 1997

[In billions of U.S. dollars (75.4 represents \$75,400,000,000). Net flow covers loans, grants, and grant-like flows minus amortization on loans. Military flows are excluded. Developing countries cover countries designated by Development Assistance Committee (DAC) as developing. Official development assistance covers all flows to developing countries and multilateral institutions provided by official agencies, including state and local governments, or by their executive agencies, which are administered with the promotion of economic development and welfare of developing countries as their main objective and whose financial terms are intended to be concessional in character with grant element of at least 25 percent. Other official flows cover export credits and portfolio investment from the official sector]

NA Not available. Z Less than \$50 million. <sup>1</sup> Known as the "List of Developing Countries and Territories," the DAC List of Aid Recipients was split into two parts in 1993 in recognition of the new aid requirements for transition economies of eastern Europe and of the rapid progress of some developing countries with reduced aid needs. Part I countries are the "traditional" developing countries to which aid can be counted as official development assistance. Part II countries are the "more advanced" developing countries of Central and Eastern Europe (Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, and Slovakia) and of the Newly Independent States of the former Soviet Union (Belarus, Russia, and Ukraine). In 1996, the Bahamas, Brunei, Kuwait, Qatar, Singapore, and the United Arab Emirates were reclassified from Part I to Part II more advanced developing status. In 1997, Bermuda, Cayman Islands, Cyprus, Falkland Islands, Hong Kong, Israel, and Taiwan were reclassified from Part I to Part II status, and Moldova shifted from Part II to Part I status. <sup>2</sup> Country totals may not sum to DAC totals because debt forgiveness of nonofficial development assistance claims is not included in DAC totals. <sup>3</sup> Official flows to Part II countries that have the same concessional and qualitative features as official development assistance are designated official aid. Only flows to Part I countries are eligible to be recorded as official development assistance.

# No. 1408. External Public Debt, by Country: 1990 to 1996

[46,902 represents \$46,902,000,000. External public debt is defined as debt repayable to external creditors in foreign currency, goods, or services, with an original or extended maturity of more than 1 year, which is a direct obligation of, or has repayment guaranteed by, a public body in the borrowing country. Excludes undisbursed debt (amounts not yet drawn by recipient) and unguaranteed private debt, which for some countries is substantial. Debt contracted for the purchase of military equipment is not usually reported. Debt service payments represent the sum of interest payments and repayments of principal on external public debt]

# No. 1410. Military Expenditures and Armed Forces Personnel, by Country: 1990 and 1995

[Military expenditures in millions of dollars, except as indicated (306,200 represents \$306,200,000,000). Personnel data as of July. See also Table 583. For most countries, data for expenditures and for gross national product (GNP) were based on local currencies which were deflated to constant 1995 local currency values before conversion to U.S. dollar equivalents. In general, the rates used for conversion are the 1995 average par/market exchange rates as supplied by the International Bank for Reconstruction and Development. Armed Forces refer to active-duty military personnel, including paramilitary forces where those forces resemble regular units in their organization, equipment, training, or mission. Reserve forces are not included]

## 20<sup>th</sup> Century Statistics

---

This new section presents summary statistics that cover the social, economic, and political organization of the United States. The main objective is to present some of the important historical trends for this century in statistical form. Population growth, the arrival of many different immigrant groups, the changing marital status, types of households, and age structure are some of the demographic trends covered. Increased life expectancy, school enrollment, and educational attainment along with the growth in household income are covered as well as the fall in the incidence of some diseases. Relatedly, changes in the workplace are covered with greater female participation and fewer agricultural workers. The Nation's economy is covered by trends in the Gross Domestic Product, labor force, and basic economic measures such as housing starts, retail sales, industrial production, and foreign trade. Special sectors

in the economy, such as agriculture, transportation with the automobile and airlines, and communications with radio, television, and cable TV are also portrayed. The growth of the Federal Government, social welfare and health programs, and rise and fall in national defense between wars and peacetime are also covered. Presidential elections and changes in the composition of congress are presented in this reflective look at this century in statistics.

Statistics in this section start in 1900 where possible or the earliest year available (i.e., 1912 for data on diseases, 1913 for consumer prices, 1929 for Gross Domestic Product and unemployment, and 1940 for housing). Space considerations prevented showing every year available in most tables. However, the compact disc version of the *Statistical Abstract* will present all years that are available.

No. 1411. Population: 1900 to 1998

[In thousands, except percent. Estimates as of July 1. Prior to 1940, excludes Alaska and Hawaii. Total population includes Armed Forces abroad; civilian population excludes Armed Forces. For basis of estimates, see text, Section 1, Population]

<sup>1</sup> Represents the portion of a consolidated city that is not within one or more separately incorporated places. <sup>2</sup> The population shown in this table is for the CDP; the 1990 census population for the city and county of Honolulu is 836,231.

Source: U.S. Census Bureau, 1900-1990, *Population of the 100 Largest Cities and Other Urban Places in the United States: 1790 to 1990*, Working Paper No. 27; 1996, "Estimates of the Population of Cities with Populations of 100,000 and Greater"; <<http://www.census.gov/population/estimates/metro-city/SC100K96.txt>>; published November 1997.

No. 1416. Immigration, by Leading Country or Region of Last Residence: 1901 to 1997

[In thousands (8,795.4 represents 8,795,400). Data for years prior to 1906 relate to country where alien came; data from 1906-1979 and 1984-1997 are for country of last permanent residence; and data for 1980-1983 refer to country of birth. Because of changes in boundaries, changes in lists of countries, and lack of data for specified countries, data are not comparable for all years. For 1938-45, Austria included with Germany]

No. 1441. Agriculture—Farms, Acreage, Income, and Foreign Trade: 1900 to 1998

[Farms and land as of June 1. (5,740 represents 5,740,000). Based on various definitions of farms; 1975-1998, based on 1974 census definition; for definition of farms and farmland, see text, Section 23, Agriculture. Data for farms and land in census years (indicated by italics) have been adjusted for underenumeration and are used as reference points along with data from acreage and livestock surveys in estimating data for other years]

Year	Land in farms			Value added to U.S. economy by agricultural sector <sup>1</sup>				Agricultural <sup>2</sup>			
	Farms (1,000)	Total (mil. acres)	Average per farm (acres)	Final agricultural sector output (mil. dol.)	Crop output (mil. dol.)	Animal output (mil. dol.)	Net farm income (mil. dol.)	Index of prices received by farmers (1990-92=100)	Acreage of harvested crops (mil. acres)	Exports, domestic products (bil. dol.)	Imports for consumption (bil. dol.)

# Guide to Sources of Statistics, State Statistical Abstracts, and Foreign Statistical Abstracts

Alphabetically arranged, this guide contains references to the important primary sources of statistical information for the United States published since 1990. Secondary sources have been included if the information contained in them is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for years later than 1990 or types of data not available in regular series are also included.

Much valuable information may also be found in state reports, foreign statistical abstracts, which are included at the end of this appendix and in reports for particular commodities, industries, or similar segments of our economic and social structures, many of which are not included here.

Publications listed under each subject are divided into two main groups: "U.S. Government" and "Nongovernment." The location of the publisher of each report is given except for Federal agencies located in Washington, DC. Most Federal publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, tel. 202-512-1800, (website <<http://www.access.gpo.gov>> or from Government Printing Office bookstores in certain major cities. In some cases, Federal publications may be obtained from the issuing agency.

## U.S. GOVERNMENT

### Administration for Children and Families

Quarterly Public Assistance Statistics.  
Annual.

### Administrative Office of the United States Courts

Calendar Year Reports on Authorized Wiretaps. (State and Federal.)  
Federal Court Management Statistics.  
Annual.  
Federal Judicial Caseload Statistics.  
Annual.  
Judicial Business of the United States Courts.  
Statistical Tables for the Federal Judiciary.  
Semiannual.

### Agency for International Development

U.S. Overseas Loans and Grants and Assistance From International Organizations. Annual.

### Army, Corps of Engineers

Waterborne Commerce of the United States (in five parts). Annual.

### Board of Governors of the Federal Reserve System

Annual Statistical Digest.  
Federal Reserve Banks. Monthly review published by each Bank with special reference to its own Federal Reserve District.  
Federal Reserve Bulletin. Monthly. (Also monthly releases on industrial production indexes.)  
Domestic Offices, Commercial Bank Assets and Liabilities Consolidated Report of Condition. Quarterly.  
Flow of Funds Accounts: Seasonally Adjusted and Unadjusted. Z.1 (780). Quarterly.  
Industrial Production and Capacity Utilization G.17. Monthly.  
Money Stock, Liquid Assets, and Debt Measures. H.6. Weekly.

### Bureau of Alcohol, Tobacco, and Firearms

Alcohol and Tobacco Summary Statistics.  
Annual.

### Bureau of Economic Analysis

National Income and Product Accounts of the United States, 1929-1994: Statistical Tables, 1998.

## **Bureau of Economic Analysis —Con.**

- Survey of Current Business. Monthly. (March, June, September, and December issues contain data on U.S. international transactions. Articles on foreign direct investment in the United States, U.S. direct investment abroad, and other topics appear periodically in other issues.)
- U.S. Direct Investment Abroad: 1994 Benchmark Survey, 1997.
- U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and their Foreign Affiliates. Preliminary, 1995. Estimates, 1997.

## **Bureau of Justice Statistics**

- Age patterns of victims of serious violent crimes. September 1997.
- Alcohol and crime: An analysis of national data on the prevalence of alcohol involvement in crime. April 1998.
- Campus law enforcement agencies, 1995. December 1996.
- Capital punishment. Annual. 1996. December 1997.
- Carjacking in U.S., 1992-96. March 1996.
- Census of state and local law enforcement agencies, 1996. June 1998.
- Changes in criminal victimization, 1994-95. April 1997.
- Characteristics of adults on probation, 1995. December 1997.
- Child victimizers: Violent offenders and their victims. March 1996.
- Civil Justice Survey of State Courts, 1992, CD-ROM. July 1996.
- Comparing case processing statistics. September 1996.
- Contract cases in large counties: Civil Justice Survey of State Courts, 1992. February 1996.
- Correctional populations in the United States annual.
- Criminal Victimization in the United States Annual.
- Expenditure and Employment Data for the Criminal Justice System. Annual.
- Federal criminal case processing, 1997. June 1998.
- Federal law enforcement officers, 1996. January 1998.
- Federal tort trials and verdicts, 1994-95. January 1998.
- Felony defendants in large urban counties: Biennial.
- Felony sentences in state courts. Biennial.
- Felony sentences in the United States. Biennial.
- Female victims of violent crime. December 1996.
- Firearm injury from crime: Firearms, crime, and criminal justice. April 1996.
- HIV in prisons and jails 1995. August 1997.
- Households Touched by Crime. Annual.
- Indigent defense. February 1996.

## **Bureau of Justice Statistics —Con.**

- Justice expenditure and employment in the United States, 1990. May 1998.
- Juvenile delinquents in the Federal criminal justice system. February 1997.
- Juveniles prosecuted in state criminal courts, 1994: National Survey of Prosecutors. March 1997.
- Lifetime likelihood of going to state or Federal prison. March 1997.
- Local police departments, 1993: A LEMAS report. April 1996.
- Motor Vehicle Theft
- National Corrections Reporting Program. Annual.
- Noncitizens in the Federal criminal justice system: Federal Justice Statistics Program. August 1996.
- Parole in the United States Annual.
- Presale firearm checks: A national estimate. February 1997.
- Prison and jail inmates 1995. August 1996.
- Prison and jail inmates at midyear, 1997. January 1998.
- Prisoner petitions in the Federal courts, 1980-96
- Prisoners in State and Federal Institutions. Annual.
- Probation and parole populations, 1996. August 1997.
- Profile of jail inmates, 1996. April 1998.
- Prosecutors in state courts. Biennial.
- Sex differences in violent victimization, 1994. September 1997.
- Sex offenses and offenders. January 1997.
- Sheriffs' departments 1993. June 1996.
- Sourcebook of criminal justice statistics, 1994-95 editions, CDROM. October 1997.
- State court sentencing of convicted felons. Biennial.
- Students' reports of school crime: 1989 and 1995. April 1998.
- Substance abuse and treatment of adults on probation, 1995. March 1998.
- Survey of state criminal history information systems, 1995. May 1997.
- Violence by intimates: Analysis of data on crimes by current or former spouses, boyfriends, and girlfriends. March 1998.
- Violence-related injuries treated in hospital emergency departments. August 1997.

## **Bureau of Labor Statistics**

- Comparative Labor Force Statistics, Ten Countries. Annual.
- Compensation and Working Conditions. Quarterly.
- Consumer Expenditure Survey, Integrated Diary and Interview Survey data.
- Consumer Prices: Energy and Food. Monthly.
- CPI Detailed Report. Monthly.
- Employee Benefits in Medium and Large Firms. Biennial.

## **Bureau of Labor Statistics —Con.**

Employee Benefits in Small Private Establishments. Biennial.

Employee Benefits in State and Local Governments. Biennial.

Employer Costs for Employee Compensation. Annual.

Employment and Earnings. Monthly.

Employment and Wages. Annual.

Employment Cost Index. Quarterly.

Employment Cost Indexes and Levels. Annual.

Employment, Hours, and Earnings, United States, 1988-96. 1996. (Bulletin 2481.)

Employment Outlook: 1994-2005. (Bulletin 2472.)

The Employment Situation. Monthly.

Geographic Profile of Employment and Unemployment. Annual.

International Comparisons of Hourly Compensation Costs for Production Workers in Manufacturing. Annual.

International Comparisons of Manufacturing Productivity and Unit Labor Cost Trends. Annual.

Monthly Labor Review.

Occupational Injuries and Illnesses in the United States by Industry. Annual.

Occupational Projections and Training Data. Biennial.

Producer Price Indexes. Detailed report. Monthly, with annual supplement.

Productivity Measures for Selected Industries and Government Services. Annual.

Real Earnings. Monthly.

Relative Importance of Components in the Consumer Price Indexes. Annual.

State and Metropolitan Area Employment and Unemployment. Monthly.

U.S. Import and Export Price Indexes. Monthly.

Usual Weekly Earnings of Wage and Salary Workers. Quarterly.

Work Experience of the Population. Annual.

## **Bureau of Land Management**

Public Land Statistics. Annual.

## **Bureau of Mines**

Minerals Yearbook. Annual.

## **Bureau of the Mint**

Annual Report of the Director.

## **Bureau of Reclamation**

Summary Statistics:  
Vol. I, Water, Land, and Related Data.

## **Census Bureau**

Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles. In most cases, separate reports of the most recent censuses are available for each state, subject, industry, etc.

## **Census Bureau —Con.**

Annual Benchmark Report for Retail Trade.

Annual Benchmark Report for Wholesale Trade.

Annual Survey of Communication Services.

Annual Survey of Manufactures. (1996, most recent.)

Census of Construction Industries. Quinquennial. (1997, most recent.)

Census of Finance, Insurance, and Real Estate Industries. Quinquennial. (1997, most recent.)

Census of Governments. Government Organization (GC 97)

Census of Governments. Quinquennial.

Census of Housing. Decennial. (1990, most recent.)

Census of Manufactures. Quinquennial. (1997, most recent.)

Census of Mineral Industries. Quinquennial. (1997, most recent.)

Census of Population. Decennial. (1990, most recent.)

Census of Retail Trade. Quinquennial. (1997, most recent.)

Census of Service Industries. Quinquennial. (1997, most recent.)

Census of Transportation, Communications, and Utilities. Quinquennial. (1997, most recent.)

Census of Wholesale Trade. Quinquennial. (1997, most recent.)

City Employment. Annual. (CE90 No. 2.)

Congressional District Data:

1990 Census of Population and Housing, 1990 CPH-4, Congressional Districts of the 103rd Congress.

CFFR Consolidated Federal Funds Report. Annual.

Volume I County Areas

Volume II Subcounty Areas

County Business Patterns. Annual.

Current Construction Reports: Housing Starts, C20 (monthly); New Residential Construction in Selected Metropolitan Statistical Areas, C21 (quarterly); Housing Completions, C22 (monthly); New One-Family Houses Sold and for Sale, C25 (monthly with annual report, Characteristics of New Housing); Price Index of New One-Family Houses Sold, C27 (quarterly); Value of Construction Put in Place, C30 (monthly with occasional historical supplement); Housing Units Authorized by Building Permits, C40 (monthly and annual); Residential Improvements and Repairs, C50 (quarterly and annual).

Current Governments Reports: Public Employment, GE No. 1 (annual); City Employment, GE No. 2 (annual); Local Government Employment in Selected Metropolitan Areas and Large Counties, GE No. 3 (annual); County Government Employment, GE No. 4 (annual).

## **Census Bureau —Con.**

Current Housing Reports: Housing Vacancies, H-111 (quarterly and annual); Market Absorption of Apartments, H-130 (quarterly and annual); Characteristics of Apartments Completed, H-131 (annual); Annual Housing Survey, H-150 (series of six biennial reports); Annual Housing Survey—Housing Characteristics for Selected Metropolitan Areas, H-170.

Current Industrial Report, Survey of Pollution Abatement Costs and Expenditures, series MA-200.

Current Population Reports. (Series P20.)

Estimates and Projections, P25, Consumer Income and Poverty, P60 and Household Economic Studies, P70.

Economic Census of Outlying Area. Quinquennial.

Federal Aid to States for Fiscal Year. Annual.

FES Federal Expenditures by State for Fiscal Year. Annual.

International Briefs. (Series IB.)

International Population Reports. (Series IPC.)

Manufacturing Profiles. (series MP-1.) Annual.

Manufacturers' Shipments, Inventories, and Orders. Monthly.

Manufacturers' Shipments, Inventories, and Orders: 1987-96. Annual summary. (Current Industrial Reports M3-1(95).)

Manufacturers' Shipments to Federal Government Agencies. (Current Industrial Reports MA-175.) Conducted for economic census years ending in 2 and 7.)

Merchant Wholesalers Measures of Value Produced, Capital Expenditures, Depreciable Assets, and Operating Expenses. (1997, most recent.)

Minority-Owned Businesses. Quinquennial. (1997, Most recent.)

Monthly Retail Trade Report. Sales and Inventories.

Monthly Wholesale Trade Report. Sales and Inventories.

Population Profile of the United States. (Biennial Series P23.)

Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations.

Selected Characteristics of Retail Trade—Measures of Value Produced, Capital Expenditures, Depreciable Assets, and Operating Expenses. (1992, most recent.)

Selected Characteristics of Selected Service Industries—Capital Expenditures, Depreciable Assets, and Operating Expenses. (1992, most recent.)

Service Annual Survey Report.

Special Studies Reports. (Series on Special Studies, P23.)

Summary of U.S. International Trade in Goods and Services: includes cumulative data. (FT 900.)

## **Census Bureau —Con.**

Survey of the Origin of Exports of Manufacturing Establishments. Triennial. (Current Industrial Reports M76 (AS)-8.)

Survey of Plant Capacity Utilization. (Current Industrial Reports MQ-C1.)

Transportation Annual Survey.

Truck Inventory and Use Survey. Quinquennial. (1997, most recent.)

U.S. Commodity Exports and Imports as Related to Output. Annual. (Series ES2.)

U.S. Trade with Puerto Rico and U.S. Possessions. Monthly and Annual. (FT 895.)

World Population Profile: 1998 (Series WP.)

## **Centers for Disease Control and Prevention, Atlanta, GA**

Morbidity and Mortality Weekly Report. Annual.

## **Coast Guard**

Annual Report of the Secretary of Transportation.

Marine Casualty Statistics. Annual.

Polluting Incidents in and Around U.S. Waters. Annual.

## **Comptroller of the Currency**

Quarterly Journal.

## **Congressional Clerk of the House**

Statistics of the Presidential and Congressional Election Years. Biennial.

## **Council of Economic Advisers**

Economic Indicators. Monthly.

Economic Report of the President. Annual.

## **Council on Environmental Quality**

Environmental Quality. Annual.

## **Department of Agriculture**

Agricultural Chemical Usage. Field crops, vegetables (fruits and vegetables alternate years), restricted use pesticides. Chemical application rates and acres treated, selected states and U.S. Annual.

Agricultural Income and Finance. Situation and Outlook Report. Quarterly.

Agricultural Outlook. 11 issues per year.

Agricultural Price Reports. Reports on prices received for farm commodities, prices paid for farm supplies, indexes and parity ratios. Monthly and annual.

Agriculture and Trade Reports (five per year).

Western Europe

China

Developing Economies

Pacific Rim

USSR

CATFISH. 12 issues of Catfish processing, plus 4 issues of catfish production and annual issue of Trout Production.

Census of Agriculture. Quinquennial. (1997, most recent.)

## **Department of Agriculture —Con.**

Geographic Area Series (Internet, CD-ROM, Print), Volume 1

Cheddar Cheese Prices. U.S., regional prices for 40 and 640 LB blocks and 500 LB barrels; sales volumes. Weekly.

Cotton ginnings and winter wheat and rye seedings.

Crop Production Reports. Acreage, yield, and production of various commodities. Monthly and annual.

Crop Values Report. Price and value of various commodities. Annual.

Economic Indicators of the Farm Sector. A series of five annual issues.

Farm Labor. Quarterly.

Farmline. 11 issues per year.

Farm Numbers, Value. Farm numbers and land in farms, agricultural cash rents, agricultural land values, foreign ownership of U.S. Agricultural Land (ERS). Annual.

Financial Characteristics of U.S. (Agriculture Information Bulletin. No. 569.) Annual.

Food Consumption, Prices, and Expenditures, 1996. (Statistical Bulletin No. 928.) Revised annually.

Food Marketing Review, (Agricultural Economic Report No. 743). Revised annually.

Food Review. Quarterly.

Food Spending in American Households. (Statistical Bulletin No. 824.) Annual.

Foreign Agricultural Trade of the United States (FATUS). Bimonthly with annual supplements on calendar year and fiscal year trade statistics.

Fruit and Vegetable Reports. Acreage, yield, production, value, and utilization of various fruits and vegetables. Periodic.

Journal of Agricultural Economics Research. Quarterly.

Livestock and Meat Statistics, 1970-92. (Statistical Bulletin No. 874.) Annual.

Livestock Reports. Cattle, Cattle on Feed, Hogs and Pigs. Sheep, Goats, Wool, and Mohair. Monthly, Quarterly, and Annual.

Milk and Dairy Products Reports. Milk cows, milk production, and dairy products. Monthly and Annual.

Other Reports. Reports on varied items including cold storage, catfish, cherries, cranberries, trout, farm employment and wages, farm production expenditures, mink, mushrooms, and floriculture crops. Monthly and annual.

Poultry and Egg Reports. Reports covering eggs, chickens, turkeys, hatcheries, egg products, and poultry slaughter. Weekly, monthly, annual.

Rural Conditions and Trends. Quarterly.

Rural Development Perspectives. Three issues per year.

Situation and Outlook Reports. Issued for agricultural exports, cotton and wool, dairy, feed, fruit and tree nuts,

## **Department of Agriculture —Con.**

agricultural resources, livestock and poultry, oil crops, rice, aquaculture, sugar and sweeteners, tobacco, vegetables, wheat, and world agriculture. Periodic.

Stock Reports. Stocks of grain, hops, peanuts, potatoes, rice, and soybeans. Quarterly, annual, periodic.

U.S. Egg and Poultry Statistical Series, 1960-92. (Statistical Bulletin No. 872.) Periodic.

Usual planting and harvesting dates. Dates for major field crops. Periodic.

Weekly Weather and Crop Bulletin. Report summarizing weather and its effect on crops the previous week. Weekly.

## **Department of Agriculture, Food and Nutrition Service**

Annual Historical Review:

Food and Consumer Service Programs.

## **Department of Defense**

Foreign Military Sales and Military Assistance Facts. Annual.

## **Department of Education**

Annual Report.

## **Department of Health and Human Services**

Annual Report.

## **Department of Housing and Urban Development**

Survey of Mortgage Lending Activity. Monthly and quarterly press releases.

## **Department of Labor**

Annual Report of the Secretary.

## **Department of State**

United States Contribution to International Organizations. Issued in the House Documents series. Annual.

## **Department of State, Bureau of Consular Affairs**

Report of the Visa Office. Annual. (Dept. of State Pub. 8810.)

Summary of Passport Statistics. Annual.

## **Department of Transportation**

Airport Activity Statistics of Certified Route Air Carriers. Annual.

National Transportation Statistics, 1998.

Report of Passenger Travel Between the United States and Foreign Countries. Annual, semiannual, quarterly. Monthly.

Transportation Safety Information Report. Quarterly.

U.S. International Air Travel Statistics. Annual.

## **Department of the Treasury**

- Active Foreign Credits of the United States Government. Quarterly.
- Consolidated Financial Statements of the United States Government. (Prototype.)

# Guide to State Statistical Abstracts

This bibliography includes the most recent statistical abstracts for states published since 1987 plus those that will be issued in late 1999. For some states, a near equivalent has been listed in substitution for or in addition to a statistical abstract. All sources contain statistical tables on a variety of subjects for the state as a whole, its component parts, or both. The page counts given for publications are approximate. Internet sites also contain statistical data.

## Alabama

University of Alabama, Center for Business and Economic Research, Box 870221, Tuscaloosa 35487-0221. 205-348-6191. Internet site <<http://www.cba.ua.edu/cber/>>

*Economic Abstract of Alabama*. 1997. 488 pp.

## Alaska

Department of Commerce and Economic Development, Division of Trade & Development, P.O. Box 110804, Juneau 99811-0804. 907-465-2017. Internet site <<http://www.commerce.state.ak.us/trade/>>

*The Alaska Economy Performance Report*. 1996

## Arizona

University of Arizona, Economic and Business Research, College of Business and Public Administration, McClelland Hall 401 Tucson Arizona 85721-0001. 520-621-2155. Fax 520-621-2150. Internet site <<http://www.bpa.arizona.edu/newpage>>

*Arizona Statistical Abstract: A 1997 Data Handbook*. 616 pp.

*Arizona Economic Indicators*. 52 pp. Biennial.

*Arizona's Economy*. 16 pp. (Quarterly newsletter and data.)

## Arkansas

University of Arkansas at Little Rock, Institute for Economic Advancement, Economic Research, 2801 South University, Little Rock 72204. 501-569-8551.

*Arkansas State and County Economic Data*. 1998 16 pp. (Revised annually.)

University of Arkansas at Little Rock, Institute for Economic Advancement, Census State Data Center, Little Rock 72204. 501-569-8530.

*Arkansas Statistical Abstract*, 1998. 700 pp. (Revised biennially.)

## California

Department of Finance, 915 L Street, 8th Floor, Sacramento 95814. 916-322-4651. Internet site <<http://www.dof.ca.gov/>>

*California Statistical Abstract*, 1998.

## Colorado

University of Colorado, Business Research Division, Campus Box 420, Boulder 80309-0420. 303-492-8227. Internet site <<http://www.colorado.edu/libraries/govpubs/online/htm>>

*Statistical Abstract of Colorado*, 1987. 600 pp. (Latest and last edition).

## Connecticut

Connecticut Department of Economic & Community Development, 505 Hudson St., Hartford 06106. 1-860-270-8165. Internet site <<http://www.state.ct.us/ecd/>>

*Connecticut Market Data*. Fall/winter 1999. (Diskette also available.)

*Connecticut Town Profiles*, 1998-99. 340 pp.

## Delaware

Delaware Economic Development Office, 99 Kings Highway, Dover 19901. 302-739-4271. Internet site <<http://www.state.de.us/govern/agencies/dedo/index.htm>>

*Delaware Statistical Overview*, 1998.

## District of Columbia

Office of Planning, Data Management Division, 801 North Capitol St., N.E. Washington 20002. 202-442-7603.

*1990 Census, Population and Housing for the District of Columbia* 72 pp.

*1990 Census: Social, Economic and Housing*. (44 pp. for each of nine volumes).

*Socio-Economic Indicators by Census Tract*. 221 pp.

*Socio-Economic Indicators of Change by Census Tract*, 1980-1990. 146 pp.

Office of Policy and Evaluation, Executive Office of the Mayor, 1 Judiciary Square, Suite 920, 441 4th St., N.W., Washington 20001. 202-727-6979.

*Indices—A Statistical Index to DC Services*, Dec. 1994-96. 331 pp.

## Florida

University of Florida, Bureau of Economic and Business Research, 221 Matherly Hall, Gainesville 32611-7145. 352-392-0171. Internet site <<http://www.cba.ufl.edu/bebr/>>

*Florida Statistical Abstract*, 1998. 32nd ed. 800 pp. Also available on diskette.

*Florida County Perspectives*, 1998. One profile for each county. Annual.

*Florida County Rankings*, 1998.

*Florida and the Nation*, 1999.

## Georgia

University of Georgia, Selig Center for Economic Growth, Terry College of Business, Athens 30602-6269. 706-542-4085. Internet site <<http://www.selig.uga.edu/>>

*Georgia Statistical Abstract*, 1998-99. 500 pp.

University of Georgia, College of Agricultural and Environmental Sciences, Athens 30602-4356. 706-542-8938. Fax 706-542-8934. Internet site <<http://www.uga.edu/caes/>>

*The Georgia County Guide*. 1998. 17th ed. Annual. 200 pp.

## Hawaii

Hawaii State Department of Business, and Economic Development & Tourism, Research and Economic Analysis Division, Statistics Branch P.O. Box 2359, Honolulu 96804. Inquiries 808-586-2481; Copies 808-586-2423. Internet site <<http://www.hawaii.gov/dbedt>>

*The State of Hawaii Data Book 1997: A Statistical Abstract*. 30th ed. 679 pp.

## Idaho

Department of Commerce, 700 West State St., Boise 83720-0093. 208-334-2470. Internet site <<http://www.idoc.state.id.us>>

*County Profiles of Idaho*, 1998.

## Metropolitan Areas: Concepts, Components, and Population

Statistics for metropolitan areas (MAs) shown in the Statistical Abstract represent areas defined by the U.S. Office of Management and Budget (OMB) according to published standards that are applied to Census Bureau data. The general concept of an MA is that of a core area containing a large population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined MAs are based on application of 1990 standards (which appeared in the Federal Register on March 30, 1990) to 1990 decennial census data and to subsequent Census Bureau population estimates and special census data. Current MA definitions were announced by OMB effective June 30, 1999. MAs include metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs).

In this appendix, Table E presents geographic components and 1998 population estimates for each MSA, CMSA, and PMSA outside of New England. Table D presents definitions and data for New England county metropolitan areas (NECMAs), the county-based alternative metropolitan areas for the city- and town-based MSAs and CMSAs of the six New England states.

Standard definitions of metropolitan areas were first issued in 1949 by the then Bureau of the Budget (predecessor of OMB), under the designation "standard metropolitan area" (SMA). The term was changed to "standard metropolitan statistical area" (SMSA) in 1959 and to "metropolitan statistical area" (MSA) in 1983. The collective term "metropolitan area" (MA) became effective in 1990.

OMB has been responsible for the official metropolitan areas since they were first defined, except for the period 1977 to 1981, when they were the responsibility of the Office of Federal Statistical Policy

and Standards, Department of Commerce. The standards for defining metropolitan areas were modified in 1958, 1971, 1975, 1980, and 1990.

### Defining MSAs, CMSAs, and PMSA—

The current standards provide that each newly qualifying MSA must include at least: one city with 50,000 or more inhabitants, or a Census Bureau-defined urbanized area (of at least 50,000 inhabitants) and a total metropolitan population of at least 100,000 (75,000 in New England). Under the standards, the county (or counties) that contains the largest city becomes the "central county" (counties), along with any adjacent counties that have at least 50 percent of their population in the urbanized area surrounding the largest city. Additional "outlying counties" are included in the MSA if they meet specified requirements of commuting to the central counties and other selected requirements of metropolitan character (such as population density and percent urban). In New England, the MSAs are defined in terms of cities and towns rather than counties. An area that meets these requirements for recognition as an MSA and also has a population of 1 million or more may be recognized as a CMSA if separate component areas can be identified within the entire area by meeting statistical criteria specified in the standards, and local opinion indicates there is support for the component areas. If recognized, the component areas are designated PMSAs, and the entire area becomes a CMSA. PMSAs, like the CMSAs that contain them, are composed of entire counties, except in New England where they are composed of cities and towns. If no PMSAs are recognized, the entire area is designated as an MSA. As of the June 30, 1999, OMB announcement, there were 258 MSAs, and 18 CMSAs comprising 73 PMSAs in the United States. In addition, there were three MSAs, one CMSA, and three PMSAs in Puerto Rico.

**Central cities and MA titles**—The largest city in each MSA/CMSA is designated a “central city.” Additional cities qualify if specified requirements are met concerning population size and commuting patterns. The title of each MSA consists of the names of up to three of its central cities and the name of each state into which the MSA extends. However, a central city with less than 250,000 population and less than one-third the population of the area’s largest city is not included in an MSA title unless local opinion supports its inclusion. Titles of PMSAs also typically are based on central city names but in certain cases consist of county names. Generally, titles of CMSAs are based on the titles of their component PMSAs.

**Defining New England County Metropolitan Areas NECMAs**—The OMB defines NECMAs as a county-based alternative to the city- and town-based New England MSAs and CMSAs. The NECMA for an MSA or CMSA includes: the county containing the first-named city in that MSA/CMSA title (this county may include the first-named cities of other MSAs/CMSAs as well), and each additional county having at least half its population in the MSAs/CMSAs whose first-named cities are in the previously identified county. NECMAs are not identified for individual PMSAs. There are 12 NECMAs, including 1 for the Boston-Worcester-Lawrence, MA-NH-ME-CT CMSA and 1 for the Connecticut portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT-PA CMSA. Central cities of a NECMA

are those cities in the NECMA that qualify as central cities of an MSA or a CMSA. NECMA titles derive from names of central cities.

**Changes in MA definitions over time**—Changes in the definitions of MAs since the 1950 census have consisted chiefly of the recognition of new areas as they reached the minimum required city or area population, and the addition of counties (or cities and towns in New England) to existing areas as new decennial census data showed them to qualify. In some instances, formerly separate MAs have been merged, components of an MA have been transferred from one MA to another, or components have been dropped from an MA. The large majority of changes have taken place on the basis of decennial census data. However, Census Bureau population estimates and special censuses serve as the basis for intercensal updates.

Because of these historical changes in geographic definitions, users must be cautious in comparing MA data from different dates. For some purposes, comparisons of data for MAs as defined at given dates may be appropriate; for other purposes, it may be preferable to maintain consistent MA definitions.

In Tables A, B, and C below, data are given for MAs as defined for specific dates, thereby indicating the extent of change in population and land area resulting from revisions in definitions.

**Table A. Number, Population, and Land Area of MAs as Defined at Specified Dates From 1960 to 1998**

[The differences in population shown here for each year within each column of the table result entirely from net expansion of metropolitan territory through changes in the MA definitions. The differences in population over time shown for each MA definition (on the successive lines of the table) result entirely from population changes within that territory, unaffected by changes in MA definitions. The changes in 1990 land area result entirely from net change in MA territory. All data include Alaska and Hawaii and exclude Puerto Rico. Subtraction of any line of the table from the line below will show the net effect of change in population and land area undergone by the MAs as the result of changes in definitions between the specified dates. Such changes may have occurred throughout the period, not on any single date, and may have included reductions in, as well as additions to, MA territory. Census population data through 1980 include corrections made since publication. The area data for the 1960, 1970, and 1980 census definitions of MAs differ from the data published in those censuses because of subsequent remeasurement of land areas and changes in inland water area occurring for the 1990 census]

MA definition as of—	Number of MAs	Population					Land area, 1990 (sq. mi.)
		1960 (April 1)	1970 (April 1)	1980 (April 1)	1990 (April 1)	1996 (July 1)	
1960 census (Nov. 1960) . . . . .	212	112,885,139	130,982,661	140,793,427	155,088,626	163,749,752	308,742

## Appendix III

# Limitations of the Data

---

**Introduction**—The data presented in this *Statistical Abstract* came from many sources. The sources include not only Federal statistical bureaus and other organizations that collect and issue statistics as their principal activity, but also governmental administrative and regulatory agencies, private research bodies, trade associations, insurance companies, health associations, and private organizations such as the National Education Association and philanthropic foundations. Consequently, the data vary considerably as to reference periods, definitions of terms and, for ongoing series, the number and frequency of time periods for which data are available.

The statistics presented were obtained and tabulated by various means. Some statistics are based on complete enumerations or censuses while others are based on samples. Some information is extracted from records kept for administrative or regulatory purposes (school enrollment, hospital records, securities registration, financial accounts, social security records, income tax returns, etc.), while other information is obtained explicitly for statistical purposes through interviews or by mail. The estimation procedures used vary from highly sophisticated scientific techniques to crude “informed guesses.”

Each set of data relates to a group of individuals or units of interest referred to as the *target universe* or *target population* or simply as the *universe* or *population*. Prior to data collection, the target universe should be clearly defined. For example, if data are to be collected for the universe of households in the United States, it is necessary to define a “household.” The target universe may not be completely tractable. Cost and other considerations may restrict data collection to a *survey universe* based on some available list; such list may be it of date. This list is called a *survey frame* or *sampling frame*.

The data in many tables are based on data obtained for all population units, a *census*, or on data obtained for only a portion, a *sample*, of the population units. When the data presented are based on a sample, the sample is usually a scientifically selected *probability sample*. This is a sample selected from a list or sampling frame in such a way that every possible sample has a known chance of selection and usually each unit selected can be assigned a number, greater than zero and less than or equal to one, representing its likelihood or probability of selection.

For large-scale sample surveys, the probability sample of units is often selected as a multistage sample. The first stage of a multistage sample is the selection of a probability sample of large groups of population members, referred to as primary sampling units (PSUs). For example, in a national multistage household sample, PSUs are often counties or groups of counties. The second stage of a multistage sample is the selection, within each PSU selected at the first stage, of smaller groups of population units, referred to as secondary sampling units. In subsequent stages of selection, smaller and smaller nested groups are chosen until the ultimate sample of population units is obtained. To qualify a multistage sample as a probability sample, all stages of sampling must be carried out using probability sampling methods.

Prior to selection at each stage of a multistage (or a single stage) sample, a list of the sampling units or sampling frame for that stage must be obtained. For example, for the first stage of selection of a national household sample, a list of the counties and county groups that form the PSUs must be obtained. For the final stage of selection, lists of households, and sometimes persons within the households, have to be compiled in the field. For surveys of economic entities and for the economic censuses, the Census

Bureau generally uses a frame constructed from the Bureau's Standard Statistical Establishment List (SSEL). The SSEL contains all establishments with payroll in the United States including small single establishment firms as well as large multiestablishment firms.

Wherever the quantities in a table refer to an entire universe, but are constructed from data collected in a sample survey, the table quantities are referred to as *sample estimates*. In constructing a sample estimate, an attempt is made to come as close as is feasible to the corresponding universe quantity that would be obtained from a complete census of the universe. Estimates based on a sample will, however, generally differ from the hypothetical census figures. Two classifications of errors are associated with estimates based on sample surveys: (1) *sampling error*—the error arising from the use of a sample, rather than a census, to estimate population quantities and (2) *nonsampling error*—those errors arising from nonsampling sources. As discussed below, the magnitude of the sampling error for an estimate can usually be estimated from the sample data. However, the magnitude of the nonsampling error for an estimate can rarely be estimated. Consequently, actual error in an estimate exceeds the error that can be estimated.

The particular sample used in a survey is only one of a large number of possible samples of the same size which could have been selected using the same sampling procedure. Estimates derived from the different samples would, in general, differ from each other. The *standard error* (SE) is a measure of the variation among the estimates derived from all possible samples. The standard error is the most commonly used measure of the sampling error of an estimate. Valid estimates of the standard errors of survey estimates can usually be calculated from the data collected in a probability sample. For convenience, the standard error is sometimes expressed as a percent of the estimate and is called the relative standard error or *coefficient of variation* (CV). For example, an estimate of 200 units with an estimated standard error of 10 units has an estimated CV of 5 percent.

A sample estimate and an estimate of its standard error or CV can be used to construct interval estimates that have a prescribed confidence that the interval includes the average of the estimates derived from all possible samples with a known probability. To illustrate, if all possible samples were selected under essentially the same general conditions and using the same sample design and if an estimate and its estimated standard error were calculated from each sample, then: 1) Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average estimate derived from all possible samples; 2) approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average estimate derived from all possible samples; and 3) approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average estimate derived from all possible samples.

Thus, for a particular sample, one can say with the appropriate level of confidence (e.g., 90% or 95%) that the average of all possible samples is included in the constructed interval. Example of a confidence interval: An estimate is 200 units with a standard error of 10 units. An approximately 90 percent confidence interval (plus or minus 1.6 standard errors) is from 184 to 216.

All surveys and censuses are subject to nonsampling errors. Nonsampling errors are of two kinds—*random* and *nonrandom*. Random nonsampling errors arise because of the varying interpretation of questions (by respondents or interviewers) and varying actions of coders, keyers, and other processors. Some randomness is also introduced when respondents must estimate values. These same errors usually have a nonrandom component. Nonrandom nonsampling errors result from total nonresponse (no usable data obtained for a sampled unit), partial or item nonresponse (only a portion of a response may be usable), inability or unwillingness on the part of respondents to provide correct information, difficulty

interpreting questions, mistakes in recording or keying data, errors of collection or processing, and coverage problems (overcoverage and undercoverage of the target universe). Random nonresponse errors usually, but not always, result in an understatement of sampling errors and thus an overstatement of the precision of survey estimates. Estimating the magnitude of nonsampling errors would require special experiments or access to independent data and, consequently, the magnitudes are seldom available.

Nearly all types of nonsampling errors that affect surveys also occur in complete censuses. Since surveys can be conducted on a smaller scale than censuses, nonsampling errors can presumably be controlled more tightly. Relatively more funds and effort can perhaps be expended toward eliciting responses, detecting and correcting response error, and reducing processing errors. As a result, survey results can sometimes be more accurate than census results.

To compensate for suspected nonrandom errors, adjustments of the sample estimates are often made. For example, adjustments are frequently made for nonresponse, both total and partial. Adjustments made for either type of nonresponse are often referred to as *imputations*. Imputation for total nonresponse is usually made by substituting for the questionnaire responses of the nonrespondents the "average" questionnaire responses of the respondents. These imputations usually are made separately within various groups of sample members, formed by attempting to place respondents and nonrespondents together that have "similar" design or ancillary characteristics. Imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are "similar" to those of the nonrespondent.

For an estimate calculated from a sample survey, the *total error* in the estimate is composed of the sampling error, which can usually be estimated from the sample, and the nonsampling error, which usually cannot be estimated from the

sample. The total error present in a population quantity obtained from a complete census is composed of only nonsampling errors. Ideally, estimates of the total error associated with data given in the *Statistical Abstract* tables should be given. However, due to the unavailability of estimates of nonsampling errors, only estimates of the levels of sampling errors, in terms of estimated standard errors or coefficients of variation, are available. To obtain estimates of the estimated standard errors from the sample of interest, obtain a copy of the referenced report which appears at the end of each table.

**Principal data bases**—Beginning below are brief descriptions of 36 of the sample surveys and censuses that provide a substantial portion of the data contained in this *Abstract*.

## SECTION 1. POPULATION

**Source and Title:** U.S. Census Bureau, *Census of Population*

**Tables:** See tables citing *Census of Population* in Section 1 and also in Sections 2, 4, 6, 8, 13, 14, 21, and 29.

**Universe, Frequency, and Types of Data:** Complete count of U.S. population conducted every 10 years since 1790. Data obtained on number and characteristics of people in the United States.

**Type of Data Collection Operation:** In 1970, 1980, and 1990 complete census for some items—age, sex, race, marital status, and relationship to householder. In 1970, other items collected from a 5% and a 15% probability (systematic) sample of the population. In 1980, approximately 19% of the housing units were included in the sample; in 1990, approximately 17%.

**Data Collection and Imputation Procedures:** In 1970, extensive use of mail questionnaires in urban areas; personal interviews in most rural areas. In 1980 and 1990, mail questionnaires were used in even more areas than in 1970, with personal interviews in the remainder. Extensive telephone and personal followup for nonrespondents was done in the censuses. Imputations were made for missing characteristics.

**Estimates of Sampling Error:** Sampling errors for data are estimated for all items collected by sample and vary by

characteristic and geographic area. The CVs for national and state estimates are generally very small.

**Other (Nonsampling) Errors:** Since 1950, evaluation programs have been conducted to provide information on the magnitude of some sources of nonsampling errors such as response bias and undercoverage in each census. Results from the evaluation program for the 1990 census indicate that the net under coverage amounted to about 1.5% to 2% of the total resident population.

**Sources of Additional Material:** U.S. Census Bureau, *The Coverage of Population in the 1980 Census*, PHC80-E4; *Content Reinterview Study: Accuracy of Data for Selected Population and Housing Characteristics as Measured by Reinterview*, PHC80-E2; *1980 Census of Population, Vol. 1.*, (PC80-1), Appendixes B, C, and D.

**Source and Title:** U.S. Census Bureau, *Current Population Survey (CPS)*.

**Tables:** See tables citing *Current Population Reports* primarily in Section 1, but also in Sections 2, 3, 4, 8, 12, 13, 14, 18, 23, and 29. Many Bureau of Labor Statistics' (BLS) tables in Section 13 are CPS based.

**Universe, Frequency, and Types of**

**Data:** Nationwide monthly sample survey of civilian noninstitutional population, 15 years old or over, to obtain data on employment, unemployment, and a number of other characteristics.

**Type of Data Collection Operation:**

Multistage probability sample of about 50,000 households in 754 PSUs in 1996. Over-sampling in some states and the largest MSAs to improve reliability for those areas of employment data on annual average basis. A continual sample rotation system is used. Households are in sample 4 months, out for 8 months, and in for 4 more. Month-to-month overlap is 75%; year-to-year overlap is 50%.

**Data Collection and Imputation Procedures:** For first and fifth months that a household is in sample, personal interviews; other months, approximately, 85% of the data collected by phone. Imputation is done for both item and total nonresponse. Adjustment for total nonresponse is done by a predefined

cluster of units, by MSA size and residence; for item nonresponse imputation varies by subject matter.

**Estimates of Sampling Error:** Estimated CVs on national annual averages for labor force, total employment, and nonagricultural employment, 0.2%; for total unemployment and agricultural employment, 1.0% to 2.5%. The estimated CVs for family income and poverty rate for all persons in 1986 are 0.5% and 1.5%, respectively. CVs for subnational areas, such as states, would be larger and would vary by area.

**Other (Nonsampling) Errors:** Estimates of response bias on unemployment are not available, but estimates of unemployment are usually 5% to 9% lower than estimates from reinterviews. Four to 5.0% of sample households unavailable for interviews.

**Sources of Additional Material:** U.S. Census Bureau and Bureau of Labor Statistics, *Concepts and Methods Used in Labor Force Statistics from Current Population Survey* (Census Series P-23, No. 62; BLS Report No. 463) and U.S. Census Bureau, *Current Population Survey* (Tech. Paper 40) and Bureau of Labor Statistics, *Employment and Earnings*, monthly, Explanatory Notes and Estimates of Error, Tables 1-A through 1-H and *BLS Handbook of Methods*, Chapter 1 (Bulletin 2490.)

## SECTION 2. VITAL STATISTICS

**Source and Title:** U.S. National Center for Health Statistics (NCHS), *National Vital Statistics System*.

**Tables:** See tables citing *Vital Statistics of the United States*; 348 in Section 5; and 1333 in Section 29.

**Universe, Frequency, and Types of**

**Data:** Annual data on births and deaths in the United States.

**Type of Data Collection Operation:**

Mortality data based on complete file of death records, except 1972, based on 50% sample. Natality statistics 1951-71, based on 50% sample of birth certificates, except a 20% to 50% in 1967, received by NCHS. Beginning 1972, data from some states received through Vital Statistics Cooperative Program (VSCP) and complete file used; data from other states based on 50% sample. Beginning 1986, all reporting areas participated in the VSCP.

**Data Collection and Imputation Procedures:** Reports based on records from registration offices of all states, District of Columbia, New York City, Puerto Rico, Virgin Islands, and Guam.

**Estimates of Sampling Error:** For recent years, CVs for births are small due to large portion of total file in sample (except for very small estimated totals).

**Other (Nonsampling) Errors:** Data on births and deaths believed to be at least 99% complete.

**Sources of Additional Material:** U.S. National Center for Health Statistics, *Vital Statistics of the United States*, Vol. I and Vol. II, annual, and *National Vital Statistics Report*.

(See Section 1 above for information pertaining to Tables 106-109.)

### SECTION 3. HEALTH AND NUTRITION

**Source and Title:** U.S. National Center for Health Statistics, *National Health Interview Survey (NHIS)*.

**Tables:** 198, 202, 222, 223, 230-233, and 239.

**Universe, Frequency, and Types of**

**Data:** Continuous data collection covering the civilian noninstitutional population to obtain information on personal and demographic characteristics, illnesses, injuries, impairments, and other health topics.

**Type of Data Collection Operation:**

Multistage probability sample of 49,000 households (in 198 PSUs) from 1985 to 1994; 43,000 households (358 design PSUs) from 1995 on, selected in groups of about four adjacent households.

**Data Collection and Imputation Procedures:** Some missing data items (e.g., age) are imputed using an average value. Unit nonresponse is compensated for by an adjustment to the survey weights.

**Estimates of Sampling Error:** Estimated CVs: For physician visits by males, 1.5%; for workdays lost by males, 3.5%; for persons injured at home, 4.7%.

**Other (Nonsampling) Errors:** Response rate was 93.8% in 1996 for the NHIS.

**Sources of Additional Material:** U.S. National Center for Health Statistics, "Current Estimates from the National Health Interview Survey, U.S., 1996," Vital and Health Statistics, Series 10 #200.

(See Section 13 for information pertaining to Table 193, Section 15 for Table 183, and Section 27 for Table 192.)

### SECTION 4. EDUCATION

**Source and Title:** U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS)*, *Fall Enrollment in Institutions of Higher Education*; beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS)*, *Fall Enrollment*.

**Tables:** 308, 309, 312, and 313.

**Universe, Frequency, and Types of**

**Data:** Annual survey of all institutions and branches listed in the *Directory* to obtain data on total enrollment by sex, level of enrollment, type of program, racial/ethnic characteristics (every other year prior to 1990, then annually) and attendance status of student, and on first-time students.

**Type of Data Collection Operation:** Complete census.

**Data Collection and Imputation Procedures:** Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** For degree-granting institutions approximately 92% response rate in fall 1996.

**Sources of Additional Material:** U.S. Department of Education, National Center for Education Statistics, *Fall Enrollment in Higher Education*, annual.

**Source and Title:** U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS)*, *Financial Statistics of Institutions of Higher Education*; beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS)*, *Finance*.

**Tables:** 254, 257, 312, and 315.

**Universe, Frequency, and Types of**

**Data:** Annual survey of all institutions and branches listed in the *Education Directory, Colleges and Universities*, to obtain data on financial status and operations, including current funds revenues, current funds expenditures, and physical plant assets.

**Type of Data Collection Operation:** Complete census.

**Data Collection and Imputation Procedures:**

Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for non-respondents. Missing data are imputed by using data of similar institutions.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** For 1996, a 96% response rate for institutions of higher education; 83% for degree-granting institutions.

**Sources of Additional Material:** U.S. Department of Education, National Center for Education Statistics, *Financial Statistics*.

**Source and Title:** U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Degrees and Other Formal Awards Conferred*. Beginning 1986, *Integrated Postsecondary Education Data Survey (IPEDS), Completions*.

**Tables:** 329-334.

**Universe, Frequency, and Types of**

**Data:** Annual survey of all institutions and branches listed in the *Education Directory, Colleges and Universities* to obtain data on earned degrees and other formal awards, conferred by field of study, level of degree, sex, and by racial/ethnic characteristics (every other year prior to 1990, then annually).

**Type of Data Collection Operation:** Complete census.

**Data Collection and Imputation Procedures:**

Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for non-respondents. Missing data are imputed by using data of similar institutions.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** For 1995-96, approximately 98% response rate for degree-granting institutions.

**Sources of Additional Material:** U.S. Department of Education, National Center for Education Statistics, *Completions*, annual.

(See Sections 1 and 9 for information pertaining to the U.S. Census Bureau and Section 5 for information pertaining to Table 268.)

**SECTION 5. LAW ENFORCEMENT, COURTS, AND PRISONS**

**Source and Title:** U.S. Federal Bureau of Investigation, *Uniform Crime Reporting (UCR) Program*

**Tables:** 342-347, 349-352, 357, 358, and 360.

**Universe, Frequency, and Types of**

**Data:** Monthly reports on the number of criminal offenses that become known to law enforcement agencies. Data are collected on crimes cleared by arrest, by age, sex, and race of offender and on assaults on law enforcement officers.

**Type of Data Collection Operation:**

Crime statistics are based on reports of crime data submitted either directly to the FBI by contributing law enforcement agencies or through cooperating state UCR programs.

**Data Collection and Imputation Procedures:**

States with UCR programs collect data directly from individual law enforcement agencies and forward reports, prepared in accordance with UCR standards, to FBI. Accuracy and consistency edits are performed by FBI.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** Coverage of 95% of the population (92.9% in MSAs, 77.4% in "other cities," and 77.1% in rural areas) by UCR program, though varying number of agencies report. Some error may be present through incorrect reporting.

**Sources of Additional Material:** U.S. Federal Bureau of Investigation, *Crime in the United States, Hate Crime Statistics*, annual, *Law Enforcement Officers Killed & Assaulted*, annual.

**Source and Title:** U.S. Bureau of Justice Statistics (BJS), *National Crime Victimization Survey*.

**Tables:** 353-356, Table 268 in Section 4, and Table 715 in Section 13.

**Universe, Frequency, and Types of**

**Data:** Monthly survey of individuals and households in the United States to obtain data on criminal victimization of those units for compilation of annual estimates.

**Type of Data Collection Operation:**

National probability sample survey of about 50,000 interviewed households in 376 PSUs selected from a list of addresses from the 1980 census, supplemented by new construction permits and an area sample where permits are not required.

**Data Collection and Imputation Procedures:**

Interviews are conducted every 6 months for 3 years for each household in the sample; 8,000 households are interviewed monthly. Personal interviews are used in the first and fifth interviews; the intervening interviews are conducted by telephone whenever possible.

**Estimates of Sampling Error:** CVs in 1994: 2.7% for crimes of violence; 8.5% for estimate of rape/sexual assault counts; 5.5% for robbery counts; 2.8% for assault counts; 8.0% for personal theft counts; 1.9% for property crimes; 3.0% for burglary counts; 2.0% for theft; and 4.4% for motor vehicle theft counts.

**Other (Nonsampling) Errors:** Respondent recall errors which may include reporting incidents for other than the reference period; interviewer coding and processing errors; and possible mistaken reporting or classifying of events. Adjustment is made for a household noninterview rate of about 4% and for a within-household noninterview rate of 7%.

**Sources of Additional Material:** U.S. Bureau of Justice Statistics, *Criminal Victimization in the United States*, annual.

(See Section 2 for details on Table 348.)

## SECTION 7. PARKS AND RECREATION

(See Section 27 for details on Tables 432 and 456.)

## SECTION 8. ELECTIONS

(See Section 1 above for information pertaining to Tables 487 and 488 and Section 9 for information pertaining to Table 481.)

## SECTION 9. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT

**Source and Title:** U.S. Census Bureau, *Census of Governments*.

**Tables:** See tables in Section 9 citing *Census of Governments* and Table 481 in Section 8.

**Universe, Frequency, and Types of**

**Data:** Survey of all governmental units in the United States conducted every 5 years to obtain data on government revenue, expenditures, debt, assets, employment and employee retirement systems, property values, public school systems, and number, size, and structure of governments.

**Type of Data Collection Operation:**

Complete census. List of units derived through classification of government units recently authorized in each state and identification, counting, and classification of existing local governments and public school systems.

**Data Collection and Imputation Procedures:**

Data collected through field and office compilation of financial data from official records and reports for states and large local governments; mail canvass of selected data items, like state tax revenue and employee retirement systems; and collection of local government statistics through central collection arrangements with state governments.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** Some nonsampling errors may arise due to possible inaccuracies in classification, response, and processing.

**Sources of Additional Material:** U.S. Census Bureau, *Census of Governments, 1987*, various reports, and *State Government Finances in 1990*, GF 90, No. 3.

**Source and Title:** U.S. Census Bureau, *Annual Surveys of State and Local Government*.

**Tables:** See tables citing *Public Employment* and *Government Finances* in Section 9 and Table 285 in Section 4; and Table 620 in Section 12.

**Universe, Frequency, and Types of**

**Data:** Sample survey conducted annually to obtain data on revenue, expenditure, debt, and employment of state and local governments. Universe is all governmental units in the United States (about 87,000).

**Type of Data Collection Operation:**

Sample of about 22,000 units includes all state governments, county governments with 50,000+ population, municipalities and townships with 25,000+ population, all school districts with 10,000+ enrollment in October 1986, and other governments meeting certain criteria; probability sample for remaining units.

**Data Collection and Imputation Procedures:**

Field and office compilation of data from official records and reports for states and large local governments; central collection of local governmental financial data through cooperative agreements with a number of state governments; mail canvass of other units with mail and telephone followups of nonrespondents. Data for nonresponses are imputed from previous year data or obtained from secondary sources, if available.

**Estimates of Sampling Error:** CVs for estimates of major employment and financial items are generally less than 2% for most states and less than 1.2% for the majority of states.

**Other (Nonsampling) Errors:** Nonresponse rate is less than 15% for number of units. Other possible errors may result from undetected inaccuracies in classification, response, and processing.

**Sources of Additional Material:** U.S. Census Bureau, *Public Employment in 1990*, GE 90, No. 1, *Governmental Finances in 1989-90*, GF 90, No. 5, and *Census of Governments, 1987*, various reports.

**SECTION 10. FEDERAL GOVERNMENT**

**Source and Title:** U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns*.

**Tables:** 558-562.

**Universe, Frequency, and Types of**

**Data:** Annual study of unaudited individual income tax returns, Forms 1040, 1040A, and 1040EZ, filed by U.S. citizens and residents. Data provided on

various financial characteristics by size of adjusted gross income, marital status, and by taxable and nontaxable returns. Data by state, based on 100% file, also include returns from 1040NR, filed by nonresident aliens plus certain self-employment tax returns.

**Type of Data Collection Operation:**

Annual stratified probability sample of approximately 125,000 returns broken into sample strata based on the larger of total income or total loss amounts as well as the size of business plus farm receipts. Sampling rates for sample strata varied from .025% to 100%.

**Data Collection and Imputation Procedures:**

Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

**Estimates of Sampling Error:**

Estimated CVs for tax year 1987: Adjusted gross income less deficit .13%; salaries and wages .20%; and tax-exempt interest received 4.51%. (State data not subject to sampling error.)

**Other (Nonsampling) Errors:** Processing errors and errors arising from the use of tolerance checks for the data.

**Sources of Additional Material:** U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns*, annual.

**SECTION 12. SOCIAL INSURANCE AND HUMAN SERVICES**

**Source and Title:** U.S. Social Security Administration, *Benefit Data*.

**Tables:** 616 and 617.

**Universe, Frequency, and Types of**

**Data:** All persons receiving monthly benefits under Title II of Social Security Act. Data on number and amount of benefits paid by type and state.

**Type of Data Collection Operation:**

Data based on administrative records. Data based on 100% files, as well as 10% and 1% sample files.

**Data Collection and Imputation Procedures:** Records used consist of actions pursuant to applications dated by subsequent post-entitlement actions.

**Estimates of Sampling Error:** Varies by size of estimate and sample file size.

**Other (Nonsampling) Errors:** Processing errors, which are believed to be small.

**Sources of Additional Material:** U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin*.

**Source and Title:** U.S. Social Security Administration, *Supplemental Security Income (SSI) Program*.

**Tables:** 631 and 632.

**Universe, Frequency, and Types of Data:** All eligible aged, blind, or disabled persons receiving SSI benefit payments under SSI program. Data include number of persons receiving federally administered SSI, amounts paid, and state administered supplementation.

**Type of Data Collection Operation:** Data based on administrative records.

**Data Collection and Imputation Procedures:** Data adjusted to reflect returned checks and overpayment refunds. For federally administered payments, actual adjusted amounts are used.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** Processing errors, which are believed to be small.

**Sources of Additional Material:** U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin*.

(See Section 1 above for information pertaining to the Current Population Survey and Section 9 for information pertaining to Annual Surveys of State and Local Government.)

## SECTION 13. LABOR FORCE, EMPLOYMENT, AND EARNINGS

**Source and Title:** U.S. Bureau of Labor Statistics (BLS), *Current Employment Statistics (CES) Program*.

**Tables:** 688-690, 698; in Section 3, Table 193; in Section 21, Table 1016; and in Section 22, Table 1083.

**Universe, Frequency, and Types of Data:** Monthly survey covering about 6 million nonagricultural establishments to obtain data on employment, hours, and earnings, by industry.

**Type of Data Collection Operation:** Sample survey of about 390,000 establishments in June 1998.

**Data Collection and Imputation Procedures:** Cooperating state agencies mail questionnaires to sample establishments to develop state and local estimates; information is forwarded to BLS where national estimates are prepared.

**Estimates of Sampling Error:** Estimated CVs for employment, 0.1%, for average weekly hours paid, 0.1% and for average hourly earnings, 0.2%.

**Other (Nonsampling) Errors:** Estimates of employment adjusted annually to reflect complete universe. Average adjustment is 0.3%.

**Sources of Additional Material:** U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly, Explanatory Notes and Estimates of Error, Tables 2-A through 2-G.

(See Section 1 above for information pertaining to the Current Population Survey and Section 5 for information pertaining to Table 715.)

## SECTION 14. INCOME, EXPENDITURES, AND WEALTH

**Source and Title:** Board of Governors of the Federal Reserve System, *Survey of Consumer Finances*.

**Tables:** 771 and 772, and in Section 16, 801, 803-805, and 826.

**Universe, Frequency, and Types of Data:** Periodic sample survey of families. In this survey a given household is divided into a primary economic unit and other economic units. The primary economic unit, which may be a single individual, is generally chosen as the unit that contains the person who either holds the title to the home or is the first person listed on the lease. The primary unit is used as the reference family. The survey collects detailed data on the composition of family balance sheets, the terms of loans, and relationships with financial institutions. It also gathered information on the employment history and pension rights of the survey respondent and the spouse or partner of the respondent.

**Type of Data Collection Operation:** The survey employs a two-part strategy for sampling families. Some families were selected by standard multistage area-probability sampling methods from the 48 contiguous states. The remaining families in the survey were selected

using tax data under the strict rules governing confidentiality and the rights of potential respondents to refuse participation.

**Data Collection and Imputation Procedures:** The Survey Research Center at the University of Michigan collected the 1989 survey data between August 1989 and March 1990. Adjustments for nonresponse errors are made through systematic imputation of unanswered questions and through weighting adjustments based on data used in the sample design for families that refused participation.

**Estimates of Sampling Error:** Because of the complex design of the survey, the estimation of potential sampling errors is not straightforward.

**Other (Nonsampling) Errors:** The achieved sample of 3,143 families represents a response rate of about 69 percent in the area-probability sample and a rate of about 34% in the tax-data sample. Proper training of interviewers and careful design of questionnaires were used to control inaccurate survey responses.

**Sources of Additional Material:** Board of Governors of the Federal Reserve System, "Changes in Family Finances from 1983 to 1989: Evidence from the Survey of Consumer Finances," *Federal Reserve Bulletin*, January 1992.

(See Section 1 above for information pertaining to the U.S. Census Bureau.)

## SECTION 15. PRICES

**Source and Title:** U.S. Bureau of Labor Statistics (BLS), *Consumer Price Index (CPI)*

**Tables:** 775-778, 790, and in Section 3, Table 183.

**Universe, Frequency, and Types of Data:** Monthly survey of price changes of all types of consumer goods and services purchased by urban wage earners and clerical workers prior to 1978 and urban consumers thereafter. Both indexes continue to be published.

**Type of Data Collection Operation:** Prior to 1978, sample of various consumer items in 56 urban areas; thereafter, in 85 PSUs, except from January 1987 through March 1988, when 91 areas were sampled.

**Data Collection and Imputation Procedures:** Prices of consumer items are obtained from about 57,000 housing units and 19,000 other reporters in 85 areas. Prices of food, fuel, and a few other items are obtained monthly; prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in others.

**Estimates of Sampling Error:** Estimates of standard errors are not available at present.

**Other (Nonsampling) Errors:** Errors result from inaccurate reporting, difficulties in defining concepts and their operational implementation, and introduction of product quality changes and new products.

**Sources of Additional Material:** U.S. Bureau of Labor Statistics, *The Consumer Price Index: 1987 Revision*, Report 736, and *BLS Handbook of Methods*, Chapter 19, Bulletin 2414.

**Source and Title:** U.S. Bureau of Labor Statistics, *Producer Price Index (PPI)*

**Tables:** 775, 781-783, and in Section 21, Table 1066; in Section 24, Table 1155; and in Section 25, Table 1192.

**Universe, Frequency, and Types of Data:** Monthly survey of producing companies to determine price changes of all commodities produced in the United States for sale in commercial transactions. Data on agriculture, forestry, fishing, manufacturing, mining, gas, electricity, public utilities, and a few services.

**Type of Data Collection Operation:** Probability sample of approximately 3,100 about 75,000 quotations per month.

**Data Collection and Imputation Procedures:** Data are collected by mail. If transaction prices are not supplied, list prices are used. Some prices are obtained from trade publications, organized exchanges, and government agencies. To calculate index, price changes are multiplied by their relative weights based on total net selling value of all commodities in 1982.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** Not available at present.

**Sources of Additional Material:** U.S. Bureau of Labor Statistics, *BLS Handbook of Methods*, Chapter 16, Bulletin 2414.

## **SECTION 16. BANKING, FINANCE AND INSURANCE**

(See Section 14 for information pertaining to Tables 801, 803-805, and 826 and Section 17 for information pertaining to Table 796.)

## **SECTION 17. BUSINESS ENTERPRISE**

**Source and Title:** U.S. Census Bureau, *County Business Patterns*.

**Tables:** 874-876, 881, and in Section 16, Table 796; in Section 27, Tables 1275 and 1305; and in Section 29, Table 1342.

**Universe, Frequency, and Types of Data:** Annual tabulation of basic data items extracted from the Standard Statistical Establishment List, a file of all known single and multiestablishment companies maintained and updated by the U.S. Census Bureau. Data include number of establishments, number of employees, first-quarter and annual payrolls, and number of establishments by employment size class. Data are excluded for self-employed persons, domestic service workers, railroad employees, agricultural production workers, and most government employees.

**Type of Data Collection Operation:** The annual Company Organization Survey provides individual establishment data for multiestablishment companies. Data for single establishment companies are obtained from various Census Bureau programs, such as the Annual Survey of Manufactures and Current Business Surveys, as well as from administrative records of the Internal Revenue Service and the Social Security Administration.

**Estimates of Sampling Error:** Not Applicable.

**Other (Nonsampling) Error:** Response rates of greater than 90% for the 1993 Company Organization Survey.

**Sources of Additional Materials:** U.S. Census Bureau, *General Explanation of County Business Patterns*.

**Source and Title:** U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns and Statistics of Income Bulletin*.

**Tables:** 861-864.

**Universe, Frequency, and Types of Data:** Annual study of unaudited income tax returns of nonfarm sole proprietorships, Form 1040 with business schedules. Data provided on various financial characteristics by industry.

**Type of Data Collection Operation:** Stratified probability sample of approximately 31,000 sole proprietorships for tax year 1990. The sample is classified based on presence or absence of certain business schedules; the larger of total income or loss; and size of business plus farm receipts. Sampling rates vary from .043% to 100%.

**Data Collection and Imputation Procedures:** Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

**Estimates of Sampling Error:** Estimated CVs for tax year 1990 are not available; for 1987 (the latest available): For sole proprietorships, business receipts, 1.66%; net income, (less loss), 1.33%; depreciation 2.17%; interest expense 2.80%; and employee benefit programs 7.55%.

**Other (Nonsampling) Errors:** Processing errors and errors arising from the use of tolerance checks for the data.

**Sources of Additional Material:** U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns* (for years through 1980) and *Statistics of Income Bulletin*, Vol. 10, No. 1 (summer 1990).

**Source and Title:** U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns and Statistics of Income Bulletin*.

**Tables:** 861-863, 865, and 866.

**Universe, Frequency, and Types of Data:** Annual study of unaudited income tax returns of partnerships, Form 1065. Data provided on various financial characteristics by industry.

**Type of Data Collection Operation:** Stratified probability sample of approximately 28,000 partnership returns from a population of 1,660,000 filed during

calendar year 1990. The sample is classified based on combinations of gross receipts, net income or loss, and total assets, and on industry. Sampling rates vary from .04% to 100%.

**Data Collection and Imputation Procedures:** Computer selection of sample of tax return records. Data are adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return. Data not available due to regulations are not imputed.

**Estimates of Sampling Error:** Estimated CVs for tax year 1988 (latest available): For number of partnerships, .51%; business receipts, .78%; net income, 3.03%; net loss, 2.21%; and total assets, 1.22%.

**Other (Nonsampling) Errors:** Processing errors and errors arising from the use of tolerance checks for the data.

**Sources of Additional Material:** U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns and Statistics of Income Bulletin*, Vol. 10, No. 1 (summer 1990).

**Source and Title:** U.S. Internal Revenue Service, *Corporation Income Tax Returns*

**Tables:** 861-863 and 869-871.

**Universe, Frequency, and Types of Data:** Annual study of unaudited corporation income tax returns, Forms 1120 and 1120 (A, F, L, PC, REIT, RIC, and S), filed by corporations or businesses legally defined as corporations. Data provided on various financial characteristics by industry and size of total assets, and business receipts.

**Type of Data Collection Operation:** Stratified probability sample of approximately 85,000 returns for 1987, distributed by sample classes generally based on type of return, size of total assets, size of net income or deficit, and selected business activity. Sampling rates for sample strata varied from .25% to 100%.

**Data Collection and Imputation Procedures:** Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return and to achieve statistical definitions.

**Estimates of Sampling Error:** Estimated CVs for 1988: Number of returns in subgroups ranged from 1.4% with assets under \$100,000, to 0% with assets over \$100 mil.; for amount of net income and amount of income tax, .18%.

**Other (Nonsampling) Errors:** Processing errors and errors arising from the use of tolerance checks for the data.

**Sources of Additional Material:** U.S. Internal Revenue Service, *Statistics of Income, Corporation Income Tax Returns*, annual.

## SECTION 18. COMMUNICATIONS

(See Section 1 for information pertaining to Table 924 and Section 26 for information pertaining to Table 937.)

## SECTION 19. ENERGY

**Source and Title:** U.S. Energy Information Administration, *Residential Energy Consumption Survey*.

**Tables:** 959, 960 and Table 1223 in Section 25.

**Universe, Frequency, and Types of Data:** Triennial survey of households and fuel suppliers. Data are obtained on energy-related household characteristics, housing unit characteristics, use of fuels, and energy consumption and expenditures by fuel type.

**Type of Data Collection Operation:** Probability sample of 7,183 eligible units in 129 PSUs. For responding units, fuel consumption and expenditure data obtained from fuel suppliers to those households.

**Data Collection and Imputation Procedures:** Personal interviews. Extensive followup of nonrespondents including mail questionnaires for some households. Adjustments for nonrespondents were made in weighting for respondents. Most item nonresponses were imputed.

**Estimates of Sampling Error:** Estimated CVs for household averages: For consumption, 1.3%; for expenditures, 1.0%; for various fuels, values ranged from 1.4% for electricity to 5.9% for LPG.

**Other (Nonsampling) Errors:** Household response rate of 86.7%. Nonconsumption data were mostly imputed for mail respondents (5.2% of eligible units). Usable responses from fuel suppliers for various fuels ranged from 82.8% for electricity to 55.7% for fuel oil.

**Sources of Additional Material:** U.S. Energy Information Administration, *Household Energy Consumption and Expenditures, 1993* and *Housing Characteristics, 1993*.

## SECTION 21. TRANSPORTATION—LAND

(See Section 1 for information pertaining to Table 1037, Section 13 for Table 1016, Section 15 for Table 1066, and Section 27 for Table 1057.)

## SECTION 22. TRANSPORTATION— AIR AND WATER

(See Section 13 for information pertaining to Table 1083.)

## SECTION 23. AGRICULTURE

**Source and Title:** U.S. Department of Agriculture, National Agriculture Statistics Service (NASS), *Census of Agriculture*.

**Tables:** 1100-1106.

**Universe, Frequency, and Types of**

**Data:** Complete count of U.S. farms and ranches conducted once every 5 years with data at the national, state, and county level. Data published on farm numbers and related items/characteristics.

**Type of Data Collection Operation:**

Complete census for number of farms; land in farms; estimated market value of land and buildings, machinery and equipment, and agriculture products sold; total cropland; irrigated land; total farm production expenses; farm operator characteristics; livestock and poultry inventory and sales; and selected crops harvested.

**Data Collection and Imputation Procedures:**

Data collection is by mailing questionnaires to all farmers and ranchers. Nonrespondents are conducted by telephone and correspondence followups. Imputations were made for all nonresponse item/characteristics.

**Estimates of Sampling Error:** Variability in the estimates is due to the sample selection and estimation for items collected by sample and census nonresponse estimation procedures. The CVs for national and state estimates are generally very small. Approximately 85% response rate.

**Other (Nonsampling) Errors:** Nonsampling errors are due to incompleteness of the census mailing list, duplications

on the list, respondent reporting errors, errors in editing reported data, and in imputation for missing data. Evaluation studies are conducted to measure certain nonsampling errors such as list coverage and classification error. Results from the evaluation program for the 1987 census indicate the net under coverage amounted to about 7.2% of the Nation's total farms.

**Sources of Additional Material:** U.S. Department of Agriculture (NASS), *1997 Census of Agriculture*, Volume 2, Subject Series—Part 1, *Agriculture Atlas of the U.S.*, Part 2, *Coverage Evaluation*, Part 3, *Rankings of States and Counties*, Part 4, *History*, Part 5, *ZIP Code Tabulation of Selected Items*; and Volume 4, *Farm and Ranch Irrigation Survey*.

**Source and Title:** U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Basic Area Frame Sample*.

**Tables:** See tables citing NASS in source notes in Section 23, which pertain to this or the following two surveys.

**Universe, Frequency, and Types of**

**Data:** Two annual area sample surveys of U.S. farm operators: June agricultural survey collects data on planted acreage and livestock inventories; and a February Farm Costs and Returns survey that collects data on total farm production, expenses, and specific commodity costs of production.

**Type of Data Collection Operation:**

Stratified probability sample of about 16,000 land area units of about 1 sq. mile (range from 0.1 sq. mile in cities to several sq. miles in open grazing areas). Sample includes 60,000 parcels of agricultural land. About 20% of the sample replaced annually.

**Data Collection and Imputation Procedures:**

Data collection is by personal enumeration. Imputation is based on enumerator observation or data reported by respondents having similar agricultural characteristics.

**Estimates of Sampling Error:** Estimated CVs range from 1% to 2% for regional estimates to 3% to 6% for state estimates of livestock inventories.

**Other (Nonsampling) Errors:** Minimized through rigid quality controls on the collection process and careful review of all reported data.

**Sources of Additional Material:** U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

**Source and Title:** U.S. Department of Agriculture National Agricultural Statistics Service (NASS), *Multiple Frame Surveys*

**Tables:** See tables citing NASS in source notes in Section 23, which pertain to this or the following survey.

**Universe, Frequency, and Types of Data:** Surveys of U.S. farm operators to obtain data on major livestock inventories, selected crop acreages and production, grain stocks, and farm labor characteristics; and to obtain farm economic data for price indexing.

**Type of Data Collection Operation:** Primary frame is obtained from general or special purpose lists, supplemented by a probability sample of land areas used to estimate for list incompleteness.

**Data Collection and Imputation Procedures:** Mail, telephone, or personal interviews used for initial data collection. Mail nonrespondent followup by phone and personal interviews. Imputation based on average of respondents.

**Estimates of Sampling Error:** Estimated CVs for number of hired farm workers is about 3%. Estimated CVs range from 1% to 2% for regional estimates to 3% to 6% for state estimates of livestock inventories.

**Other (Nonsampling) Errors:** In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

**Sources of Additional Material:** U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

**Source and Title:** U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Objective Yield Surveys*.

**Tables:** See tables citing NASS in source notes in Section 23, which pertain to this or the preceding survey.

**Universe, Frequency, and Types of Data:** Surveys for data on corn, cotton, potatoes, soybeans, wheat, and rice to forecast and estimate yields.

**Type of Data Collection Operation:** Random location of plots in probability sample s selected in June from Basic Area Frame Sample (see above).

**Data Collection and Imputation Procedures:** Enumerators count and measure plant characteristics in sample fields. Production measured from plots at harvest. Harvest loss measured from post harvest gleanings.

**Estimates of Sampling Error:** CVs for national estimates of production are about 2% to 3%.

**Other (Nonsampling) Errors:** In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

**Sources of Additional Material:** U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

(See Section 1 above for information pertaining to the Census of Population and Current Population Survey.)

## SECTION 24. NATURAL RESOURCES

(See Section 15 for Table 1155.)

## SECTION 25. CONSTRUCTION AND HOUSING

**Source and Title:** U.S. Census Bureau, *Monthly Survey of Construction*.

**Tables:** 1199 and 1201-1204.

**Universe, Frequency, and Types of**

**Data:** Survey conducted monthly of newly constructed housing units (excluding mobile homes). Data are collected on the start, completion, and sale of housing. (Annual figures are aggregates of monthly estimates.)

**Type of Data Collection Operation:** Probability sample of housing units obtained from building permits selected from 17,000 places. For nonpermit places, multistage probability sample of new housing units selected in 169 PSUs. In those areas, all roads are canvassed in selected enumeration districts.

**Data Collection and Imputation Procedures:** Data are obtained by telephone inquiry and field visit.

**Estimates of Sampling Error:** Estimated CVs of 3% to 4% for estimates of national totals but are as high as 20% for estimated totals of more detailed characteristics, such as housing units in multiunit structures.

**Other (Nonsampling) Errors:** Response rate is over 90% for most items. Nonsampling errors are attributed to definitional problems, differences in interpretation of questions, incorrect reporting, inability to obtain information about all cases in the sample, and processing errors.

**Sources of Additional Material:** U.S. Census Bureau, *Construction Reports*, Series C20, *Housing Starts*; C22, *Housing Completions*; and C25, *New One-Family Houses Sold and For Sale*.

**Source and Title:** U.S. Census Bureau, *Value of Construction Put in Place*.

**Tables:** 1194 and 1195.

**Universe, Frequency, and Types of**

**Data:** Survey conducted monthly on total value of all construction put in place in the current month, both public and private projects. Construction values include costs of materials and labor, contractors' profits, overhead costs, cost of architectural and engineering work, and miscellaneous project costs. (Annual figures are aggregates of monthly estimates.)

**Type of Data Collection Operation:**

Varies by type of activity. Total cost of private one-family houses started each month is distributed into value put in place using fixed patterns of monthly construction progress; using a multistage probability sample, data for private multifamily housing are obtained by mail from owners of multiunit projects. Data for residential additions and alterations are obtained in a quarterly survey measuring expenditures; monthly estimates are interpolated from quarterly data. Estimates of value of private nonresidential construction, and state and local government construction are obtained by mail from owners (or agents) for a probability sample of projects. Estimates of farm nonresidential construction expenditures are based on U.S. Department of Agriculture

annual estimates of construction; public utility estimates are obtained from reports submitted to Federal regulatory agencies and from private utility companies; estimates of Federal construction are based on monthly data supplied by Federal agencies.

**Data Collection and Imputation Procedures:**

See "Type of Data Collection Operation." Imputation accounts for approximately 20% of estimated value of construction each month.

**Estimates of Sampling Error:** CV estimates for private nonresidential construction range from 3% for estimated value of industrial buildings to 9% for religious buildings. CV is approximately 2% for total new private nonresidential buildings.

**Other (Nonsampling) Errors:** For directly measured data series based on samples, some nonsampling errors may arise from processing errors, imputations, and misunderstanding of questions. Indirect data series are dependent on the validity of the underlying assumptions and procedures.

**Sources of Additional Material:** U.S. Census Bureau, *Construction Reports*, Series C30, *Value of Construction Put in Place*.

**Source and Title:** U.S. Census Bureau, *American Housing Survey*.

**Tables:** See tables citing *American Housing Survey* in source notes.

**Universe, Frequency, and Types of**

**Data:** Conducted nationally in the fall in odd numbered years to obtain data on the approximately 112 million occupied or vacant housing units in the United States (group quarters are excluded). Data include characteristics of occupied housing units, vacant units, new housing and mobile home units, financial characteristics, recent mover households, housing and neighborhood quality indicators, and energy characteristics.

**Type of Data Collection Operation:**

The national sample was a multistage probability sample with about 53,000 units eligible for interview in 1997. Sample units, selected within 394 PSUs, were surveyed over a 5-month period.

**Data Collection and Imputation Procedures:** For 1997, the survey was conducted by personal interviews. The

interviewers obtained the information from the occupants or, if the unit was vacant, from informed persons such as landlords, rental agents, or knowledgeable neighbors.

**Estimates of Sampling Error:** For the national sample, illustrations of the SE of the estimates are provided in the Appendix D of the 1997 report. As an example, the estimated CV is about 0.2% for the estimated percentage of owner occupied units with two persons.

**Other (Nonsampling) Errors:** Response rate was about 97%. Nonsampling errors may result from incorrect or incomplete responses, errors in coding and recording, and processing errors. For the 1997 national sample, approximately 1.7% of the total housing inventory was not adequately represented by the AHS sample.

**Sources of Additional Material:** U.S. Census Bureau, *Current Housing Reports*, Series H-150 and H-170, *American Housing Survey*.

(See Section 1 above for information pertaining to the Census of Population, Section 15 pertaining to Table 1192 and Section 19 for Table 1223.)

## SECTION 26. MANUFACTURES

**Source and Title:** U.S. Census Bureau, *Census of Manufactures*.

**Tables:** See tables citing *Census of Manufactures* or the *1997 Economic Census* in source notes in Section 26 and also Table 937 in Section 18 and Table 1344 in Section 29.

### **Universe, Frequency, and Types of**

**Data:** Conducted every 5 years to obtain information on labor, materials, capital input and output characteristics, plant location, and legal form of organization for all plants in the United States with one or more paid employees. Universe was 350,000 manufacturing establishments in 1987.

### **Type of Data Collection Operation:**

Complete enumeration of data items obtained from 200,000 firms. Administrative records from Internal Revenue Service and Social Security Administration are used for 150,000 smaller single-location firms, which were determined by various cutoffs based on size and industry.

**Data Collection and Imputation Procedures:** Five mail and telephone followups for larger nonrespondents. Data for small single-location firms (generally those with fewer than 10 employees) not mailed census questionnaires were estimated from administrative records of IRS and SSA. Data for nonrespondents were imputed from related responses or administrative records from IRS and SSA. Approximately 8% of total value of shipments was represented by fully imputed records in 1987.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** Based on evaluation studies, estimates of non-sampling errors for 1972 were about 1.3% for estimated total payroll; 2% for total employment; and 1% for value of shipments. Estimates for later years are not available.

**Sources of Additional Material:** U.S. Census Bureau, *1987 Census of Manufactures*, *Industry Series*, *Geographic Area Series*, and *Subject Series*.

**Source and Title:** U.S. Census Bureau, *Annual Survey of Manufactures*.

**Tables:** See tables citing *Annual Survey of Manufactures* in source notes.

### **Universe, Frequency, and Types of**

**Data:** Conducted annually to provide basic measures of manufacturing activity for intercensal years for all manufacturing establishments having one or more paid employees.

### **Type of Data Collection Operation:**

Sampling frame is 350,000 establishments in the 1987 Census of Manufactures (see above), supplemented by Social Security Administration lists of new manufacturers and new manufacturing establishments of multi-establishment companies identified annually by the Census Bureau's Company Organization Survey. A probability sample of about 55,000 establishments is selected. All establishments of companies with more than \$500 million of manufacturing shipments in 1987 are included with certainty. All establishments with 250+ employees are also included with certainty along with a probability sample of smaller establishments.

**Data Collection and Imputation Procedures:** Survey is conducted by mail with phone and mail followups of nonrespondents. Imputation (for all nonresponse items) is based on previous year reports, or for new establishments in survey, on industry averages.

**Estimates of Sampling Error:** Estimated standard errors for number of employees, new expenditure, and for value added totals are given in annual publications. For U.S. level industry statistics, most estimated standard errors are 2% or less but vary considerably for detailed characteristics.

**Other (Nonsampling) Errors:** Response rate is about 85%. Nonsampling errors include those due to collection, reporting, and transcription errors, many of which are corrected through computer and clerical checks.

**Sources of Additional Material:** U.S. Census Bureau, *Annual Survey of Manufactures*, and Technical Paper 24.

## SECTION 27. DOMESTIC TRADE AND SERVICES

**Source and Title:** U.S. Census Bureau, *Census of Wholesale Trade, Census of Retail Trade*, and *Census of Service Industries*.

**Tables:** See tables citing the above censuses or the 1997 *Economic Census* in source notes in Section 27 and Table 1344 in Section 29.

**Universe, Frequency, and Types of Data:** Conducted every 5 years to obtain data on number of establishments, number of employees, total payroll size, total sales, and other industry-specific statistics. In 1987, the universe was all employer establishments primarily engaged in wholesale trade and employer and nonemployer establishments in retail trade or service industries.

**Type of Data Collection Operation:** All wholesale firms with paid employees surveyed; all retail and service large employer firms surveyed (i.e. all employer firms above the payroll size cutoff established to separate large from small employers) plus a 10-percent sample of smaller employer firms. Firms with no employees were not required to file a census return.

**Data Collection and Imputation Procedures:** Mail questionnaire is utilized with both mail and telephone followups for nonrespondents. Data for nonrespondents and all employer firms in retail trade and service industries are obtained from administrative records of IRS and the Social Security Administration.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** Response rate in 1987 of 80% for single establishment firms; 83% for multi-establishment firms. Item response ranged from 60% to 90% with higher rates for less detailed questions.

**Sources of Additional Material:** U.S. Census Bureau, Appendix A of *Census of Retail Trade*; *Census of Service Industries*; *Census of Wholesale Trade*; and *History of the 1987 Economic Censuses*, April 1992.

**Source and Title:** U.S. Census Bureau, *Current Business Surveys*.

**Tables:** 1278-1280, 1296, 1301, 1304, and Table 192 in Section 3, Tables 432 and 456 in Section 7, and Table 1057 in Section 21.

**Universe, Frequency, and Types of Data:** Provides monthly estimates of retail sales by kind of business and geographic area, and end-of-month inventories of retail stores; wholesale sales and end-of-month inventories; and annual receipts of selected service industries.

**Type of Data Collection Operation:** Probability sample of all firms from a list frame and, additionally, for retail and service an area frame. The list frame is the Bureau's Standard Statistical Establishment List (SSEL) updated quarterly for recent birth Employer Identification (EI) Numbers issued by the Internal Revenue Service and assigned a kind-of-business code by the Social Security Administration. The largest firms are included monthly; a sample of others is included every 3 months on a rotating basis. The area frame covers businesses not subjected to sampling on the list frame.

**Data Collection and Imputation Procedures:** Data are collected by mail questionnaire with telephone followups for

nonrespondents. Imputation made for each nonresponse item and each item failing edit checks.

**Estimates of Sampling Error:** For the 1989 monthly surveys, CVs are about 0.6% for estimated total retail sales, 1.7% for wholesale sales, and 1.3% for wholesale inventories. For dollar volume of receipts, CVs from the *Service Annual Survey* vary by kind of business and range between 1.5% to 15.0%. Sampling errors are shown in monthly publications.

**Other (Nonsampling) Errors:** Imputation rates are about 18% to 23% for monthly retail sales, 20% to 25% for wholesale sales, about 25% to 30% for monthly wholesale inventories, and 14% for the *Service Annual Survey*.

**Sources of Additional Material:** U.S. Census Bureau, *Current Business Reports*, *Monthly Retail Trade*, *Monthly Wholesale Trade*, and *Service Annual Survey*.

(See Section 17 for information pertaining to Tables 1275 and 1305.)

## SECTION 28. FOREIGN COMMERCE AND AID

**Source and Title:** U.S. Census Bureau, *Foreign Trade—Export Statistics*.

**Tables:** See U.S. Census Bureau citations for export statistics in source notes in Section and 28 and also Table 1341 in Section 29.

**Universe, Frequency, and Types of Data:** The export declarations collected by Customs are processed each month to obtain data on the movement of U.S. merchandise exports to foreign countries. Data obtained include value, quantity, and shipping weight of exports by commodity, country of destination, Customs district of exportation, and mode of transportation.

**Type of Data Collection Operation:** Shipper's Export Declarations are required to be filed for the exportation of merchandise valued over \$1,500. Customs officials collect and transmit the documents to the U.S. Census Bureau on a flow basis for data compilation. Value data for shipments valued under \$1,501 are estimated, based on established percentages of individual country totals.

**Data Collection and Imputation Procedures:** Statistical copies of Shipper's Export Declarations are received on a daily basis from Customs ports throughout the country and subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued over \$1,500. Estimates for shipments valued at \$1,500 or less are made, based on established percentages of individual country totals.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** Clerical and complex computer checks intercept most processing errors and minimize otherwise significant reporting errors; other nonsampling errors are caused by undercounting of exports to Canada due to the nonreceipt of some Shipper's Export Declarations.

**Sources of Additional Material:** U.S. Census Bureau, *U.S. Merchandise Trade: Exports, General Imports, and Imports for Consumption*, *SITC, Commodity by Country*, FT 925 (discontinued after 1996).

**Source and Title:** U.S. Census Bureau, *Foreign Trade—Import Statistics*.

**Tables:** See U.S. Census Bureau citations for import statistics in source notes in Section 28 and also Table 1341 in Section 29.

**Universe, Frequency, and Types of Data:** The import entry documents collected are processed each month to obtain data on the movement of merchandise imported into the United States. Data obtained include value, quantity, and shipping weight by commodity, country of origin, Customs district of entry, and mode of transportation.

**Type of Data Collection Operation:** Import entry documents are required to be filed for the importation of goods into the United States valued over \$1,000 or for articles which must be reported on formal entries. Customs officials collect and transmit statistical copies of the documents to the U.S. Census Bureau on a flow basis for data compilation. Estimates for shipments valued under \$1,001 and not reported on formal entries are based on established percentages of individual country totals.

**Data Collection and Imputation Procedures:**

Statistical copies of import entry documents, received on a daily basis from Customs ports of entry throughout the country, are subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued at \$1,001 and over or items which must be reported on formal entries.

**Estimates of Sampling Error:** Not applicable.

**Other (Nonsampling) Errors:** Verification of statistical data reporting by Customs officials prior to transmittal and a subsequent program of clerical and

computer checks are utilized to hold nonsampling errors arising from reporting and/or processing errors to a minimum.

**Sources of Additional Material:** U.S. Census Bureau, *U.S. Merchandise Trade: Exports, General Imports and Imports for Consumption, SITC, Commodity by Country*, FT 925 (discontinued after 1996).

**SECTION 29. OUTLYING AREAS**

(See Section 1 for information pertaining to Tables 1334 and 1335, Section 2 for Table 1333, Section 17 for Table 1342, Section 28 for Table 1341, and Sections 26 and 27 for Table 1344.)

## Tables Deleted From the 1998 Edition of the Statistical Abstract

1998  
number

### Sec. 1. **Population**

- 29 U.S. Resident Population, by Region and Division: 1970 to 1997
- 63 Marital Status of the Population—Projections, by Age and Sex:  
2000 and 2010
- 70 Households—Projections, by Type of Household: 1998 to 2010
- 74 Households—Projections, by Age of Householder: 1998 to 2010
- 75 Households—Projections, by Race and Hispanic Origin of Householder:  
1998 to 2010

### Sec. 2. **Vital Statistics**

- 142 Death Rates, by Leading Causes and Age: 1980 to 1995

### Sec. 3. **Health and Nutrition**

- 168 Expenditures for Health Services and Supplies, by Type of Payer:  
1980 to 1995
- 197 Percent of Adult Persons With a Dental Visit Within Past Year,  
by Patient Characteristics: 1990 to 1993
- 204 Average Cost to Community Hospitals Per Patient, by State: 1990 to 1995
- 230 Osteoporosis—Prevalence Among Women 50 Years Old and Over:  
1988 to 1991

### Sec. 4. **Education**

- 264 Educational Attainment—25 Largest States: 1997
- 265 Educational Attainment for Smaller States: 1997
- 267 School Enrollment of 3 to 5 Year Olds, by Education and Labor Force Status  
of Mother and Family Income: 1996

### Sec. 5. **Law Enforcement, Courts, and Prisons**

- 350 Reported Criminal Victimization at School, by Selected Characteristics and  
Perceptions of Conditions at School: 1989 and 1995
- 351 Aliens Expelled and Immigration Violations: 1980 to 1995
- 355 Persons Arrested, by Charge, Sex, and Age: 1996

### Sec. 6. **Geography and Environment**

- 388 Area and Acquisition of the Federal Public Domain: 1781 to 1994
- 396 Oil Polluting Incidents Reported in and Around U.S. Waters: 1973 to 1993
- 409 Value of Selected Product Shipments for Environmental or Potential  
Environmental Use: 1995
- 410 Receipts for Selected Services for Environmental or Potential Environmental  
Purposes: 1995

**Sec. 9. State and Local Government Finances and Employment**

- 524 City Governments—Total and Per Capita Finances for Largest Cities: 1995
- 527 County Governments—Total and Per Capita Finances for Largest Counties: 1995
- 533 State and Local Government—Employee Benefits: 1994

**Sec. 11. National Defense and Veterans Affairs**

- 570 Defense-Related Agencies: 1980 to 1995

**Sec. 12. Social Insurance and Human Services**

- 602 Private Expenditures for Social Welfare, by Type: 1980 to 1994
- 607 Persons Participating in Selected Means-Tested Government Assistance Programs, by Selected Characteristics: 1993
- 624 Protection Against Short-Term Sickness Income Loss: 1980 to 1994
- 629 Mothers Who Receive AFDC and/or Food Stamp Benefits—Socioeconomic Characteristics: 1993

**Sec. 13. Labor Force, Employment, and Earnings**

- 663 Persons Doing Job-Related Work at Home: 1991 and 1997
- 664 Persons on Flexible Schedules: 1997
- 665 Employed Persons in Alternative and Traditional Work Arrangements, by Selected Characteristic: 1997
- 690 Drug Testing in the Workplace: 1992-93 and 1995
- 709 Fatal Work Injuries, by Cause: 1996

**Sec. 14. Income, Expenditures, and Wealth**

- 730 Projections of Personal Income, Earnings, and Gross State Product in Constant (1987) Dollars, by State: 1993 to 2010
- 735 Average Annual Expenditures of All Consumer Units, by Type of Household Unit: 1995

**Sec. 15. Prices**

- 788 Average Price of Energy in Selected Metropolitan Areas: 1997

**Sec. 16. Banking, Finance, and Insurance**

- 821 Delinquency Rates on Bank Installment Loans, by Type of Loan: 1980 to 1997

**Sec. 17. Business Enterprise**

- 873 Private Establishment, Percent Offering Health Insurance, and Percent With Other Selected Characteristics by State: 1993
- 899 500 Largest Industrial Corporations—Sales, Assets, and Profits by Sales Rank: 1990 to 1993

**Sec. 18. Communications and Information Technology**

- 918 Telephone Companies—Summary: 1988 to 1995
- 922 Wireless Bureau Stations Authorized, by Class: 1996
- 930 Microcomputer Software Sales: 1995 and 1996
- 941 U.S. Postal Service—Volume of Mail, by Class: 1980 to 1997

**Sec. 19. Energy**

- 965 Daily International Flow of Crude Oil, by Area: 1991

**Sec. 21. Transportation—Land**

- 1026 Price Trends for Federal-Aid Highway Construction: 1980 to 1996

**Sec. 22. Transportation—Air and Water**

- 1087 U.S. Exports of Aerospace Vehicles and Equipment: 1990 to 1997

**Sec. 23. Agriculture**

- 1106 Farm Real Estate—Summary: 1980 to 1997  
1107 Farm Real Estate—Value of Land and Buildings, by State: 1995 to 1998  
1117 Selected Indexes of Farm Inputs: 1980 to 1995  
1127 Crops—Acreage and Value, by State: 1995 to 1997  
1145 Egg Supply and Use: 1980 to 1997

**Sec. 25. Construction and Housing**

- 1190 Construction Industries—Summary, by Industry: 1992  
1212 Housing Inventory for Selected Metropolitan Areas—Summary  
Characteristics: 1994 to 1996  
1219 Owner Occupied Housing Units—Mortgage Characteristics, by Region: 1995

**Sec. 26. Manufactures**

- 1234 Manufactures—Summary, by Selected Industry Based on Value Added:  
1992 and 1996  
1247 Textiles and Apparel Products—U.S. Exports and Imports: 1993 to 1995  
1259 Machine Tools—New Orders and Shipments: 1970 to 1996  
1271 Fluid Power Products—Shipments: 1991 to 1996

**Sec. 27. Domestic Trade and Services**

- 1297 Services—Establishments, Employees, and Payroll: 1990 and 1995

**Sec. 28. Foreign Commerce and Aid**

- 1311 U.S. Businesses Acquired by Foreign Direct Investors—Assets, Sales,  
and Employment, by Industry of U.S. Business Enterprise: 1996 and 1997  
1325 Imports for Consumption—Values and Duties: 1980 to 1996

**Sec. 30. Comparative International Statistics**

- 1346 Marriage and Divorce Rates, by Country: 1980 to 1995  
1347 Births to Unmarried Women, by Country: 1980 to 1995  
1375 Manufacturing Labor Productivity Levels in Major OECD Economies: 1993  
1378 Selected Petroleum Product Prices, by Country: 1997  
1396 Armed Forces Personnel, by Country: 1985 to 1995

## Appendix VI

### New Tables

Table number		Page number
	<b>Sec. 1. Population</b>	<b>1</b>
31	Mobility Status of Households, by Household Income: 1997-98	32

Pork (see also Meat and meat products):	
Consumption .....	250, 1123, 1137, 1369

**NOTE:** Index citations refer to **table** numbers, not page numbers.

## Table

Pork (see also Meat and meat products): —Con.	
Foreign trade .....	1122, 1123, 1137
Production .....	1137, 1138
Supply .....	1137
Pork chops .....	790
Portland cement .....	1168, 1169
Portugal. See Foreign countries.	
Postal rates .....	945
Postal Service .....	941, 946
Productivity .....	694
Potash (potassium salts) ....	1168, 1169, 1170, 1173
Potassium, foreign trade .....	1175
Potatoes:	
Acreage .....	1135
Consumption .....	251, 1133
Farm marketings, sales .....	1111
Foreign trade .....	1133
Prices .....	790, 1116
Production .....	1133, 1135
World production .....	1347
Poultry (see also Eggs):	
Consumer expenditures .....	738, 739
Consumption .....	250, 1137, 1369, 1424
Farm marketings, sales .....	1111, 1112
Foreign trade .....	1125, 1137
Number on farms .....	1145
Prices .....	790, 1116, 1145
Production and sales ....	1119, 1137, 1145, 1146, 1394
Value .....	1145
Poverty:	
Children .....	761, 763
Families .....	768, 769
American Indian, Eskimo, Aleut population .....	54
Asian and Pacific Islander population ..	52
Black population .....	51, 768, 769
Educational attainment .....	769
Elderly .....	752
Hispanic origin population ..	55, 768, 769
Housing .....	1192
Labor force participation .....	769
Housing .....	1218, 1222
Persons:	
Age .....	763, 764, 767
American Indian, Eskimo, Aleut population .....	54
Black population ..	51, 751, 760, 761, 763, 764, 767
Children .....	761, 763
Elderly .....	50, 763, 764
Hispanic origin population .....	55, 751, 760, 761, 763, 764
State .....	765
Threshold .....	762
Power (see also Electric light and power industry):	
Electric ..	972, 973, 974, 975, 977, 979, 980
Hydro .....	972, 1385, 1386, 1389
Nuclear .....	972, 1385, 1386, 1389, 1390
Prices .....	788, 958, 971
Water .....	400, 982
Power plants. See Electric light and power industry.	
Precipitation, selected cities ....	423, 424, 425, 1356
Pregnancies .....	113, 114, 115, 120, 121, 122
Drinking during pregnancy .....	122

## Table

Pregnancies —Con.	
Smoking during pregnancy .....	120, 121
Testing .....	201
Prenatal care .....	92, 99, 103
Prescription drugs .....	778
President, U.S., elections for ....	462, 463, 464, 465, 466, 490, 1445
Campaign finances .....	493, 496, 497
Prices (see also individual commodities):	
Bonds .....	840, 845
Books and periodicals .....	940
Electricity .....	788, 958, 971
Energy .....	959, 964
Fish, by species .....	1160
Food .....	789, 790, 1435
Foreign countries .....	780, 1366, 1367
Housing ....	1203, 1204, 1205, 1206, 1207, 1209, 1438

# HOOVER'S COMPANY CAPSULES ON CD-ROM

This easy-to-use program is ideal for generating mailing lists. It features information on 11,000 major U.S. companies and includes 30,000 executive names. Each record includes company name, address, phone and fax numbers; Web site address; names of CEO, CFO, and chief human resources officer; sales and one-year sales change; fiscal year-end, stock exchange and symbol; industry; metro area; and a brief overview of operations.

Developed in Claris' FileMaker Pro, the program combines a simple, intuitive interface (no user manual required) with a powerful search engine.

- Sort and search by one or more fields, including company name, location, sales, industry and more
- Create mailing labels, merge letters and lists
- Import the information into your own database, word processing or spreadsheet programs
- Click on Web site address to connect to the company's Web site, or click on the stock symbol for a stock quote or chart (requires Internet access)

Hoover's Company Capsules on CD-ROM is also available with quarterly updates which provide you with the most up-to-date information we have available. What's more, you'll receive more companies on each quarterly update than on the previous disc as we add new companies to our database! And all this for only **\$499.95** — order your Quarterly Updates version today!

Requires Windows 3.1 or higher and 4MB RAM and 20MB free hard-disk space. License permits use of information for creating letters and labels for individual use only. Information may not be disseminated to multiple users through company intranets or other means of distribution.

**ITEM #HCCD2 • CD-ROM With Three Quarterly Updates • \$499.95**

**ITEM #HCCD1 • CD-ROM Without Quarterly Updates • \$399.95**

## REGIONAL CD-ROMS

These regional versions of Hoover's Company Capsules on CD-ROM make easy, inexpensive mailing lists. The software is the same as described at left.

# Why Pay Big Bucks for Company Information?

**Get vital information on thousands of top companies for just pennies a piece**

## Hoover's MasterList of Major U.S. Companies 2000

**\$119.<sup>95</sup>**

hardcover

This new edition provides vital information on more than 5,500 of the largest U.S. public and private companies and other enterprises (government-owned, foundations, schools, partnerships, subsidiaries, joint ventures, cooperatives and not-for-profits) with sales of more than \$125 million, plus public companies with a market capitalization of more than \$500 million.

Entries include a description of operations and ownership; five years of financials including sales, net income, market cap and number of employees; address, telephone, fax and Web site; fiscal year-end; names of CEO, CFO and chief human resources officer; and, if public, stock exchange and symbol. Indexed by industry, headquarters location and stock symbol.

Sixth edition, October 1999.

ITEM# HML00 • Hardcover • \$119.95 • ISBN 1-57311-054-X • 8-1/2" x 11" • 1,058 pp

## Hoover's MasterList of Major International Companies 1998-1999

**\$89.<sup>95</sup>**

hardcover

This resource covers the top 1,600 companies in countries around the globe and includes:

- non-U.S. companies with sales greater than \$5 billion
- ADRs trading on the major U.S. exchanges, plus nearly 200 others traded OTC
- companies on the major indexes from stock markets worldwide (FTSE 100, Nikkei 225, TSE 100 and others)
- the top companies from more than 20 countries in Europe, Latin America, Africa, Asia and the Pacific Rim.

**SAVE \$70!**

Get the U.S. and International MasterLists for just **\$140** when you order directly from Hoover's. That's a 33% savings!

**ITEM# HMS • \$140**

You'll get a description of operations and ownership; five years of financials including sales, net income and number of employees; address, telephone, fax and Web site; fiscal year-end; names of CEO and CFO; and stock exchange and stock symbol (if traded in the U.S.). All financial information is converted to U.S. dollars. Indexed by industry and country.

First edition, November 1998.
